## Product Description

Peach Fragrance Base 20KGS/Jerry can LDZ-PL90012

### Product Descriptions:

Flavoring / Fragrance Base, also called base flavoring agent or main flavoring agent, it is the basis of the main fragrance of the essence, the main body of the essence formula, and the largest amount. Flavoring base is not directly used in flavoring products, but only as the main aroma component of the essence, so the flavoring base is the basis for preparing the essence, so it is called the semi-finished product of the essence. At present, the flavoring base has been listed as a product for the production of essences. Such as strawberry flavoring base, mango flavoring base, pineapple flavoring base, longan flavoring base, lychee flavoring base, cream flavoring base, osmanthus flavoring base, watermelon flavoring base, peach flavoring base, green apple flavoring base, etc.

Example to help understand what the relationship between Fragrance and Flavoring base. Fragrance is likened to an assembled car, then the fragrance raw materials refer to the screws, fenders, windshields, etc. used to assemble the car. The fragrance base refers to the entire engine, the entire frame, the entire chassis, etc. of the car.

## Peach Fragrance Base

LDZ-PL90012

### Product Feature:

As we known above mentioned, the flavoring base is a main and important component of a fragrance essence oils. Our Peach Flavoring base is for making the essence oils. Peach essence has a sweet and smooth peach aroma. It has the aroma of fresh half-ripe peaches, mixed with natural sweetness, warm, fresh and lasting, refreshing, giving the drink a refined, elegant and elegant temperament. It is cleverly mixed with juice and tea base to form a unique and refreshing tea fruit aroma, which sets off the sweet and refreshing flavor of the drink. Peach essence also has market advantages such as high temperature resistance, freezing resistance, more convenient use, high concentration, more aromatic substances, less addition, and lower use costs to enhance its competitiveness.

Gamma-decanoic acid	10
2-methylbutyric acid	5
Pure camphor leaf oil	5
Benzyl alcohol	10
Benzyl cinnamate	3

**Applications:**

The safety guarantee of any food flavor is based on its product quality and usage. Food flavor manufacturers, sellers and users must strictly guarantee the quality of food flavors. Users must ensure that these food flavors are used within the permitted usage range. In fact, people do not

have to worry about the harm to food safety caused by excessive use of flavors, because food flavors have the characteristic of "self-limitation" when used, that is, any food flavor will have an unpleasant smell when the usage exceeds a certain range, and users have to reduce its usage to an appropriate range, and adding more will have the opposite effect. Most of the food fragrance bases can also be used as environmental fragrances. Most of the food fragrance bases have poor fragrance retention, so vector fixatives can be added to them.

#### Support and Services:

Where there are fragrance, there are plant flavor.  
The reason why our enterprise develops so rapidly is that we gradually meet the demands of our customer by improving the quality of their products and shortening their good deliver time. In case of urgent demands of customers, we adopt our contingency measures to help our customers solve the problem in time.

Meantime, we offer Training and Education on fragrance formulation and usage for the customized who interested in our fragrance.

Our Fragrance Oil product comes with comprehensive technical support and services to ensure that our customers have a seamless experience.

We offer:

- 1.Product usage instructions and guidance;
2. Expert advice on fragrance selection;
3. Technical support for any issues or concerns;
4. Product customization services;
- 5.Assistance with regulatory compliance.
