- Fragrance Family: Floral
- Highlight: **High Concentrated Rose Crystal Essence,**

Rose Crystal Fragrance  
 LDZ-PL10044

## Product Description

### High Concentrated Rose Crystal Essence For Perfume Making With Free Sample

LDZ-PL10044

#### Product Description:

"Rose Crystal Essence" is a super-concentrated rose essence specially created for high-end perfume making. The key difference between it and ordinary rose essential oil is its extreme purity and multi-dimensional rose aroma presentation. This product is not a simple sweet floral scent, but strives to capture all the subtleties of the rose from the freshness of the first bloom, to the sweetness of the heart, to the slight astringency of the green leaves, showing a crystal-clear and rich rose scent.

Its core feature is its ultra-high concentration and purity, which means that a very small amount can bring a significant and lasting rose aroma without introducing impurities or affecting the overall color of the perfume. It aims to provide the closest to the real, unmodified rose scent, as if condensing the soul of fresh rose petals into a drop.

Compared with other rose fragrance raw materials, "Rose Crystal Essence" pays more attention to the fineness and complexity of the aroma, which can bring a deeper and more personalized rose experience to perfume works. Whether it is a single rose-themed perfume or a highlight of a complex floral, chypre or oriental fragrance, it can give the work a pure, bright and lasting rose core, making it an ideal choice for perfumers who pursue the ultimate rose fragrance and high-quality perfume formulas. In short, it represents the ultimate embodiment of the purity, concentration and multi-dimensionality of rose fragrance materials.

#### Product Feature:

"Rose Crystal Essence" is an ultra-pure, highly concentrated rose essence. Its core difference lies in the extreme refinement and multi-dimensional presentation of rose aroma. It does not only provide a single-dimensional rose sweetness, but strives to capture the rose from the dewy feeling of the petals in the morning, to the honey in the afternoon sun, to the velvety mellowness at night, showing a crystal-like pure and layered rose scent. Compared with traditional rose essential oils or absolutes, "Rose Crystal Essence" removes impurities and waxes through advanced technology, bringing a cleaner and more transparent olfactory experience without interfering with the overall tone of the perfume. Its ultra-high concentration means that only a small amount is needed to give the perfume a strong vitality and ensure the durability and penetration of the rose aroma. The uniqueness of this essence lies in its complete capture of the rose aroma spectrum, whether it is light green, gentle powdery texture, or warm spicy fragrance, it can be found in it, giving perfumers a wider creative space to create more personalized and in-depth rose-themed perfumes, or provide delicate and non-overpowering rose embellishments for other fragrances. In short, "Rose Crystal Essence" represents the ultimate expression of the purity, concentration and multi-dimensionality of rose fragrance ingredients, and is an ideal choice for those pursuing top-level rose fragrance and differentiated perfume works.

## Rose Crystal Fragrance

### LDZ-PL10044

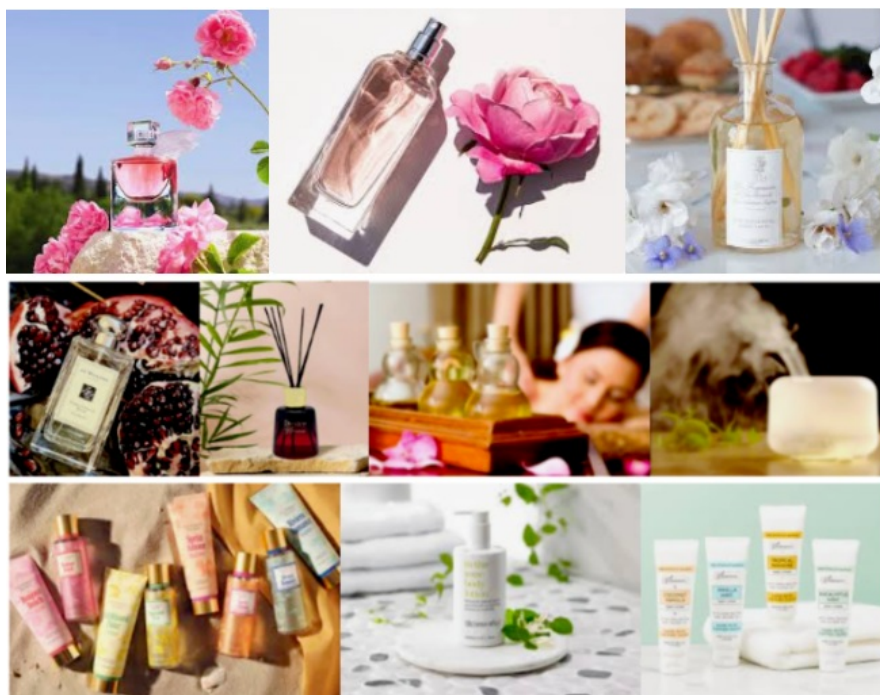

#### Technical Parameter:

Rose Crystal Essence - Differentiated Technical Parameters	
Form	Unique crystalline form: Usually white or off-white crystalline powder or solid, not a traditional liquid essential oil or absolute. Some may be pre-dissolved clear liquid, but the core is a crystalline component.
	Differentiated advantages: Improve the purity of raw materials, facilitate accurate weighing and mixing, and reduce the introduction of impurities
Odor characteristics	High-purity rose core: Provides highly concentrated, pure and full rose aroma, often with a powdery and fatty aroma, delicately showing the multi-layered fragrance of roses, not a single linear rose fragrance.
	Differentiation: A more realistic and richer rose olfactory experience, with strong plasticity, and the ability to create more complex rose-themed perfumes.
Solubility	Specific Solubility Properties: Good solubility in fragrance oils, may be slower to dissolve in cold ethanol (for solid forms)
	Differentiated advantages: The appropriate dissolution method needs to be selected according to the form, but the stability after dissolution is generally good.
Use concentration	Very low dosage and high efficiency: The recommended dosage is usually low (0.1% to several percentages) to bring significant results.

## FUNCTIONS & APPLICATIONS

"Rose Crystal Essence" has a unique and extensive application value in the field of perfume making. Its core difference lies in its extreme purity and the presentation of multi-dimensional rose fragrance, which makes it surpass the limitations of traditional rose fragrance raw materials. First, it is very suitable for creating high-end single-flower rose perfumes, which can delicately show the complete fragrance change of roses from budding to blooming, rather than just a single sweetness. Secondly, as an ideal choice for enhancing complex floral notes, its purity will not dominate the main fragrance, and it can be harmoniously interwoven with other floral notes to add a delicate and authentic rose scent. More importantly, it can inject a romantic and lasting rose core into various fragrance structures, whether it is a classic chypre, a warm oriental, or a modern fruity or woody note, it can be more layered and emotionally deep. Perfumers can use its pure characteristics to innovate the interpretation of modern rose fragrance and collide with unexpected fragrances to create unique sparks. The high concentration and excellent fragrance retention of "Rose Crystal Essence" ensure the durability and diffusion of rose fragrance in perfumes. For perfumers who pursue naturalness and transparency, it can bring a purer and more natural rose fragrance effect. Its excellent quality also directly enhances the overall value and sophistication of perfume, especially for niche and independent perfume brands, as well as the field of perfume education. In short, "Rose Crystal Essence" is not only a rose fragrance raw material, but also a key element to improve the quality of perfume, expand the boundaries of creation, and achieve differentiated expression. With its pure, rich and multi-dimensional characteristics, it enables perfumers to create rose fragrance works with more depth, personality and memorable points.

### Support and Services:

We definitely have the fragrance essence oils you need!

The Plant Flavours & Fragrance company has a R&D team consisting several PH.Ds and senior engineers, and has established associated laboratory with many universities and college. Meanwhile the company integrates global technology, information and resource to keep advantage of our products and services by continuous innovation on natural ingredients. The company has always been closed to assist customers to improve the aroma of products and structure of the quality and reduce production costs, tailored to customers, to meet the aroma needs of different daily necessities, we are one of the best enterprises of cost and services in the industry.
