Product Description

Product Description:

Ginger flower essential oil is typically used in detergents as a fragrance component, offering several main **benefits and effects**:

Enhancing fragrance: Ginger flower essential oil imparts a unique ginger flower aroma to detergents, providing a pleasant olfactory experience during use. This fragrance helps mask the chemical odors of the detergent itself, making the washing process more enjoyable and comfortable.

Improving product quality: Adding ginger flower essential oil can enhance the overall sensory appeal of detergents, making the product more attractive and competitive in the market. The selection and quality of fragrance directly influence consumer liking and satisfaction.

Enhancing consumer experience: The use of ginger flower essential oil goes beyond fragrance; it enhances the overall sensory experience of using the detergent through interaction with consumers' senses. Fragrance can evoke emotions and memories in consumers, thereby fostering brand loyalty.

Market differentiation: Ginger flower essential oil, as a distinctive fragrance component, helps detergents achieve differentiation in the market, appealing to consumers seeking novel olfactory experiences.

Overall, the application of ginger flower essential oil in detergents aims not only to provide fragrance but also to enhance the product's sensory appeal and market competitiveness, meeting diverse consumer preferences and needs.

Technical Parameters:

Main Components:

The main components of fragrance essence oils include the following categories:

Natural flavor components:

1. Plant essential oils: such as lemon oil, rose oil, lavender oil, etc.
2. Animal extracts: such as musk, civet, etc.
3. Natural fragrance woods: such as sandalwood, agarwood, etc.

Synthetic flavor components:

1. Aliphatic compounds: such as alcohols, ketones, esters, etc.
2. Aromatic compounds: such as vanillin, coumarin, etc.

Fixatives:

Used to enhance the longevity of the flavor, such as ambrette seed oil, ambroxan, etc.

Solvents:

Used to dissolve the flavor, such as alcohol, propylene glycol, vegetable oils, etc.

Emulsifiers and stabilizers:

Used to improve the stability and uniformity of the flavor.

Other additives:

Such as preservatives, colorants, etc.

Reference addition:

product type	peference addition(%)	produce type	reference addition(%)
perfume	5%-15%	paint	0.05%-0.2%
