Feature

With this fragrance oil by Natures Garden, imagine, a man who is Confident, Trustworthy, Successful, Romantic, Sexy, Sensual, Daring, and has a great sense of humor. Would you call that...The Perfect Man? We wanted to create a fragrance that would represent The Perfect Man in every way. After smelling many famous male fragrances on the market, Plant fragrance made us smile! We quickly had our perfumist work on creating a fragrance that was similar to Blue Chanel, but different enough to call it our own: The Perfect Man. Using only the finest, expensive fragrance notes, our perfumist created what we consider to be the best male fragrance we carry at Natures Garden! The Perfect Man fragrance begins with fresh, daring notes of Japanese grapefruit, bergamot, and lemon; followed by middle notes of peppercorn, ginger, jasmine, aquatic marine notes, and a hint of peppermint; sitting on expensive base notes of natural patchouli, cedar, vetiver, labdanum, and frankincense. Now this is The Perfect Man! ANG Original Scent!

Product descriptions

Inspired by nature and its raw materials, this scent is similar to Dior perfumer François Demachy, it is earthy and woody. Warm notes of bergamot, pepper, and amberwood take cues from a desert landscape—but can still be worn in the dead of winter, thanks to its refined, non-overpowering finish.

Our testing notes should never take the place of your own personal testing. Always test fragrance in all applications. We do not take responsibility for our test results differing from your test results. Natures Garden is not responsible for any finished products made with our raw ingredients. Cold process soap testing was done by our staff using strict controls. Stick blenders can help to incorporate fragrance back into the soap in the event that it rises during the mixing process. Soaping at room temperature can help to reduce the likelihood of accelerated trace. Fragrances containing vanilla ingredients may discolor soap. Vanilla White Color stabilizer may help prevent discoloration due to vanilla. However, there are more than 40 ingredients used in fragrance manufacturing that may contribute to discoloration of products.
