### Product Description

#### Product Description:

Red rose essence is a natural or synthetic fragrance derived from red rose petals. It has a unique and layered aroma and is widely used in various high-end fragrance products, cosmetics, toiletries, home fragrances and other fields. The persistence, intensity and deep floral characteristics of its aroma often remind people of a romantic, elegant and luxurious atmosphere. The following is a more detailed introduction to red rose essence:

##### 1. Fragrance characteristics

The aroma of red rose essence is rich in layers and usually presents the following sensory characteristics:

**Top note:** When first smelled, red rose essence often has a fresh, slightly fruity green leaf scent, just like the fragrance of newly opened rose petals in the morning light. This part of the fragrance is light and fresh, giving people a natural and comfortable feeling.

**Middle note:** The middle note is the core part of the red rose essence, and the aroma of the rose begins to appear, sweet and rich. The aroma at this time is often very warm and strong, showing the unique sweetness, elegance and depth of red roses. People often describe this layer of fragrance as "classic floral fragrance", which lingers in the air for a long time, making people feel warm and romantic.

**Base notes:** The base notes of rose essence are usually more complex, with some subtle woody scents, or soft musk, balsam or amber. These base notes can add depth and persistence to the fragrance, making the fragrance not appear too single, but more multi-layered and lasting.

#### Features:

**Purely natural:** Most high-quality red rose essences use natural rose flower extracts and undergo exquisite refining processes to ensure the purity and richness of the aroma.

**High concentration:** Red rose essence generally has a high aroma concentration and can have a significant fragrance effect when used in small amounts.

**Persistence:** High-quality red rose fragrance can provide a longer fragrance release, making the fragrance long-lasting and not easy to fade away.

**Natural red rose essence:** Extracted from natural rose flowers, the aroma is more intense and layered. Due to its high extraction costs and limited production, it is generally more expensive. Natural red rose essence not only has fragrance, but is also rich in some natural plant ingredients, which has a certain skin care effect.

**Synthetic red rose fragrance:** Synthetic fragrance uses artificial fragrance molecules to imitate the aroma of red roses. It can usually replicate the floral fragrance of red roses, but may lack some of the delicate and complex layers of natural fragrance. Synthetic flavors are relatively cheap and can be produced on a large scale, and are often used in the production of bulk products.

#### Technical Parameters:

Testing Items	Standard Requirements	Testing Result	Conclusion
Character	yellow liquid, with the aroma of sweet scented Red Rose	Qualified	Confirmed
Density	0.9380-0.9500	0.9410	Confirmed
Refractive index (20°C)	1.4800-1.5000	1.4856	Confirmed
Solubility	The 1ml sample is soluble in 3ml volume fraction of 90% ethanol, a clear and transparent liquid	Qualified	Confirmed

### Applications:

#### (1) Perfume and personal care products

**Perfume:** Red rose essence is one of the foundations of many classic perfumes, especially in women's perfumes, where red rose is often used as the main or core fragrance. Due to its romantic and elegant aroma, red rose perfume is usually suitable for formal occasions, dinner parties or romantic dates.

**Skin care products:** Red rose essence is commonly found in skin care products such as creams, serums, and masks. Its fragrance can bring a pleasant sensory experience to users, and some products also achieve skin care effects through the antioxidant and moisturizing properties of red rose essential oil.

**Hair care products:** Red rose essence can be used as a fragrance additive in shampoo, conditioner, and hair oil to bring a lasting fragrance to the hair, while also moisturizing the hair through its natural plant ingredients.

#### (2) Home fragrance products

**Aromatherapy and candles:** Red rose essence is often used in aromatherapy lamps and aromatherapy candles, which can bring a warm and romantic atmosphere to the interior space and are suitable for use in bedrooms, living rooms or bathrooms. The aroma of red roses helps to relax the body and mind and relieve fatigue.

**Air freshener:** This fragrance is often used in air fresheners to bring a fresh and pleasant floral scent, help remove odors in the air, and add a romantic atmosphere to the room.

#### (3) Emotional therapy and aromatherapy

Red rose fragrance is widely used in aromatherapy, especially for relieving emotional stress, anxiety and tension. Its aroma helps soothe nerves, improve mood, and even help increase self-confidence and expression of romantic emotions.

### Support and Services:

Our Perfume Fragrances product technical support and services include:

- Assistance with product selection and recommendations based on customer needs
- Guidance on usage and application of the product
- Troubleshooting any issues or concerns related to the product
- Providing information on proper storage and handling of the product
- Offering product training and education to customers and distributors

### **Packing and Shipping:**

#### **Product Packaging:**

Our perfume fragrances come in a beautifully designed glass bottle with a secure cap. The bottle is then placed in a sturdy cardboard box with a foam padding to ensure safe and secure delivery.

#### **Shipping:**

We offer free standard shipping for all orders within the United States. Orders are typically processed and shipped within 1-2 business days. We also offer expedited shipping options for an additional fee.
