## Product Description

Golden Throat Toothpaste Fragrance 5 Liter/bottle package LDZ-PL90004

### Product Descriptions:

Toothpaste is a complex mixture, usually composed of abrasives (calcium carbonate, calcium hydrogen phosphate, calcium pyrophosphate, silicon dioxide, aluminum hydroxide, etc.), humectants (glycerin, sorbitol, xylitol, polyethylene glycol and water, etc.), surfactants (sodium lauryl sulfate, soap, etc.), thickeners (hydroxyethyl cellulose, xanthan gum, guar gum, carrageenan, etc.), sweeteners (glycerin, sodium cyclohexane sulfonate, sodium saccharin, etc.), preservatives (potassium sorbate, sodium benzoate, etc.), active additives (chlorophyll, fluoride, etc.) and pigments, flavors, etc.

The flavors used in toothpaste are mainly mints, which are divided into menthol (menthol), mint oil and other substances, as well as the flavors derived from them. In addition, fruit flavors can also be used, such as citrus flavor, banana flavor, strawberry flavor, etc. At present, these flavors all have a strong mint smell.

The flavor of Golden throat toothpaste is mainly for providing a cool and refreshing experience that relieves throat discomfort.

## Golden Throat Toothpaste Fragrance

LDZ-PL90004

### Product Feature:

Golden Throat Toothpaste Fragrance Main components	
Attribute Name	Attribute Value
Menthol:	A core coolant that instantly cools the throat and relieves dryness or discomfort.
Peppermint Oil:	Enhances the effect of freshening breath and may contain a small amount of natural antibacterial ingredients.
Eucalyptus Oil:	It has anti-inflammatory and analgesic effects, and is in the same vein as the eucalyptus ingredient in Golden throat lozenges. It may be added to soothe the throat.
Methyl Salicylate	It has a cooling effect similar to "borneol" and is often used in throat care products, but be aware that high concentrations may irritate the mucous membrane.
Eugenol	Extracted from cloves, it provides a mild spicy feeling and assists in sterilization. It is commonly found in traditional Chinese medicine toothpaste.
Citrus or licorice flavor	Balances the stimulating feeling of mint and adds sweetness (such as limonene or glycyrrhizic acid).

### Advantages:

Functional effects of flavors

- . Instant cooling sensation: Menthol and eucalyptus oil stimulate the cold receptors in the mouth, creating a psychological suggestion of "soothing the throat".
- . Masking the smell of medicine: If it contains Chinese herbal extracts (such as honeysuckle and platycodon), the flavor can neutralize the bitter taste.
- . Fresh breath: The combination of mint and eucalyptus can temporarily suppress bad breath.

The Toothpaste Fragrance Essence Oil is designed specifically for toothpaste making, giving your toothpaste the refreshing Tooth Cleanse Scent that everyone loves. The scent is infused with the aroma of Lightness Mint, cool feeling of the throat, providing a natural and soothing scent that will leave your mouth feeling fresh and clean.

### Applications:

The Plant Fragrance company, a daily professional manufacturer of fragrance. Our fragrance products are widely used in daily life and are closely related to our lives. We can find or feel them in the Fine Fragrance, Household Fragrance, Personal Care Fragrance, and Allocate Essential Oils, etc. Take an example, the Personal Care Fragrance, including the oral care, hair and body care. People use the following items everyday: shampoos, bath soap, body washing, body lotion, body cream, toothpaste and other cosmetic products. The sensorial and olfactory opportunities that fragrances offer to personal care products are endless.

#### Support and Services:

Plant Flavour& Fragrances has a R&D team consisting several PH.Ds and senior engineers, and has established associated laboratory with many universities and colleges. Meanwhile the company integrates global technology, information and resource to keep advantage of our products and services by continuous innovation on natural ingredients.

Our Fragrance Oils are made with high-quality ingredients, designed to provide long-lasting scent in various applications including toothpaste, foods, perfume, candles, soaps, and diffusers. Our technical team is available to provide support and guidance on the proper usage and handling of our products to ensure optimal results.
