Product Description

Product Description:

Mango essential oil is a natural essential oil derived from mango, with a unique sweet tropical fruity aroma that is pleasant and relaxing. It is rich in vitamin A and antioxidants, which can effectively nourish the skin, help repair damaged cells, and improve skin elasticity and radiance. Mango essential oil is widely used in aromatherapy, skin care, massage, and household cleaning. It has multiple functions, not only soothing the mood, but also bringing a lasting fresh breath.

Features of mango essential oil:

Sweet tropical aroma: exudes the aroma of natural mango, which can instantly improve the mood and bring a sense of relaxation and pleasure.

Moisturizing and repairing: rich in vitamins A and E, it can nourish and repair the skin, help improve dry and rough skin, and keep the skin soft and smooth.

Antioxidant effect: The natural antioxidants in mango essential oil help fight free radicals, delay skin aging, and maintain the youthful vitality of the skin.

Multi-purpose application: suitable for aromatherapy, massage oil, and skin care products, which can soothe emotions, improve skin conditions, and add a natural and fresh breath.

Stress relief: used in aromatherapy to help relieve stress, anxiety and fatigue, and promote mental and physical balance.

Natural extraction: extracted from natural mango essence, without artificial additives, suitable for healthy and natural skin care and home care products.

Easy to mix: can be mixed with other essential oils or base oils to create a rich aroma combination to meet personal preferences and needs.

Advantages:

Raw material advantage	<ul style="list-style-type: none"> *Fresh Raw materials are processed quickly from place of origin to factory to ensure freshness. *Nature Have cooperative base in raw material the place of origin. *Traceable Specially-assigned professional management. Strictly control the quality of raw materials
Technology advantage	<ul style="list-style-type: none"> *Low temperature cycle stage extraction Analyzed the advantages and disadvantages of various extraction methods, combined with the characteristics of raw materials, geographical advantages and equipment output value and other factors, through repeated scientific experiments, finally confirmed that low temperature sub-extraction method has become the bottom extraction technology of all kinds of concentrate. *Break through technical difficulties The extraction process was completed under the condition of low temperature, and the good components were better preserved in the extraction process, which overcame the corruption of the extraction solution and the dissolution of impurities in the traditional extraction process. Breaking through the technical problems of insufficient head fragrance of flower concentrates, turbidity of tea concentrates, obvious bitter and astringent flavour of coffee concentrates, oxidation of citrus concentrates.
Products advantages	<ul style="list-style-type: none"> * Liquid form, storage at room temperature * Anti-corrosion, anti-oxidation, stability * High level of flavor reproduction * Customized services
