Product Description

High Purity Mint Fragrance For Toothpaste Making Free Sample
LDZ-PL90006

Product Descriptions:

Our mint flavor is a high-quality flavor designed for oral care products, especially toothpaste. It is based on the cool and penetrating aroma of natural mint, combined with advanced flavoring technology, perfectly simulating the refreshing feeling of mint spreading rapidly in the mouth. This flavor can bring a lasting sense of freshness and a strong cooling impact to toothpaste, effectively improving the flavor of the product and providing consumers with an excellent clean and refreshing experience.

Product Feature:

The ingredients of this mint flavor are highly compatible with the toothpaste base and are not easy to decompose, ensuring a stable flavor. It can effectively cover the odor of the base, turning daily brushing into an exciting and refreshing journey. Whether it is a regular cleaning or functional toothpaste, this flavor can give the product excellent sensory value, allowing consumers to experience the ultimate cleanliness and comfort every time they use it, and achieve a truly clean and refreshing life.

Its personalized characteristics are:	
Top Notes	It brings a glacial-level cooling impact, instantly activating the oral senses and awakening the spirit.
Middle Notes	The refreshing feeling of menthol spreads evenly and steadily in the mouth, providing a long-lasting sense of clarity
Base Notes	Leaves a clean, residue-free feeling of freshness for long-lasting pleasant breath.

Mint Fragrance LDZ-PL90006

Functional & Applications:

Mint flavor is not only a flavoring agent for toothpaste, but also the key to improving product functions and sensory experience. Its core advantage comes from the precise use of menthol, which brings a series of remarkable effects. First, it can provide a strong cooling sensation at the glacial level, instantly activating the cold receptors in the mouth, bringing an intuitive and strong sense of cleanliness, so that consumers can be sure that the toothpaste is working effectively. Secondly, the excellent odor-masking power of mint can perfectly cover up the odor of the base or active ingredients, ensuring that the toothpaste tastes pure and consistent from beginning to end. Furthermore, it can provide instant and lasting fresh breath, and its volatile components can effectively neutralize bad breath in the mouth, which is the core function that drives consumers to repurchase. In addition, the refreshing aroma of mint has the psychological effect of refreshing the mind, turning daily brushing into a vibrant sensory ritual. Finally, it has excellent compatibility with various ingredients in the toothpaste formula, ensuring the stable quality of the product during the shelf life.

With its powerful functionality, mint flavor is widely used in various toothpaste products to help brands achieve differentiation.

Conventional and gel toothpaste	As the most classic application, mint flavor gives daily toothpaste a fresh and clean taste, meeting consumers' expectations for basic oral care. In gel toothpaste, it can enhance the crystal clear visual effect and refreshing feeling.
Whitening toothpaste	The strong flavor of mint can effectively neutralize the possible odor of whitening ingredients, and its "clean" association can enhance the perception of whitening effect.
Anti-sensitivity and functional toothpaste	In anti-sensitivity, anti-caries or gum care formulas, mint flavor can mask the medicinal taste of functional ingredients, improve the taste, enhance consumer compliance, and ensure long-term use effects.
Herbal and natural toothpaste	Mint can be perfectly compounded with herbal essences such as eucalyptus and tea tree oil to create a more layered and modern flavor, balancing the earthy smell of herbs.
Children's toothpaste	Using a milder mint variety, a sweet, slightly cool mint flavor can be developed to help children adapt to brushing and develop good habits.

Lemon flavor has a wide range of applications in oral care products with its refreshing aroma and excellent functionality. It can bring unique flavors and sensory experiences to different types of toothpaste.

Main application areas:	
Conventional cleaning toothpaste	Effectively mask the odor of the base material, make the brushing process more pleasant, and give the toothpaste a bright and vibrant flavor.
Whitening toothpaste	Neutralizes the discomfort that may be caused by whitening ingredients, provides a refreshing taste, and at the same time strengthens the product whitening perception with its "clean" association.
Children's toothpaste	Compared with the traditional mint flavor, the sweet lemon aroma is more popular with children and helps to cultivate the habit of brushing teeth.
Herbal/natural toothpaste	Perfectly compounded with herbal essences to create a unique and rich flavor layer.
Gel toothpaste	Give the product a crystal clear visual and clear aroma, enhance the sense of purity and vitality.
Functional toothpaste	Neutralize the medicinal taste of functional ingredients, improve the overall taste, and increase consumer compliance.

In short, lemon essence is not only a flavoring agent, but also a key ingredient to enhance product positioning, enrich sensory experience and create differentiated selling points.

Customizations:

Plant Fragrance Oils Ltd, a renowned manufacturer dedicated to crafting exquisite daily-use fragrances that elevate products to new heights. With over 20 years of experience in the industry, we've built a reputation for excellence. Our commitment to quality is unwavering, as we source the finest raw materials from across the globe. This ensures that every drop of our daily-use fragrance not only offers a captivating aroma but also adheres to the most stringent international safety and environment regulations.

Tailor your own fragrance for a tranquil and rejuvenating ambiance.

Design personalized aromatherapy blends to promote relaxation and upliftment.

Customize your fragrance with a unique scent tailored to your preferences.

For perfume fragrance oils, we offer OEM support for creating your own signature scent or replicating popular perfumes, ensuring your chosen fragrance stays with you wherever you go.
