## Product Description

### Eco Friendly Safeguard Fragrance Essence For Softener Laundry Detergent Concentrated LDZ-PL50149

#### Product Description:

This fragrance is characterized by its fresh, clean, and protective notes. Rather than a traditional floral or fruity scent, it is designed to simulate the olfactory experience of a clean, sterile environment.

The "Safeguard" fragrance is formulated to achieve a balanced aroma and functionality. Not only does it provide a fresh and clean olfactory experience, but its unique fragrance design subconsciously reinforces the product's protective and hygienic image, making it an ideal choice for laundry products seeking a clean and functional aroma.

#### Product Feature:

Top Notes	The fragrance opens with bright and uplifting citrus and green notes. These notes are often composed of bergamot, lime, or fresh eucalyptus molecules, complemented by subtle ozone or aquatic notes, simulating the freshness of freshly washed air and morning dew. These highly volatile ingredients are designed to provide an immediate cleansing impact and effectively mask any initial odors on clothing.
Heart Notes	As the top notes fade, the fragrance's core—a pure and gentle soapy scent—becomes apparent. The heart is dominated by clean aldehydic notes, often blending with delicate white florals like muguet or jasmine, and soft white tea or cotton notes. This phase of the fragrance is clear, airy, and non-overpowering, perfectly conveying the idea that clothing has been thoroughly cleaned and protected, creating a comfortable and reassuring olfactory atmosphere.
Base Notes	The fragrance's base notes are composed of warm and calming woods and musk. Soft white musk, sandalwood, or a subtle amber molecule are used as a fixative. These low-volatility ingredients impart persistence and depth to the fragrance, ensuring its clean, warm finish lingers long after clothes have dried. The addition of base notes smooths the fragrance's finish, leaving consumers with a lasting sense of cleanliness and security.

## FUNCTIONS & APPLICATIONS

The core function of the Safeguard fragrance oil is to provide a clean, hygienic olfactory experience and reinforce the product's protective qualities.

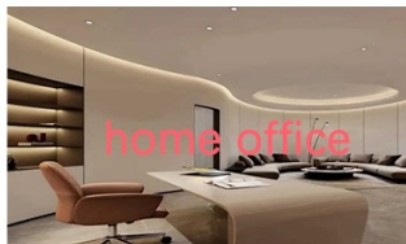

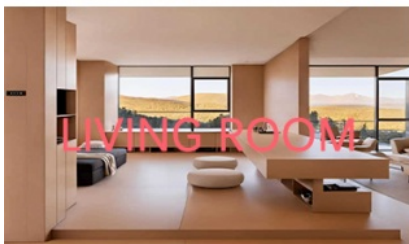

Odor Neutralization	Specific molecules in the fragrance effectively absorb and neutralize unpleasant odors on clothing, such as sweat, smoke, and mildew, rather than simply masking them, providing a truly fresh feeling.
Odor Imparting	Its fresh, neutral soapy notes impart a "freshly washed" olfactory perception to clothing, perfectly aligning with modern consumers' pursuit of cleanliness.
Long-Lasting Fragrance	Thanks to its low volatility, the fragrance molecules effectively adhere to clothing fibers, ensuring the fragrance persists long after washing and even during wear.
Brand Association	The unique clean fragrance serves as the olfactory signature of the Safeguard brand, helping consumers connect the brand to "Safeguard = cleanliness and protection" and fostering brand loyalty.

Due to its powerful functionality and formula compatibility, Safeguard fragrance can be widely used in a variety of clothing care products. Applications include, but are not limited to:

High-efficiency laundry detergent	The fragrance can be stably incorporated into concentrated or high-efficiency formulas without compromising cleaning performance, providing consumers with a refreshing, clean fragrance while delivering powerful stain removal.
-----------------------------------	---

Fabric sanitizer	In sanitizer products, the fragrance not only provides a pleasant scent but also masks the potential irritation of disinfectants, making them more appealing.
Fabric softener	As a key ingredient in fabric softener, the fragrance adheres to fabrics during the final wash cycle, imparting a soft feel while providing a long-lasting clean and safe fragrance.
Laundry Pods	In multi-functional laundry pods, the fragrance works synergistically with the cleansing and softening ingredients to provide an integrated wash experience, ensuring the fragrance is perfectly released throughout the wash cycle.
