Product Description

Product Description:

Lemon flavor is a flavor made from lemons, extracted or synthesized, with a distinct lemon scent. Its unique freshness and sourness make it widely used in many fields, including food, beverages, personal care, cleaning products, and fragrance products. Lemon flavor can be natural, derived from essential oils in lemon peel or pulp, or it can be synthesized to simulate the aroma of lemon.

The main components of lemon flavor include:

Limonene: a volatile component with citrus aroma, which is the main component of lemon flavor.

Citric Acid: a natural organic acid in lemons. Although the flavor itself does not contain citric acid, its acidic taste can enhance the flavor of lemon flavor.

Aromatic compounds: such as linalool, citral, etc., these substances give lemon flavor a fresh and sweet and sour taste.

Other volatile compounds: such as citric acid (Citral) and some volatile oils, provide a complex aroma layer for lemon flavor.

Features:

The characteristics of lemon flavor are as follows:

1. Fresh and bright aroma

Lemon flavor has a typical citrus aroma, which is fresh, bright, sour and has a strong lemon fruit aroma. It can instantly enhance the sensory experience of the product, giving people a pleasant and refreshing feeling, and is often used to add vitality and vigor to various products.

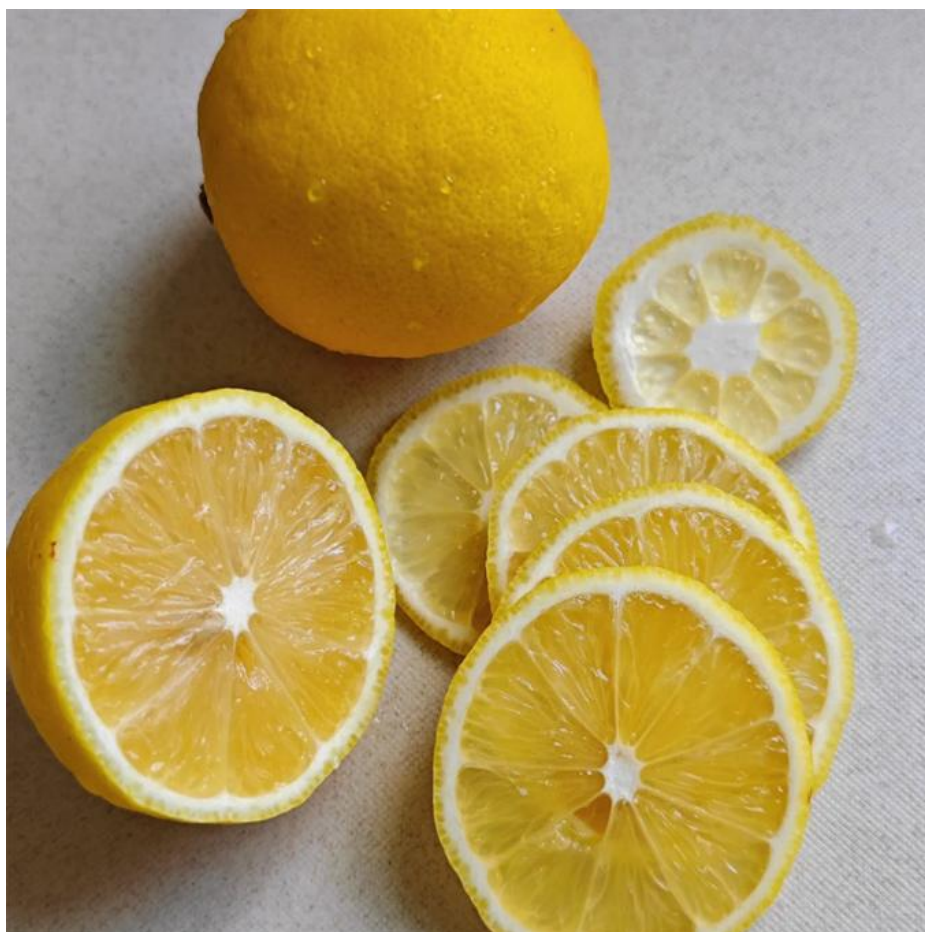

2. Two forms of natural and synthetic

Natural lemon flavor: derived from the essential oil in lemon peel, the lemon aroma is extracted through extraction and distillation. Natural flavors are usually rich in volatile components such as natural limonene.

Artificially synthesized lemon flavor: imitates the aroma of lemon through synthetic chemical methods, usually at a lower cost, but the **aroma may not be as rich and complex as natural essential oils.**

3. Highly concentrated

Lemon flavor is generally in liquid form and in a highly concentrated form. Due to its strong aroma, even a small amount can effectively convey the fresh taste of lemon. Therefore, the amount needs to be controlled when using it.

Technical Parameters:

Testing Items	Standard Requirements	Testing Result	Conclusion
Character	yellow liquid, with the aroma of Lemon Fragrance	Qualified	Confirmed
Density	0.9380-0.9500	0.9410	Confirmed
Refractive index (20°C)	1.4800-1.5000	1.4856	Confirmed
Solubility	The ml sample is soluble in 3ml volume fraction of 90% ethanol, a clear and transparent liquid	Qualified	Confirmed

Applications:

Lemon essence is widely used in various cosmetics and personal care products due to its fresh and refreshing properties. It can enhance the fragrance effect and bring pleasure to users.

Perfume: Lemon essence is often used as the top note (top fragrance) ingredient in perfume, bringing a fresh and bright citrus scent, suitable for summer use. It is often mixed with other floral, fruity, woody and other fragrances to create a unique fragrance.

Shower gel and shampoo: Lemon essence can add a refreshing fragrance to personal care products such as shower gel, shampoo, and conditioner, helping to refresh and relieve stress, bringing a sense of cleanliness and relaxation.

Skin care products: Lemon essence is also added to some skin care products such as toners, face creams, and hand creams, which can not only enhance the fragrance, but also bring a refreshing feeling to the skin.

Hand soap and hand cream: Lemon essence can bring a fresh and natural fragrance to these products, while also playing a cleaning and moisturizing role.

Support and Services:

Our Body Wash Fragrances are formulated with high-quality ingredients to cleanse and nourish your skin while providing a luxurious scent experience. If you have any technical issues or questions about our product, our dedicated team of experts is here to provide you with professional support and assistance.

We also offer a range of services to enhance your experience with our Body Wash Fragrances, including:

[Customized scent selection](#)

[Personalized product recommendations](#)

[Usage tips and instructions](#)

[Product samples for testing](#)
