- Highlight: **1kg Blue Floral Mint Fragrance Toothpaste, Blue Floral Mint Fragrance Toothpaste**

Product Description

Blue Floral Mint Fragrance For toothpaste LDZ-PL90001

Product Descriptions:

Peppermint oil may help relieve symptoms of irritable bowel syndrome and other conditions affecting the digestive system. Different forms may also help relieve pain and benefit your skin. The research suggests there are health benefits from the peppermint oil.

As an important food additive, mint flavor has been widely used in food, beverage and daily chemical fields in recent years. Its unique cooling feeling and fresh aroma make it an ideal choice for enhancing product flavor and texture.

Product Features:

Basic characteristics of mint flavor	
Strong cooling feeling	Mint flavor can simulate the cooling feeling of natural mint, giving people a refreshing experience
Fresh aroma	Mint flavor has a unique fresh aroma that can enhance the overall flavor of the product.
High stability	In harsh environments such as high temperature and high humidity, mint flavor can still maintain its aroma and stability.
Good solubility	Mint flavor is easily soluble in water and other solvents, making it easy to evenly distribute in various products.
High safety	After strict safety evaluation, mint flavor meets international food safety standards.

Product Advantages:

Our 100% Natural, Plant-Based Fragrance Oils are produced using only pure natural essential oils and extracts, as well as aromatic isolates derived solely from natural, raw botanical ingredients. These are 100% concentrated, 'uncut' natural fragrance oils free of any diluents and solvents. All of our Natural Fragrance Oils are fully compliant with the strictest IFRA (International Fragrance Association) and RIFM (Research Institute for Fragrance Materials) regulations, and are cruelty-free, vegan and paraben-free. Our Plant-Based Natural Fragrance Oils can be used in a wide range of personal care formulations, soap making and candle making applications where cost-effective fragrance is required and synthetic ingredients are not desired.

Application:

Mint flavor usage in daily chemical products	
Toothpaste and oral care products	In toothpaste and oral care products, mint flavor can enhance the coolness and fresh aroma of the product and enhance the consumer's experience. For example, in mint toothpaste, mouthwash and oral spray, adding an appropriate amount of mint flavor can make the product have a more natural and rich mint flavor.
Soap and detergent	In soap and detergent, mint flavor can be used as a flavor enhancer. For example, in lotus soap, mint dishwashing liquid and mint hand washing wave, adding an appropriate amount of mint flavor can make the product have a more natural and rich mint flavor, enhancing the consumer's experience.
Cosmetics	In cosmetics, mint flavor is also widely used. For example, in mint perfume, mint shower gel and mint skin cream, adding an appropriate amount of lotus flavor can make the product have a richer aroma and flavor, enhancing the consumer's experience.

Customization:

Plant Flavour& Fragrances has a R&D team consisting several PH.Ds and senior engineers, and has established associated laboratory with many universities and colleges. Meanwhile the company integrates global technology, information and resource to keep advantage of our products and services by continuous innovation on natural ingredients.
