Product Description

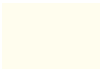

Concentrated YSL Fragrance For Perfume Making Floral Unisex Eau de Parfum

Product Description

The term "Concentrated YSL Fragrance" for perfume making refers to a highly potent fragrance compound that captures the signature scent of a popular YSL perfume. This is not a finished product but a raw ingredient used by professional and hobbyist perfumers to create a variety of applications, from fine fragrances to scented personal care items. Due to the brand's diverse portfolio, a single concentrate could replicate one of many iconic scents.

Product Features

T o p N o t e s	The initial impression is a bright and invigorating burst of citrus and aromatic accords. It would feature a vibrant blend of Mandarin Orange, a juicy and sparkling note, alongside the distinct, fresh, and slightly herbal scent of Lavender. Black Currant adds a subtle fruity sweetness, while a touch of Petitgrain provides a green, slightly bitter accent that balances the opening.
M i d d l e N o t e s	As the initial notes fade, the heart of the fragrance unfolds with a sophisticated floral bouquet. The concentrate would be dominated by the sensuality of Orange Blossom, a warm, rich, and sweet floral note. This is expertly paired with Jasmine, a classic white floral that adds a creamy and elegant dimension, while a continuation of Lavender from the top notes maintains a clean, aromatic core.
B a s e N o t e s	The foundation of the fragrance is a deep, warm, and long-lasting accord. The concentrate would contain a significant amount of Madagascar Vanilla, providing a sweet, comforting, and gourmand undertone. This is complemented by the woody and dry facets of Cedarwood and the musky warmth of Ambergris and Musk, which ensure the fragrance has excellent sillage and a memorable dry-down.

Technical Parameters

Product Name	Concentrated Fragrance Essence Oil
Fragrance Profile	Floral Profile
Appearance	Typically a clear, transparent to pale amber liquid
Middle Note Duration	2-4 hours
Base Note Longevity	6-8 hours or longer
Relative density	Approx. 0.90 - 1.102 g/cm³ @ 25°C

Refractive index	1.45-1.55 (20°C)
Flash point	140°F (60°C)
Ingredients	Natural & Synthetic Aromatic Compounds
Suggested Dilution Ratio	1:15 Oil:Solvent for EDT
Longevity	Better than common fruity flavors on the market, 6-8 hours effective longevity
Solubility	Soluble in ethanol (perfumer's alcohol), insoluble in water
Volatility	Low Volatility, Long-lasting Scent
Storage Conditions	10-25°C, away from light and ignition sources
IFRA Compliance	Conforms to the safety standards of the International Fragrance Association (IFRA)
Color Stability	Excellent
Stability	Stable under recommended conditions; may separate below 0°C
Shelf Life	36 Months, Store away from light
Application	Fine Perfumery, Aromatherapy, Personal Care
Evaporation Rate	Slow Evaporation Rate Compared with alcohol-containing perfumes, its evaporation rate is significantly reduced, making the evolution of the fragrance smoother and more delicate, with richer layers, avoiding the problem of rapid dissipation of the fragrance.

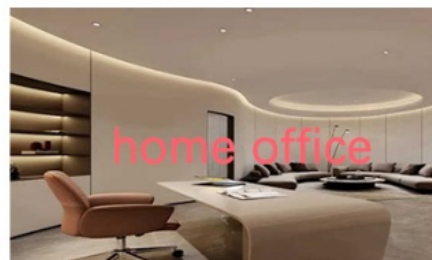

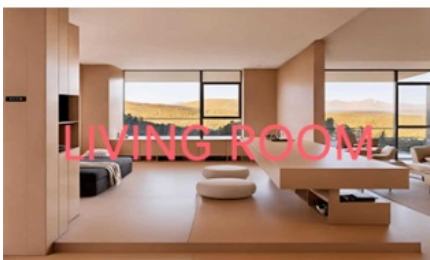

Functions & Applications

A concentrated YSL fragrance is a professionally crafted fragrance compound, a raw material that serves as the core of any scented product. Its primary function is to provide the complete and signature olfactory profile of a specific YSL fragrance. This eliminates the need for a perfumer to source and blend numerous individual aroma chemicals, essential oils, and absolutes, saving immense time and ensuring brand-accurate scent reproduction.

The concentrate is a meticulously balanced formula where the top, middle, and base notes are in perfect harmony. It acts as the scent's blueprint, guaranteeing that the final product will be consistent in quality and smell. Its high potency allows for economic use, as only a small amount is required to fragrance a large volume of end product.

applications

Primary Applications

Fine Fragrance	The concentrate is diluted with high-proof perfumer's alcohol to create different concentrations like Eau de Parfum (EDP) or Eau de Toilette (EDT). The ratio of the fragrance oil to the alcohol base determines the final product's strength and longevity.
Perfume Oils and Attars	For alcohol-free applications, the concentrate can be blended with a non-volatile carrier oil such as jojoba or fractionated coconut oil. These finished products are often applied via a rollerball and offer a more intimate, long-lasting scent that is gentle on the skin.
Personal Care Products	The concentrated fragrance can be incorporated into unscented bases for a variety of products. This includes body lotions, shower gels, shampoos, and conditioners, allowing for the creation of a layered product line that features a cohesive, signature scent.
Home Fragrance	Beyond personal use, the concentrate is also a key ingredient for scenting living spaces. It can be used in the creation of candles, wax melts, reed diffusers, and room sprays, bringing the luxurious and evocative aroma of a YSL fragrance into the home.

applications

Our Advantages

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

Support and Services

We definitely have the fragrance essence oils you need!

The Plant Flavours & Fragrance company has a R&D team consisting several PH.Ds and senior engineers, and has established associated laboratory with many universities and college. Meanwhile the company integrates global technology, information and resource to keep advantage of our products and services by continuous innovation on natural ingredients.

Fragrance Oil for perfume making, We Support OEM Your Own Scent Or Other Classical flavor. Contact Us For Inquiry NOW.

Where there are fragrance, there are plant flavor. The reason why our enterprise develops so rapidly is that we gradually meet the demands of our customer by improving the quality of their products and shortening their good deliver time.

Our Services Include:

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance

Packing and Shipping

Product Packaging

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm 5kg*4 bottle per carton	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Shipping Information

After the payment, we'll arrange the production of your order ASAP. Normally, it will take 3-5 days for trial order with small quantity, around 5-10 days for bulk order. Before shipping out, we'll take photos of the goods for confirmations with clients, or supply bulk sample for confirmation as well.

We offer shipping goods by ship, by air, by truck, and by express, according to the clients requirements.
