Product Description

Free Samples Green Apple Fragrance For Laundry Detergent LDZ-PL50039

Product Description:

Apple flavor is one of the important fruity aromas, and is a fruity flavor with a green and sweet aroma. Traditional apple flavor uses rose aroma to simulate its sweet aroma, uses benzyl acetate, linalool and other ingredients to set off its green aroma, uses isopentyl isovalerate and ethyl isovalerate as the characteristic fruity aroma of apples, and is supplemented with ethyl acetate, isopentyl butyrate, isopentyl acetate, ethyl butyrate and citral to enrich the fruity aroma. Apple flavor is widely used in beverages, candies, jellies, cakes, chewing gums and other foods, and has a long history. Due to the very complex natural apple flavor components and the continuous emergence of new apple varieties, there are many types of apple flavor formulas.

Product Feature:

Green apple flavor is usually a colorless or light-colored transparent liquid with a distinct green apple aroma. This aroma can be well mixed with food ingredients, giving the food a distinct green apple flavor. At the same time, green apple flavor also has the characteristics of good stability and strong solubility, and can maintain its aroma and flavor under different food processing and storage conditions.

Green apple flavor is a food additive that simulates the flavor of green apples. It has a fresh and natural apple aroma and a lasting fragrance. It is often used to add the aroma and taste of green apples to foods, beverages, daily chemical products, etc., to enhance the taste and quality of the products. Green apple flavor has been widely used in the food industry and has gradually become one of the condiments that consumers love.

Green Apple Fragrance

LDZ-PL50039

Technical Parameters:

Green apple flavor is mainly composed of natural or synthetic spices, which are processed by specific processes to simulate the unique fresh and sweet aroma of green apples. It usually exists in the form of liquid or powder, has good solubility and stability, can be evenly distributed in different foods, and provide a stable aroma and taste.
