Product Description

Concentrated Rose - Carlotta Fragrance Oils Fragrance Essence 2.5kgs/bottle

LDZ-PL10039

Product Description:

Rose, as one of the most popular flowers in the world, its fragrance occupies an important position in the perfume and fragrance industry. The ratio of rose essence is a key step in perfume making, which directly affects the quality and durability of perfume.

The main ingredients of rose essence include natural rose essential oil, synthetic rose fragrance and auxiliary fragrance. Natural rose essential oil usually comes from Damascus rose (*Rosa damascena*) and Thousand Leaf Rose (*ROSa centifolia*), with a strong rose aroma. Synthetic rose fragrance is obtained by chemical synthesis. Commonly used synthetic fragrances include geraniol (Geraniol), citronello (Citronello auxiliary fragrance is used to enhance or modify the rose aroma, common auxiliary fragrances include citral (Citral), eugenol (Eugenol) and jasmine 1) and phenethyl alcohol (Phenylethyl Alcohol), ketone (Jasmine Ketone).

Product Feature:

Rose Fragrance is a fragrance extracted from natural rose petals or chemically synthesized, with a strong rose scent. Its natural source is mainly fresh rose petals, and rose essential oil is extracted by steam distillation, and then refined to obtain rose fragrance.

The appearance of rose fragrance is usually colorless to light yellow transparent liquid or powder, with a unique rose aroma. It is easily soluble in organic solvents such as ethanol and propylene glycol, and slightly soluble in water. It is stable in neutral and weakly acidic environments, but may decompose in strongly acidic or alkaline environments. In addition, rose fragrance is sensitive to light and heat, and should be avoided from long-term exposure to high temperature and light.

Rose - Carlotta Fragrance

LDZ-PL10039

Technical Parameters:

Vintage Chypre Rose, a blend of fruity, woody and mossy scents, is inspired by the fragrance of 19th century European aristocratic salons.

Core Fragrance Structure of Rose - Carlotta Fragrance Oils		
Fragrance stage	Aroma characteristics	Key raw material(INCI name)
Top Notes	Blackcurrant leaves + citrus	Cassis Absolute,Petitgrain EO
Middle Notes	Centifolia Rose + Honey	Rosa Centifolia EO,Phenethyl Alcohol
Base Notes	Patchouli + Oakmoss + Civet	Patchouli EO,Oakmoss Absolute,Civetone Synthetic

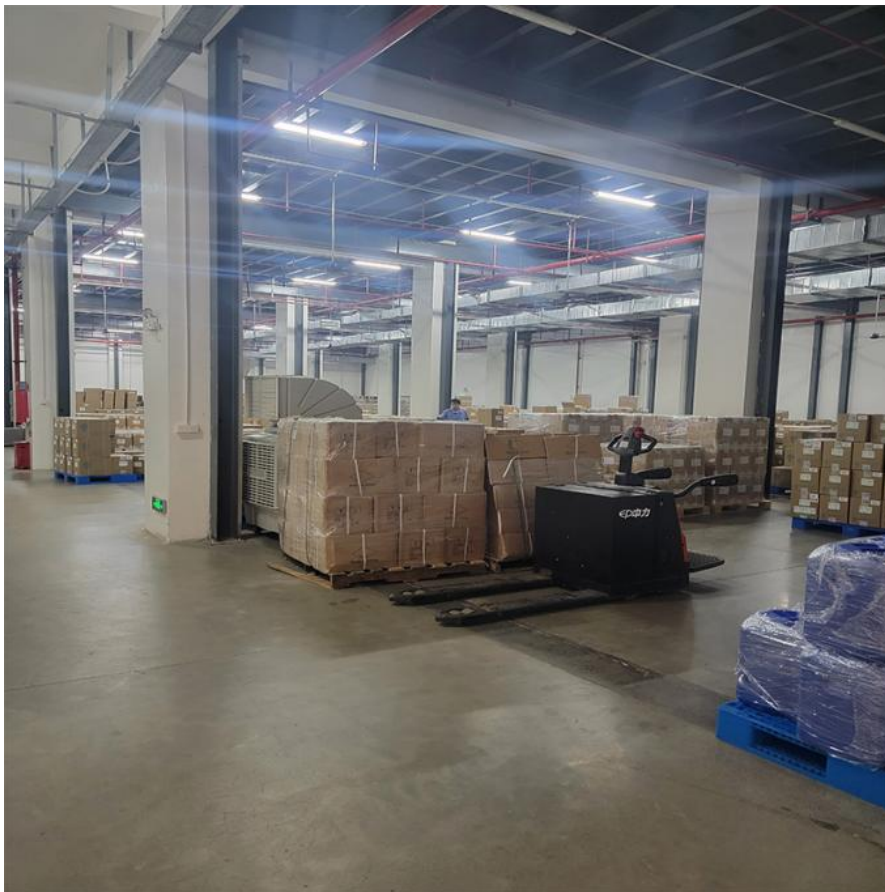

Applications:

Rose essence is widely used in perfume, soap, cosmetics and food industries. In perfume making, rose essence is usually used as the main fragrance ingredient and mixed with other spices to form a unique aroma. In soap and cosmetics, rose essence is used to enhance the aroma and appeal of the product. In the food industry, rose essence is used to make rose syrup, rose drinks and rose cakes, giving food a unique rose aroma.

Perfume field:	Rose essence is one of the indispensable raw materials in perfume manufacturing. It can add elegance and romance to perfume, making it more attractive.
Cosmetics field:	Rose essence is often used to make cosmetics such as creams, lotions, lipsticks, etc., which can not only moisturize and hydrate the skin, but also make the skin emit a charming rose fragrance.
Household products field:	Rose essence can be used to make scented candles, aromatherapy essential oils and other products, adding a warm and romantic atmosphere to the home space.
