## Product Description

### 100% Pure Coconut & Vanilla Fragrance For Diffuser Reed Sticks Scented Candles Free Sample

LDZ-PL30967

#### Product Description:

Our Coconut & Vanilla Reed Diffuser Essence goes beyond traditional fragrances to create a tropical luxury haven for you with upgraded senses. This is not just a scent, but also the ultimate pursuit of quality of life and the perfect interpretation of exoticism. It is not a simple superposition of coconut and vanilla, but a precise blend of fresh sea breeze coconut top notes and mellow and warm bourbon vanilla with caramel aftertaste. This multi-layered fragrance can instantly take you away from the hustle and bustle of daily life, and feel the comfort of stepping on the fine sand with bare feet and the breeze. The fragrance is more advanced and narrative.

#### Product Feature:

High-quality essential oil raw materials are used, and professional proportioning and refining are carried out to ensure the high purity and excellent stability of the essence. This means that the fragrance is not easy to decompose and deteriorate during the diffusion process, and can continue to release its original charm without the phenomenon of "over-flavor and weak aftertaste".

The carefully formulated unique fragrance combines the rich and sweet coconut aroma, bringing a tropical island-like relaxation and sunshine; at the same time, the warm and soft sweetness of vanilla is cleverly integrated, adding creamy luxury and depth. This combination is not only refreshing and pleasant, but also more layered and healing, and can instantly create a warm and comfortable atmosphere.

## Coconut & Vanilla Fragrance

**Technical Parameter:**

Coconut & Vanilla Diffuser Fragrance is a high-quality fragrance product designed for versatile diffusion needs, with technical parameters designed to ensure a superior aroma experience, wide device compatibility and strict safety standards.

Core technical parameters:	
Unique complex fragrance	The core is a complex fragrance of mellow coconut and soft vanilla, which is usually subdivided into top, middle and base notes, such as fresh coconut water or tropical fruits as top notes, creamy coconut milk and Madagascar vanilla beans as middle notes, and amber, musk or caramel as base notes, ensuring that the fragrance is layered and deep, rather than single and flat.
High purity and stability	The fragrance is carefully mixed with high-purity aromatic compounds and natural extracts. The concentration of the fragrance is usually between 15% and 30%, which ensures that the fragrance is not easy to deteriorate during the diffusion process and can maintain its original charm for a long time. Its flash point has been strictly tested to ensure safety under normal use conditions.
Wide compatibility	The design takes into account the perfect fit with all kinds of mainstream aromatherapy equipment on the market. Whether it is an ultrasonic aromatherapy machine that requires good water solubility, a reed diffuser that requires good permeability, or a car aromatherapy machine and fireless aromatherapy stone suitable for small spaces, this fragrance can release fragrance efficiently and stably, providing users with a variety of aromatherapy options.
Safety and Compliance	Products strictly follow IFRA (International Fragrance Association) standards and generally comply with international safety regulations such as EU REACH regulations.
Persistence and Storage	Depending on the volume and equipment used, the aroma lasts a wide range of time, providing a lasting fragrance from hours to months. It is recommended to store in a dark, cool, dry place to maximize its quality and extend its shelf life.

## FUNCTIONS & APPLICATIONS

The uniqueness of coconut and vanilla diffuser is that it is not only a fragrance, but also a custom designer of spatial emotions and an invisible carrier of brand narrative. We go beyond the "smell" level of traditional fragrances and aim to bring you a deeper level of sensory interaction and value presentation. Different from the common "use it wherever there is odor", we encourage active "fragrance programming". In the home, it can be used in the "meditation corner" to create an immersive relaxation space with soft lighting and music; in the children's room, it can be diluted to create a warm and reassuring bedtime atmosphere. When you come back from the outdoors, the coconut fragrance in the entrance can instantly "switch" you to vacation mode and relieve your fatigue. It is not just a fragrance, but also an extension of your lifestyle and a shelter for your soul.

## Support and Services:

We definitely have the fragrance essence oils you need!

The Plant Flavours & Fragrance company has a R&D team consisting several PH.Ds and senior engineers, and has established associated laboratory with many universities and college. Meanwhile the company integrates global technology, information and resource to keep advantage of our products and services by continuous innovation on natural ingredients. The company has always been closed to assist customers to improve the aroma of products and structure of the quality and reduce production costs, tailored to customers, to meet the aroma needs of different daily necessities, we are one of the best enterprises of cost and services in the industry.
