Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL10136
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Specification

- Form: Spray,Oil,Wax
- Scent: Floral,Spicy,green Apple,Woody,Sweet
- Type: Parfum,Eau De Parfum,body Spray,fragrance Mist,body Mist
- Gender: Female,Male
- Volume (ml): 236ml,250ml,88ml,50ml 100ml,custom
- Usage: Deodorant,moisturing,refreshing,Body Care,Useful
- Fragrance: Jasmine,Lemon,Rose,green Apple,Plnk Velvet
- Color: Red,blue,Purple,clear,green;
- Sample Lead Time: 3-5 Days,10 Days,10-15 Days,10days
- Service: OEM ODM Accept
- Product Name: Body Mist,Fragrance Mist,Best Natural Lavender Fragrance Skin Refreshing Body Mist,Perfume,Essential Oil Mosquito Repellent

Product Description

Concentrated Dun hill Fragrance For Perfume Making Floral Unisex Eau de Parfum LDZ-PL10136

Product Description:

The term "Concentrated Dun hill Fragrance" for perfume making refers to a highly potent, raw material designed for use by perfumers, either amateur or professional. Unlike a finished retail product, this is not a ready-to-use perfume. Instead, it is an aromatic concentrate that serves as the core of a fragrance formulation. It is essentially the "perfume oil" or "fragrance compound," containing a complex blend of natural and synthetic aroma chemicals, essential oils, and absolutes that together create the characteristic scent profile associated with a particular Dun hill fragrance.

The details of such a concentrate are proprietary and protected by the brand. However, one can infer the general characteristics based on the public-facing fragrance it is meant to replicate. For example, a concentrate for "Dun hill Icon" would be an abstract, woody-aromatic fougère. The composition would be a carefully balanced synergy of top notes (likely bergamot, neroli, black pepper), heart notes (lavender, cardamom, sage), and a robust base (vetiver, oud wood, leather). The raw concentrate would contain these notes in a highly concentrated form, typically suspended in a solvent, often DPG (dipropylene glycol) or a similar substance, to make it stable and easy to handle.

PZAN

Product Feature:

A "Concentrated Dun hill Fragrance" for perfume making is a proprietary and complex blend of aroma chemicals, often replicating the scent profile of a specific Dun hill retail fragrance. While the exact formula is a trade secret, a professional analysis of a well-known fragrance like "Dun hill Icon" reveals its structured note pyramid.

Top notes	The initial burst upon application is a sophisticated blend of fresh and spicy elements. You would find bright, zesty Italian Bergamot and the floral-green bitterness of Neroli, which create an uplifting and clean opening. A kick of Black Pepper provides a sharp, masculine edge, while Petitgrain adds a subtle, herbaceous facet.
Middle notes	As the fragrance settles, a rich and aromatic heart emerges. This is where the core character is built. Prominent notes would include aromatic Lavender de Provence, warm and spicy Cardamom, and earthy, slightly peppery Sage. These elements work together to create a classic, fougère-like structure that is both timeless and refined.
Base notes	The foundation of the fragrance is a deep, long-lasting blend of woody and animalic notes. This includes the smoky and earthy character of Vetiver, the deep, resinous scent of Oud, and the rugged, sophisticated aroma of Leather. Hints of Oakmoss and a touch of powdery Iris might also be present, providing a mossy, classic feel that anchors the composition and gives it a lasting, memorable dry-down.

Technical Parameter:

Product Name	Concentrated Dun hill Fragrance Essence Oil
Fragrance Profile	Floral Profile
Appearance	A clear to pale yellow liquid, depending on the specific formula and the presence of vanillin, which can cause discoloration over time.
Middle Note Duration	2-4 hours
Base Note Longevity	6-8 hours or longer
Relative density	Approx. 0.89 - 0.92 g/cm ³ @ 25°C
Refractive index	1.45-1.55 (20°C)
Flash point	≥ 62°C (closed cup, due to ethanol content)
Ingredients	Natural & Synthetic Aromatic Compounds
Suggested Dilution Ratio	1:15 Oil:Solvent for EDT
Longevity	Better than common fruity flavors on the market, 6-8 hours effective longevity
Solubility	Soluble in ethanol (perfumer's alcohol), insoluble in water
Volatility	Low Volatility, Long-lasting Scent
Storage Conditions	10-25°C, away from light and ignition sources

IFRA Compliance	Conforms to the safety standards of the International Fragrance Association (IFRA).
Color Stability	Excellent
Stability	Stable under recommended conditions; may separate below 0°C
Shelf Life	36 Months, Store away from light
Application	Fine Perfumery, Aromatherapy, Personal Care
Evaporation Rate	Slow Evaporation Rate Compared with alcohol-containing perfumes, its evaporation rate is significantly reduced, making the evolution of the fragrance smoother and more delicate, with richer layers, avoiding the problem of rapid dissipation of the fragrance.

FUNCTIONS & APPLICATIONS

A concentrated Dun hill fragrance serves as the foundational fragrance compound or "perfume oil" for creating finished products. Its primary functions are multifaceted and crucial to the perfumery process:

Scent Creation	The concentrate contains the complete, pre-formulated aromatic profile of a specific Dun hill fragrance, including its top, middle, and base notes. This allows a perfumer to bypass the complex, resource-intensive process of blending dozens or even hundreds of individual aroma chemicals and essential oils from scratch.
Carrier for Aroma	This highly potent oil is the vehicle for delivering the scent molecules. It is typically a blend of fragrance oils and a solvent, such as DPG (dipropylene glycol), which is used to dilute the raw materials and make them soluble and stable.
Strength and Longevity	The concentration level directly dictates the potency and staying power of the final product. By controlling the dilution ratio, a perfumer can create different strengths (e.g., Eau de Parfum, Eau de Toilette) from the same base compound, ensuring the fragrance's sillage and longevity are tailored to a specific application.
Consistency and Quality Control	Using a pre-made concentrate ensures consistency. Each batch of the final product will smell identical to the original, a vital aspect of maintaining a brand's olfactory signature and quality

applications

The versatility of a concentrated Dun hill fragrance allows for its application across a wide range of perfumery and cosmetic products.

Fine Fragrance	This is the most common application. The concentrate is diluted with perfumer's alcohol (e.g., ethanol) to create spray-on perfumes like Eau de Parfum (15-20% concentrate), Eau de Toilette (5-15%), and Parfum (20-30%). The concentrate is the "secret sauce" that gives the final product its unique character.
Attars and Perfume Oils	For those who prefer alcohol-free formulations, the concentrate can be diluted with carrier oils like jojoba, fractionated coconut oil, or sweet almond oil. These perfume oils, often sold in small roll-on bottles, offer a more intimate and long-lasting scent experience that is gentle on sensitive skin.
Cosmetics and Personal Care	The concentrate can be used as a fragrance component in a variety of personal care products. This includes adding it to unscented bases for lotions, body washes, hair mists, and soaps to create a cohesive scented line that complements the main fragrance.
Home Fragrance	The concentrated oil is also suitable for home applications, such as oil diffusers, reed diffusers, and candle-making, allowing consumers to fill their living spaces with the luxurious Dun hill scent.

applications

Our Advantages:

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

Support and Services:

We definitely have the fragrance essence oils you need!

The Plant Flavours & Fragrance company has a R&D team consisting several PH.Ds and senior engineers, and has established associated laboratory with many universities and college. Meanwhile the company integrates global technology, information and resource to keep advantage of our products and services by continuous innovation on natural ingredients. The company has always been closed to assist customers to improve the aroma of products and structure of the quality and reduce production costs, tailored to customers, to meet the aroma needs of different daily necessities, we are one of the best enterprises of cost and services in the industry.

Fragrance Oil for perfume making, We Support OEM Your Own Scent Or Other Classical flavor. Contact Us For Inquiry NOW.

Where there are fragrance, there are plant flavor.

The reason why our enterprise develops so rapidly is that we gradually meet the demands of our customer by improving the quality of their products and shortening their good deliver time. In case of urgent demands of customers, we adopt our contingency measures to help our customers solve the problem in time.

Meantime, we offer Training and Education on fragrance formulation and usage for the customized who interested in our fragrance.

Our Fragrance Oil product comes with comprehensive technical support and services to ensure that our customers have a seamless experience.

We offer:

- 1.Product usage instructions and guidance;
2. Expert advice on fragrance selection;
3. Technical support for any issues or concerns;
4. Product customization services;
- 5.Assistance with regulatory compliance.

Packing and Shipping:

Product Packaging:

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm 5kg*4 bottle per carton	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Shipping:

After the payment, we'll arrange the production of your order ASAP. Normally, It will take 3-5days for trial order with small quantity, around 5-10 days for bulk order. Before shipping out, we'll take photos of the goods for confirmations with clients, or supply bulk sample for confirmation as

well.

We offer shipping goods by ship, by air ,by truck , and by express, according to the clients requirements.

Packaging & Logistics

>> Welcome to plant fragrance <<<<

The image is a composite graphic for a logistics and packaging company. At the top, a white cargo plane is shown flying over a world map. Below the plane, the text "Packaging & Logistics" is prominently displayed, followed by the slogan ">> Welcome to plant fragrance <<<<". Underneath the text are logos for major logistics providers: DHL, EMS, FedEx Express, and UPS. To the right of these logos, a white semi-truck and a cargo ship are depicted. Below these elements are three small images: a warehouse with white pallets, a warehouse with a forklift and shelves of bottles, and a warehouse with blue pallets. The bottom section is a 3x3 grid of images showing various warehouse and production activities: blue barrels on pallets, a worker at a computer, a worker at a workstation, a worker at a workstation, a worker at a workstation, and a worker at a workstation.
