Product Description

High Concentrated Grapefruit Ginger Essence For Scented Candles Making With Free Sample

LDZ-PL40054

Product Description:

This fragrance uses high-purity essential oils to ensure the authenticity and durability of the fragrance, avoiding the chemical feeling or rapid decay problems often found in inferior fragrances. More importantly, it has an optimized formula for scented candles, ensuring that when the candle burns, the fragrance can be evenly and effectively diffused throughout the space, rather than just near the candle. This means that less use can achieve the ideal fragrance diffusion effect, bringing better cost-effectiveness and user experience to your product.

Product Feature:

The core difference lies in its aroma formula. Instead of a simple blend, we carefully blend a dynamic balance of fresh grapefruit and spicy ginger. Most citrus fragrances on the market tend to be single fruity, or the ginger fragrance is too strong, but we have achieved a perfect fusion of bright, refreshing citrus top notes and warm, deep ginger middle notes. This clever combination can not only instantly activate the senses, but also bring lasting comfort and relaxation, providing a richer and more memorable olfactory experience, which is different from the common "either refreshing or warm" monotonous choice.

Its versatility is also a major advantage. In addition to scented candles, it can also be perfectly integrated into a variety of products such as soaps, diffusers, and room sprays, expanding your product line and creative space, and providing a more adaptable and market-potential fragrance solution. Choosing grapefruit ginger fragrance, you choose not only fragrance, but also a unique market positioning and excellent product experience.

Grapefruit-Ginger Fragrance

LDZ-PL40054

Technical Parameter:

| | |
|-----------------------|---|
| Product Name | Grapefruit Ginger Essence |
| Color | Usually colorless to light yellow transparent liquid (specific color may vary slightly from batch to batch) |
| Fragrance description | The top note is a fresh and bright grapefruit citrus scent, and the middle note is a warm and spicy ginger scent. The overall fragrance is rich, refreshing and soothing. |
| Specific Gravity | Typically between 0.85 - 0.95 (@20°C) |
| Refractive Index | Typically between 1.450 - 1.480 (@20°C). |
| Flash Point | Typically above 70°C. |
| Solubility | Easily soluble in oils, ethanol and other commonly used flavor solvents; insoluble in water |

| | |
|--|---|
| Application technical parameters | |
| Recommended addition ratio (scented candles) | |
| Vegetable waxes such as soy wax, coconut wax | usually 6% - 10% (w/w), depending on the desired fragrance intensity and type of wax. |
| Paraffin wax, mixed wax | usually 5% - 8% (w/w). |
| Small batch testing recommended | When using for the first time, it is recommended to start with a lower ratio and gradually increase to achieve the best diffusion effect and personal preference. |
| Optimal Adding Temperature (Scented Candles) | It is recommended to add fragrance when the wax temperature drops to 80°C - 85°C. This temperature range helps the fragrance blend fully with the wax while avoiding high temperatures that may cause the fragrance components to volatilize or denature. |
| Storage stability | Store in a sealed, dark, cool and dry place (recommended temperature 15°C - 25°C), the shelf life is usually 12-24 months. |

| | |
|------------------------|--|
| Cold Throw & Hot Throw | |
| Cold Throw | The fragrance can be diffused when the candle is not burning. This fragrance has good cold diffusion properties. |

Hot Throw

The fragrance has been optimized to provide excellent thermal diffusion when the candle is burning, ensuring that the fragrance fills the space evenly and effectively.

FUNCTIONS & APPLICATIONS

Our grapefruit ginger essence is more than just a scented candle. Its real value lies in its excellent aroma performance and wide range of innovative applications.

In the field of scented candles, it provides a complex and harmonious aroma experience that is rare in the market. Unlike a single fruity or purely spicy scent, the bright and refreshing grapefruit in our essence is perfectly balanced with the warm and spicy ginger, creating a unique atmosphere that is both invigorating and relaxing. This rich olfactory recognition makes your candles stand out in a competitive market and brings consumers a deeper emotional connection and memory point.

Its breadth of application scenarios is also a major differentiation advantage. In addition to high-quality scented candles, this essence can also be perfectly integrated into products such as fireless aromatherapy, room sprays, and handmade soaps. This means that with the same essence, you can create a product line with a clear theme and consistent aroma, enhancing the integrity and professionalism of the brand. For example, customers can have grapefruit ginger candles, diffusers, and soaps at the same time to form a complete home fragrance experience. This consistency across categories not only meets the needs of different consumers, but also strengthens your brand recognition.

In addition, the high purity and excellent fragrance diffusion of the fragrance ensure that the fragrance can be distributed lastingly and evenly regardless of the product used. This means that less fragrance can achieve the desired effect, saving costs for your production, and also improving user satisfaction with the final product. Choosing us, you get a diversified fragrance that can enhance product value, expand market space, and bring a unique olfactory experience.

Support and Services:

We definitely have the fragrance essence oils you need!

The Plant Flavours & Fragrance company has a R&D team consisting several PH.Ds and senior engineers, and has established associated laboratory with many universities and college. Meanwhile the company integrates global technology, information and resource to keep advantage of our products and services by continuous innovation on natural ingredients. The company has always been closed to assist customers to improve the aroma of products and structure of the quality and reduce production costs, tailored to customers, to meet the aroma needs of different daily necessities, we are one of the best enterprises of cost and services in the industry.

Fragrance Oil for perfume making, We Support OEM Your Own Scent Or Other Classical flavor. Contact Us For Inquiry NOW.
