Product Description

High Purity English Pear & Freesia Essence For Scented Candles Making With Free Sample

LDZ-PL40065

Product Description:

Our English Pear & Freesia fragrances infuse your scented candles with unparalleled classic elegance and performance, making them stand out from the crowd.

The core difference lies in its exquisite and widely recognized aroma combination. We accurately capture the perfect balance between the juicy, fresh and ripe pear aroma and the light and delicate white freesia flower aroma. This unique blend avoids the single fruity or overly sweet floral scents commonly seen in the market, providing a layered olfactory experience that is both fresh and deep. It can evoke the tranquility of an autumn orchard and exude the romance of an English garden, giving your products an inimitable, high-end custom-made fragrance identity.

Product Feature:

This fragrance is crafted from premium ingredients to ensure a pure, long-lasting, and stable scent. More importantly, it's optimized for scented candles, and performs well both in cold diffusion (the scent when not lit) and hot diffusion (the scent when burning). This means your candles will attract customers on the shelf, and once lit, they will quickly and evenly diffuse throughout the space, bringing a stunning sensory experience. This consistent high performance is hard to achieve with ordinary fragrances.

In addition, its wide range of applicability makes it an ideal choice. In addition to scented candles, it is also perfect for making flameless aromatherapy, room sprays, and high-end handmade soaps. With English Pear & Freesia fragrance, you not only get a classic and charming scent, but also a powerful tool to increase product value and expand market share.

English Pear - Freesia Fragrance

LDZ-PL40065

Technical Parameter:

English Pear and Freesia Fragrance: Overview of Key Technical Parameters	
Product form and aroma	transparent liquid, blending fresh pear fragrance and delicate freesia fragrance, the fragrance is elegant and classic.
Physical and chemical indicators	Flash point: above 70°C, ensuring safe operation and reducing the risk of ignition.
	Specific gravity/refractive index: in line with industry standards, ensuring product consistency and purity.
	Solubility: easily soluble in oil and ethanol, ensuring full integration with wax base.

Candle application recommendation	
Addition ratio	It is recommended to use 6%-10% vegetable wax and 5%-8% paraffin wax. It is necessary to test and optimize in small batches for the first use.
Addition temperature	It is best to add it when the wax liquid cools to 80°C - 85°C to avoid high temperature volatilization or deterioration.
Scent diffusion	Provides excellent cold diffusion (unlit) and hot diffusion (burning), ensuring long-lasting and even diffusion of fragrance, enhancing user experience.
Curing time	It is recommended to cure for 7-14 days to achieve the best fragrance performance.
Storage and safety	Storage: Sealed and dark, stored in a cool and dry place, shelf life 12-24 months.
	Safety: Non-oral, avoid skin contact

FUNCTIONS & APPLICATIONS

Our English Pear & Freesia fragrance stands out in the fragrance market for its exceptional versatility and unique aroma appeal. In the world of scented candles, it not only provides a pleasant aroma, but also delivers cold and hot diffusion performance that exceeds expectations. Its elegant pear and freesia scents can already diffuse quietly when the candle is not lit; after lighting, the fragrance can diffuse evenly and persistently, instantly enhancing the atmosphere of the space, which is a significant advantage over ordinary fragrances. This stable high performance ensures that consumers can get a consistent and satisfactory experience every time they use it, effectively improving your product reputation.

Its versatility of application is another highlight. In addition to making high-end scented candles, this fragrance is perfect for fireless aromatherapy, room sprays, handmade soaps, and even wax block aromatherapy. This wide compatibility means that you can use the same classic fragrance to build a fragrance product line with a unified fragrance and rich categories. For example, consumers can buy candles, diffusers and body care products of the same fragrance at the same time to form a coherent home fragrance experience. This "one source, multiple uses" strategy not only simplifies your procurement and R&D, but also helps you meet the needs of different market segments and enhance the overall professionalism and appeal of your brand.

In short, by choosing English Pear and Freesia Essence, you are not only choosing its well-loved classic aroma, but also the optimized fragrance diffusion performance and flexible product application potential, which will help your fragrance products stand out in the market.
