Do you have the following concerns about our products?:

1. Is the fragrance of your product short-lived?
2. Will the fragrance of your product fade over time?
3. Are you worried that you can't find a similar fragrance?
4. Have you not found a fragrance that meets your requirements?
5. Are you still struggling to find a fragrance that can cover the smell of the product itself?
6. Have you found that the color of your product becomes turbid after adding spices?

We have the ability to solve these problems for you!

1. We are the source manufacturer of spices, with preferential prices and no middlemen to make a profit. The factory has strong R&D capabilities and can customize various spices.
2. We use high-quality raw materials to produce stable and long-lasting spices. Our perfumers will use raw materials with unique fragrance retention characteristics as the basic structural formula of your product according to your specific needs. The fragrance has excellent transmission and good fragrance retention.
3. We use the internationally advanced gas chromatograph GC-MS to analyze the aroma components of the samples. Experienced analytical engineers read the spectrum. Combined with the refined blending of perfumers, the overall similarity of the imitations is basically controlled at more than 90%.
4. In the selection of the fragrance ratio, the perfumer fully considers the volatility of various spices and the different performances of the products in actual applications, determines the appropriate fragrance, makes the overall fragrance refreshing and pleasant, and thus gives your product a soothing fragrance.
5. We have a professional R&D team, which can create a customized fragrance for you that can cover the smell of your product itself based on the samples you provide or the detailed data of your product.
6. Our professional engineers can not only provide you with suitable fragrances, but also provide you with technical advice. For example, we can help you solve the problem of 'the color of the product becomes turbid after adding fragrances'.
