## Product Description

### Product Description:

Our perfume fragrances are also incredibly versatile. Not only are they perfect for use in traditional perfumes and colognes, but they can also be used in a wide range of other applications. For example, they can be used in soaps and candles to add a pleasant aroma, or they can be added to food products to create a delicious and unique flavor.

Our perfume fragrances are also incredibly easy to use. Simply add them to your product at the appropriate ratio and mix thoroughly. And if you're not sure which fragrance to choose, don't worry - we offer samples of all of our fragrances so that you can try them out before committing to a larger purchase.

Our perfume fragrances are available in a wide range of packing sizes, from 10ml all the way up to 200kg. This makes it easy to find the perfect size for your needs, whether you're a small business or a large manufacturer. And with our competitive pricing, you can be sure that you're getting a great value for your money.

So whether you're looking for a high quality and concentrated fragrance oil for use in your perfumes, soaps, candles, or food products, our Perfume Fragrances are the perfect choice. Try them out today and experience the difference for yourself!

### Advantages:

Our company's product quality rivals that of the top 4 international flavor companies. We maintain strong competitiveness within the Chinese flavor industry. In addition to our extensive range of conventional flavors and fragrances, our expertise in imitation fragrance technology has received high acclaim, with the most comprehensive selection available. Our products are distributed in over 80 countries.

"We can replicate any scent you desire, leveraging our distinct advantages. Please trust in our capabilities."

"We specialize in crafting 100% concentrated cosmetic fragrance oils with unparalleled creativity, performance, and natural essence, enriching moments in caring, cleaning, and perfuming sustainably."

"Fragrances add another dimension to life, enhancing everyday experiences."

## Technical Parameters:

The **main components** of flavorings typically include the following categories:

Natural flavor components:

Plant essential oils: such as lemon oil, rose oil, lavender oil, etc.

Animal extracts: such as musk, civet, etc.

Natural fragrance woods: such as sandalwood, agarwood, etc.

Synthetic flavor components:

Aliphatic compounds: such as alcohols, ketones, esters, etc.

Aromatic compounds: such as vanillin, coumarin, etc.

Fixatives:

Used to enhance the longevity of the flavor, such as ambrette seed oil, ambroxan, etc.

Solvents:

Used to dissolve the flavor, such as alcohol, propylene glycol, vegetable oils, etc.

Emulsifiers and stabilizers:

Used to improve the stability and uniformity of the flavor.

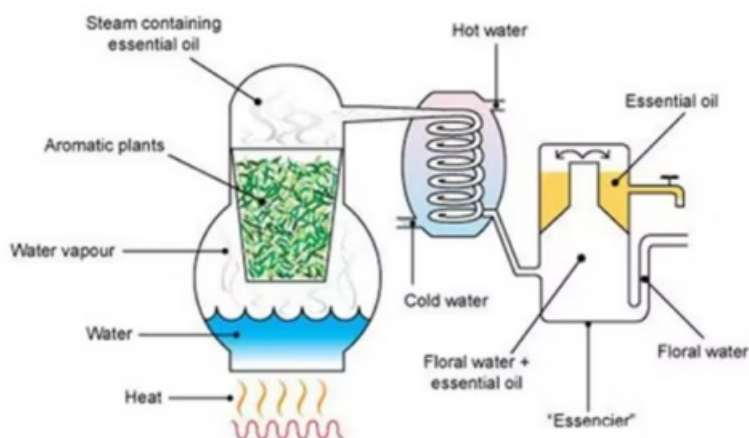

Other additives:

Such as preservatives, colorants, etc.

## Production Process:

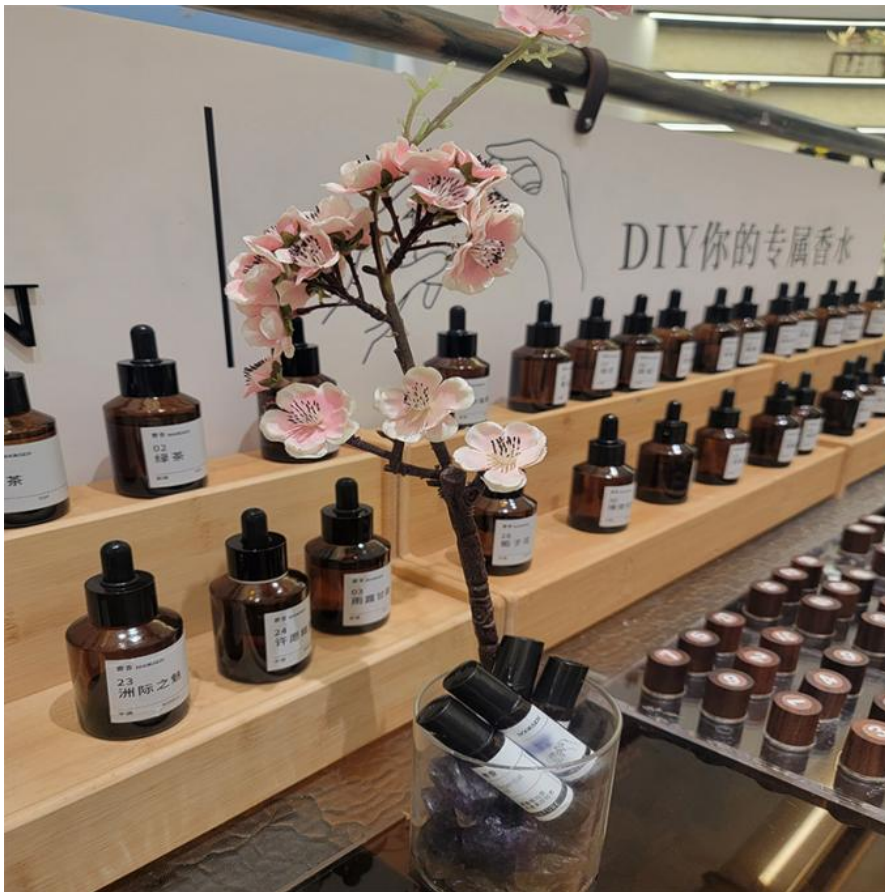

## Our Factory Steam Distillation
