Product Description

Banana Fragrance Essence With Free Sample For Diffuser Reed Sticks Scented Candles

LDZ-PL30037

Product Description:

"Banana Fragrance Essence" is a highly concentrated fragrance oil designed for diffusers and reed sticks, designed to bring the sweet, mellow, and even slightly tropical scent of ripe bananas into indoor spaces. Its core feature is the highly restored real banana fragrance. Unlike the chemical banana fragrance that may exist on the market, this product strives to capture the natural sweetness and attractive aroma of fresh bananas, bringing a more real and comfortable olfactory experience.

As an "essence", its high concentration means that the dosage is экономичный, and only a small amount is needed to effectively diffuse the fragrance, whether it is diffused through the water mist of the aromatherapy machine or with the natural evaporation of the reed, it can release a pleasant aroma for a long time. It has a wide range of application scenarios, and can be used in home environments to create a warm and pleasant atmosphere; it can also be used in commercial places, such as cafes or children's stores, to add a relaxed and lively atmosphere.

Product Feature:

Authentic and Realistic Banana Scent: This is its most prominent feature. It aims to capture the true, sweet, and often creamy aroma of ripe bananas, avoiding artificial or candy-like notes. This realism is a significant draw for users seeking a genuine fruit fragrance. Compared with other fruity fragrances, the uniqueness of "Banana Fragrance Essence" lies in its pure and direct banana theme, which avoids the complex mixture with other fruits or flowers, and highlights the unique sweetness of banana itself. This single and concentrated fragrance is easier to identify and remember, and can create a unique and pleasant space atmosphere. For consumers who love bananas or pursue simple and pure fruity fragrances, this fragrance essence is undoubtedly an ideal choice. It stands out from many fragrance products with its high sense of reality and focused banana theme, bringing direct and pure banana fragrance enjoyment.

Technical Parameter:

This banana fragrance essence is designed for volatilization in aromatherapy machines and rattans. Its technical parameters demonstrate its excellent aroma authenticity and diffusion efficiency. In terms of appearance, the clear liquid indicates its high purity. The core aroma feature is the realistic restoration of the ripe banana fragrance. Different from the cheap or artificial banana flavor commonly seen on the market, it captures the unique mellow sweetness of bananas and the tropical charm of a slight milky aroma, bringing a more natural and immersive olfactory experience.

Safety is another highlight. The flash point above 60°C ensures the safety of home use and meets industry safety standards. In terms of physical parameters such as specific gravity and refractive index, its precise values reflect the high consistency and quality stability between product batches, avoiding the problem of uneven fragrance or poor diffusion.

More importantly, for aromatherapy applications, the essence performs well in aroma intensity and fragrance retention time. Whether it is cold diffusion (rattan) or hot diffusion (aromatherapy machine), it can efficiently and persistently spread the fragrance to the entire space, providing a stable and uniform fragrance experience. This is different from some products that evaporate too quickly or do not last long enough. Its good oil solubility and stability also ensure that it can be perfectly blended in different base liquids, and it is not easy to separate or deteriorate, providing a consistent and satisfactory fragrance effect. Overall, this banana fragrance essence stands out among similar products with its ultimate restoration of the natural banana flavor, optimized diffusion performance and strict safety.
