Product Description

Product Description:

Our Car Perfume has a shelf life of 1-3 years, meaning it can be used for a long time. It can be opened for one year and unopened for three years if stored in a cool, dry place in tightly sealed containers. This ensures that the fragrance remains fresh and potent for long periods.

The perfume comes in a light yellow or colorless liquid oil form, making it easy to apply. It can be used in any type of car, and its compact size makes it easy to store in your glove compartment or center console. It is available in plastic or iron packing, allowing you to choose the type of container that suits your needs.

Our Car Perfume is made using the steam distillation method, which ensures that the fragrance is pure and free from any impurities. This method also preserves the natural aroma of the ingredients, giving you a rich and authentic fragrance that is sure to please your senses. The perfume is oil and water-soluble, making it easy to use. You can add a few drops to a bowl of water and place it in your car to enjoy its fragrance. Alternatively, you can add a few drops to a diffuser, and the aroma will diffuse throughout your car, giving you a relaxing and refreshing driving experience.

Our Car Perfume is perfect for those who love flavor fragrance, aromatherapy fragrances, and essence fragrance. It is an excellent way to keep your car smelling fresh and clean, and its natural ingredients ensure that it is safe for you and your family. So why wait? Order our Car Perfume today and experience the joy of a fresh-smelling car!

Advantages:

The quality of our company's products is consistent with that of the top 4 international flavor companies. Our company is very competitive among Chinese flavor companies. In addition to ordinary flavors and fragrances, our imitation fragrance technology is also greatly affirmed, and the number of imitation fragrances is also the most complete. Our products have been sold to more than 80 countries.

* We can imitate everything you want, our advantages are very clear. Please believe us.

* We shape 100% concentrate cosmetic fragrance oil with the highest levels of creativity, performance and naturality to bring the most memorable moments to caring, cleaning and perfuming, sustainably.

"Fragrances bring another layer to Life, they enhance every day's experience"

Excellent fragrance retention effects, reduce the volatilization speed of fragrance, and prolong the time of fragrance retention by 2-2.5 times
Increases the strength of fragrance, making the fragrance long-lasting and retain for a long time
Small usage, 20-30% of the fragrance, saving the costs
Almost colorless and odorless, will not affect the original color and smell of the fragrance
High solubility with oil-soluble and water-soluble, suitable for all kinds of fragrances and perfumes

Applications:

Car Perfume are widely used in daily life and industrial production because they can improve the air quality in the car and enhance the driving experience. **The following are the main applications of car aromatherapy essential oils in these two fields:**

Application in daily life:

Fresh air in the car: Car aromatherapy essential oils can effectively remove odors in the car, especially the formaldehyde smell, smoke smell and food residue smell of new cars. Using aromatherapy essential oils can keep the air in the car fresh and make the driver and passengers feel comfortable and happy.

Emotional regulation: Different types of essential oils have different emotional regulation effects. For example, lavender essential oil can help relax the body and mind and relieve anxiety during driving; citrus essential oils can refresh the mind, help the driver stay focused and awake, and reduce driving fatigue.

Healthy and environmentally friendly: High-quality natural aromatherapy essential oils are extracted from plants, which are safer and more environmentally friendly, friendly to passengers in the car, especially children and sensitive people, and will not produce potential health effects of chemicals.

Application in industrial production:

Manufacturing of car aromatherapy equipment: In industrial production, car aromatherapy equipment such as aromatherapy pendants, car aromatherapy devices, car air purifiers, etc., widely use aromatherapy essential oils as their core product formulas. These devices diffuse the fragrance of essential oils into the car through electronic heating or natural volatilization.

Development of customized fragrances: Automakers and car supplies companies will develop and customize unique car fragrances according to market demand. In industry, the formula of aromatherapy essential oils has been formulated and tested to provide car owners with a variety of styles and functions of aromatherapy options, from fresh, soothing to energetic and refreshing, to meet the needs of different driving scenarios.

In-car air quality control system: Some high-end car brands will have built-in car aromatherapy systems in their vehicle designs to automatically release aromatherapy essential oils to keep the car fresh at all times. This system is usually combined with the air conditioning or air purification equipment in the car to accurately control the diffusion amount and time of the fragrance and enhance the driving experience.

In general, car aromatherapy essential oils provide drivers and passengers with a more comfortable driving environment in daily life, while in industrial production, through technological and equipment innovations, they promote the widespread application of car aromatherapy products.

Customization:

Product Customization Services:

Customize your own Home Fragrance Scented for a relaxing and refreshing atmosphere.

Create your own Aromatherapy Fragrances for a calming and uplifting effect.

Personalize your Home Fragrance Scented with a unique scent that suits your preference.

For perfume fragrance oils, we offer OEM support for creating your own signature scent or replicating popular perfumes, ensuring your chosen fragrance stays with you wherever you go.
