- Whitening: Yes
- Solubility: Oil/ Water Soluble
- Fragrance Notes: Mint,Spearmint
- Certifications: Cruelty-free, Vegan
- Packaging Type: Plastic Or Iron Barrel
- Scent: Perfume
- Bottle Size: 5kgs
- Fragrance Family: Floral
- Odor: With The Aroma Of Scented Pineapple
- Storage: Store In A Cool, Dark Place
- Scent Type: Fragrance
- Product Type: Perfume Fragrance Oil
- Scent Strength: Medium
- Concentration: High Concentration Perfume Oil

Fragrant Orange Fragrance  
LDZ-PL90007

## Product Description

Purity Fragrance Oil Orange Fragrance For Toothpaste Making Free Sample  
LDZ-PL90007

### Product Descriptions:

Our premium orange flavor, crafted specifically for oral care, breathes life into your toothpaste formula with its unparalleled purity and vitality. Derived from ripe, sun-drenched oranges, this flavor captures the fresh, sweet, and slightly vibrant aroma of citrus fruit through precision extraction and molecular reconstruction technology.

It goes beyond simple flavor addition and is a sensory experience. At the moment of brushing, its full top notes release an explosive burst of fresh orange flavor, quickly covering the astringency of the base. Then, the middle notes transition to a soft, lingering fruity aroma, bringing a pleasant sense of freshness. Until the end of brushing, the base notes still retain a refreshing sweetness, leaving the mouth with a lingering fragrance, as if bathed in the morning light of an orange orchard.

## Fragrant Orange Fragrance

LDZ-PL90007

**Product Feature:**

Our orange fragrance for toothpaste is a carefully crafted feast for the senses of smell and taste. Its fragrance design follows the classic three-stage fragrance structure, aiming to provide a three-dimensional and rich sensory experience. The overall fragrance is well-structured and transitions naturally, and can be perfectly integrated with a variety of toothpaste bases. It is not only an enhancement of flavor, but also a sensory sublimation of the daily oral care experience.

Its personalized characteristics are:	
Top Notes	With highly active fresh orange peel essential oil as the base note, it releases a fresh and bright citrus aroma. It instantly activates the taste buds and quickly covers up the discomfort that may be caused by the toothpaste base, bringing a vibrant start to the brushing process.
Middle Notes	The aroma gently transitions to the pulpy aroma of ripe sweet oranges, which is warm and full. The flavor at this stage is long-lasting and stable, bringing a long and pleasant fruity experience to the mouth, as if you are in an orange orchard under the sun, bringing peace and satisfaction to the soul.
Base Notes	After brushing, the fragrance leaves a refreshing and sweet aftertaste. This pure and delicate fragrance effect can effectively maintain the freshness of the mouth and give users lasting confidence and comfort.

**Functional & Applications:**

Our orange flavor has multiple core functions, designed to comprehensively enhance the performance and user experience of toothpaste products. First, it has excellent odor masking ability, which can effectively neutralize and mask the inherent bitter or chemical odors of toothpaste bases (such as abrasives and surfactants), ensuring the product tastes pure. Secondly, the flavor transforms daily brushing into a pleasant sensory experience through sensory sublimation. Its layered fragrance can stimulate the sense of smell and taste, and enhance the user's product stickiness. In addition, we use microencapsulation sustained-release technology to give the flavor excellent stability, making it unaffected by temperature, pH and oxidation, ensuring that the flavor of the product remains consistent throughout the shelf life. Finally, the unique long-lasting fragrance design can still bring a long-lasting, refreshing orange fragrance to the mouth after brushing, providing a continuous fresh experience.

Our orange flavor has a wide range of applications to meet the needs of different markets and consumer groups. It is very suitable for children's toothpaste, and its lively and sweet orange flavor can effectively encourage children to develop good brushing habits and reduce their resistance to brushing. In the field of adult toothpaste, it can add a fresh and popular flavor to ordinary cleaning or whitening toothpaste, enhancing the product appeal. At the same time, this flavor can be perfectly compounded with a variety of functional ingredients (such as fluoride and herbal extracts) to mask the special flavors they may bring without affecting the efficacy. In addition, it can also be used in other oral care products such as mouthwashes and tooth powders to provide an immediate and long-lasting fresh taste. Whether it is a high-end niche brand or a mass consumer product, this flavor can add a unique flavor advantage to your formulation.

### Customizations:

Plant Fragrance Oils Ltd, a renowned manufacturer dedicated to crafting exquisite daily-use fragrances that elevate products to new heights. With over 20 years of experience in the industry, we've built a reputation for excellence. Our commitment to quality is unwavering, as we source the finest raw materials from across the globe.
