Product Description

Product Description:

Peppermint essential oil(Model Number:LDZ-PL90006) is an essential oil extracted from the mint plant (usually peppermint or spearmint), which is widely used in beauty, health care and home life for its refreshing aroma and multiple benefits.

Peppermint essential oil is transparent or light yellow, with a fresh, spicy smell and a strong cooling feeling, which can instantly refresh the mind. It can be used for aromatherapy, skin care, hair care and massage, etc. It is a versatile natural product. Its main ingredients include menthol and menthone, which give it a unique cooling effect and healing properties. Commonly used in aromatherapy, personal care, toothpaste making, etc.

Our Aromatherapy Fragrances product is highly recommended for those who are looking for a reliable flavor and fragrance solution. This product is made from high-quality ingredients and is guaranteed to provide the best flavor and fragrance experience. Our Aromatherapy Fragrances product is designed to be used in various applications, making it a versatile solution for your needs.

Our Aromatherapy Fragrances product is best stored in a cool dry place in tightly sealed containers. This ensures that the product remains fresh and does not lose its potency. This product is also oil/water soluble, making it easy to use and mix with other ingredients. Our Aromatherapy Fragrances product is also available for OEM, making it the perfect solution for businesses that require customized fragrance solutions. We welcome OEM orders and are always ready to provide the best service to our customers.

Why Choose Us:

1.Products advantages

Liquid form, storage at room temperature
Anti-corrosion, anti-oxidation, stability
High level of flavor reproduction
Customized services

2.Raw material advantage

Fresh:Raw materials are processed quickly from place of origin to factory to ensure freshness.

Nature:Have cooperative base in raw material the place of origin.

Traceable:Specially-assigned professional management.Strictly control the quality of raw materials

3.Technology advantage

Low temperature cycle stage extraction,analyzed the advantages and disadvantages of various extraction methods, combined with the characteristics of raw materials, geographical advantages and equipment output value and other factors, through repeated scientific experiments, finally confirmed that low temperature sub-extraction method has become the bottom extraction technology of all kinds of concentrate.

4.Break through technical difficulties

The extraction process was completed under the condition of low temperature, and the good components were better preserved in the extraction process, which overcame the corruption of the extraction solution and the dissolution of impurities in the traditional extraction process. Breaking through the technical problems of insufficient head fragrance of flower concentrates, turbidity of tea concentrates, obvious bitter and astringent flavour of coffee concentrates, oxidation of citrus concentrates.
