Product Description

Wintergreen Mint Fragrance For Toothpaste 2.5Litre/ bottle LDZ-PL90014

Product Descriptions:

Mint is a spice with a long history. It is the main source of the cool taste of toothpaste. It is mainly divided into Asian mint and peppermint. Wintergreen mint toothpaste flavor is a compound flavor designed specifically for oral care products. It combines the medicinal coolness of wintergreen oil with the classic freshness of mint. It is often used in toothpastes that emphasize the effects of "intense refreshing" or "soothing gums".

Product Feature:

In medicine, mint is widely used in medicines such as wind-repellent, antiseptic, anti-inflammatory, analgesic, antipruritic, and stomachic. The whole plant is used as medicine, which is pungent and cool. It belongs to the lung and liver meridians, and has the effects of dispersing wind and heat, clearing the throat, clearing rash and detoxifying, soothing the liver and relieving depression, and relieving itching. It is suitable for colds and fever, headaches, sore throats, no sweat, wind-fire red eyes, rashes, itchy skin, hernia pain, diarrhea, and scrofula. It has a slight analgesic effect when used externally.

Mint has a strong bactericidal and antibacterial effect. In daily life, drinking peppermint oil often can prevent viral colds and oral diseases and make your breath fresh. Gargling with mint tea can prevent bad breath. Steaming your face with mint tea mist has the effect of shrinking pores. The main ingredients of mint flavor are menthol and peppermint oil, combined with other flavor regulating ingredients. It is mainly used in oral care products that emphasize freshness and whitening.

Wintergreen Mint LDZ-PL90014

Technical Parameters:

LDZ-PL90014 Wintergreen Mint Fragrance Mainly components	
Ingredients	Percentage(%)
Methyl salicylate	40
Spearmint oil	15
Cinnamon oil	11
Peppermint oil	30
Fennel oil	4

Advantage:

Attribute Name	Attribute Benefit
Wintergreen oil (methyl salicylate):	provides a deep, lasting cooling sensation with a slightly medicinal aroma
Peppermint (menthol/peppermint oil):	provides an instant burst of cooling and a fresh feeling in the mouth.
Long-lasting cooling :	Wintergreen oil releases its cooling effect more slowly than mint, which prolongs the refreshing experience after use.
Psychological suggestion:	The medicinal fragrance (wintergreen + eucalyptus) easily reminds people of "medical-grade" care, which is suitable for anti-sensitive toothpaste.
Synergistic antibacterial effect:	Wintergreen oil (methyl salicylate) and menthol both have slight antibacterial effects.

Support and Service:

The Toothpaste Perfume product is designed to provide a refreshing and long-lasting fragrance while also effectively cleaning and protecting your teeth. Our technical support team is available to assist with any questions or concerns you may have regarding the use or performance of the product. Additionally, we offer a range of services to ensure you get the most out of your Toothpaste Perfume, including:

- [Product usage tips and recommendations](#)
