Product Feature:

Our Arabian Fragrance Essences are made for perfumery and have their own unique scents. They are not only olfactory, but also carry a rich cultural heritage and exotic customs.

The core feature of these essences is their rich and complex layering. The scents are often deep, warm and exotic, not linear. For example, the smoky wood and a hint of sweetness of Oud, the resinous warmth and slight sweetness of Amber, the rich fragrance and subtle spiciness of Rose, and the soft sensuality of Musk can all be intertwined and blended in the same perfume, showing different faces over time.

In addition, Arabian Fragrance Essences are known for their excellent durability. The high concentration of oily textures (such as Attar) allows them to stay on the skin for a long time, bringing endless fragrance. This scent characteristic makes the perfumes made with them not only have a strong fragrance, but also have strong fragrance retention and diffusion ability, leaving an unforgettable fragrance trail.

The Main Features	
Rich layering	Essences are good at blending wood (such as agarwood), resin (such as amber), spicy (such as saffron), floral (such as rose) and animal (such as musk) notes, making the fragrance evolve over time and show multifaceted charm.
Excellent persistence	Usually a high-concentration oil base, it evaporates slowly, ensuring that the fragrance stays on the skin for a long time.
Powerful diffusion (Sillage)	High concentration and unique combination give the perfume a significant scent trace, leaving a deep impression.
Warmth and sensuality	The combination of spices, resins and wood creates a comfortable and seductive exotic atmosphere.
