Product Description

Product Description:

Our Fragrances Oil is oil/water soluble, making it easy to dilute and mix with carrier oils. This allows you to create a customized scent that suits your preferences. We welcome OEM orders, so you can create your own brand of fragrances using our high-quality oils.

We understand that choosing the right fragrance can be difficult, which is why we offer free samples. Each sample contains 2 ml of Fragrance Oil, allowing you to test our product before committing to a larger order. Please contact us for sample details.

Our Fragrances Oil contains herbal extracts, which adds a unique scent to your product. This makes it a great choice for those who want to create a natural, earthy scent. Our oils are also easy to blend with other scents, allowing you to create a complex aroma that is unique to you.

When using our Fragrances Oil, it is important to dilute it with a carrier oil. This will help the fragrance last longer and prevent skin irritation. Our oils are highly concentrated, so a little goes a long way. With proper dilution, you can create a long-lasting fragrance that will leave you smelling great all day.

Why Choose Us:

Raw material advantage	<ul style="list-style-type: none"> *Fresh Raw materials are processed quickly from place of origin to factory to ensure freshness. *Nature Have cooperative base in raw material the place of origin. *Traceable Specially-assigned professional management. Strictly control the quality of raw materials
-------------------------------	---

Technology advantage	<p>*Low temperature cycle stage extraction</p> <p>Analyzed the advantages and disadvantages of various extraction methods, combined with the characteristics of raw materials, geographical advantages and equipment output value and other factors, through repeated scientific experiments, finally confirmed that low temperature sub-extraction method has become the bottom extraction technology of all kinds of concentrate.</p> <p>*Break through technical difficulties</p> <p>The extraction process was completed under the condition of low temperature, and the good components were better preserved in the extraction process, which overcame the corruption of the extraction solution and the dissolution of impurities in the traditional extraction process. Breaking through the technical problems of insufficient head fragrance of flower concentrates, turbidity of tea concentrates, obvious bitter and astringent flavour of coffee concentrates, oxidation of citrus concentrates.</p>
Products advantages	<p>* Liquid form, storage at room temperature</p> <p>* Anti-corrosion, anti-oxidation, stability</p> <p>* High level of flavor reproduction</p> <p>* Customized services</p>
