Product Description

Raw Liquid Green Tea Fragrance For toothpaste and Oral Care Products

LDZ-PL90043

Product Description:

This Green Tea Fragrance is a specialized aromatic ingredient crafted to impart the refreshing and subtly herbaceous scent of green tea specifically to toothpaste formulations. It presents a departure from traditional minty flavors, offering a milder, more natural, and uniquely appealing sensory experience during oral hygiene routines. The fragrance delivers a clean, fresh, and gently grassy aroma that enhances the act of brushing without being overpowering or artificial.

Product Feature:

Key characteristics include its natural and refreshing green tea scent, its mild and pleasant nature suitable for daily use, good stability within toothpaste formulations, a subtle and clean aromatic profile, and the potential to subtly mask base odors.

The benefits of incorporating this green tea fragrance into toothpaste are multifaceted. It offers a unique selling proposition, attracting consumers seeking alternatives to conventional mint flavors and appealing to those who appreciate natural and wellness-oriented products. The gentler aromatic experience can enhance user satisfaction and contribute to a more pleasant oral care routine. Furthermore, leveraging the positive associations of green tea with health and natural goodness can strengthen brand perception.

Green Tea Fragrance

Technical Parameter:

How does green tea benefit oral health?

Green tea is rich in catechins, antioxidants that have been shown to inhibit the growth of oral bacteria responsible for tooth decay and gum disease. Additionally, green tea has anti-inflammatory properties that could help manage periodontal diseases. Some studies also suggest that green tea could inhibit the growth of oral cancer cells.

Does green tea toothpaste taste like green tea?

Green tea extract can contribute a certain flavor to toothpaste, but it doesn't necessarily make the toothpaste taste like steeped green tea. Flavor masking agents or sweeteners are often used to create a pleasant, palatable taste.

How is the efficacy of green tea maintained in toothpaste?

The efficacy of green tea in toothpaste largely depends on the manufacturing process. Techniques such as microencapsulation can be used to protect the bioactive compounds from degradation, ensuring their stability and efficacy in the final product.

Attribute Name	Description
Appearance	Clear to slightly turbid liquid, may be colorless to light yellow/light green
Odor characteristics	Fresh, clean, slightly herbal green tea aroma, with possible subtle grassy, vegetal or floral notes
Solubility	Easily soluble or dispersible in water and common toothpaste ingredients
Stability	Stable in the pH value (neutral to slightly alkaline) of toothpaste and common ingredients, with no obvious changes in odor or color
Odor intensity	At recommended dosage, it imparts a clear and pleasant green tea aroma to toothpaste
Smell persistence	The smell can last for a certain period of time during brushing
IFRA Standards	Complies with the latest IFRA standards for oral care products
Purity and Composition	Does not contain banned or restricted substances and meets purity requirements

Applications:

Green Tea Fragrance offers toothpaste brands a key differentiator by providing a refreshing, subtly herbaceous alternative to standard mint flavors. This unique scent appeals to consumers seeking a gentler, more natural, and sophisticated oral care experience. By moving beyond the commonplace, brands can attract individuals desiring novelty and a departure from traditional options.

The fragrance leverages the positive associations of green tea with wellness and purity, allowing for the creation of a distinct brand narrative centered on natural and holistic oral care. This unconventional aroma provides a strong marketing point, highlighting innovation and catering to diverse preferences. It enables brands to stand out on shelves and attract consumers actively seeking alternatives, fostering brand recall and loyalty. Embracing Green Tea Fragrance allows toothpaste manufacturers to carve a unique market position and cater to an underserved segment desiring a refreshing and sophisticated brushing experience.

Incorporating green tea into toothpaste can bring substantial benefits, from combating caries-causing bacteria to potentially inhibiting oral cancer cells' growth. However, successful integration requires careful formulation to preserve the bioactive compounds' stability and efficacy, alongside strategic marketing to overcome taste challenges and appeal to consumer demand for natural products. Green tea toothpaste stands as a promising frontier in oral care.

Packing and Shipping:

Packaging:

Our fragrance essence oils come in a stable plastic or iron bottle. The bottle is then carefully placed in a sturdy cardboard box with cushioning material to ensure safe delivery to your doorstep.

Shipping:

We offer fast and reliable shipping for our fragrance oils. After the payment, it'll take 1-3 days for sample order & trial order, and take 3-5 days for bulk order. All orders are carefully packaged to ensure safe delivery. Shipping is available to most countries worldwide, and delivery times may vary depending on location.
