## Product Description

### Grape Essence Fragrance Oil 500ml For Scented Soap & Shampoo & Shower Gel

Product Code: LDZ-PL20126

#### Product Description

Grape Essence Fragrance Oil is a popular choice for soap and shampoo making, known for its sweet, fruity, and nostalgic aroma. This professional-grade fragrance oil is meticulously crafted to capture the authentic, juicy scent of ripe grapes, making it a favorite for creating bath and body products with a playful and comforting scent profile.

The scent is a complex blend of top, middle, and base notes. The initial impression is a burst of bright, tangy notes reminiscent of fresh grape juice, often with hints of other dark berries like blackcurrant or boysenberry. As the fragrance settles, the middle notes reveal a rich, syrupy sweetness that is true to the core of a grape, evoking memories of grape jelly or hard candy. The base notes are subtle, providing a soft, sweet undertone that ensures the fragrance is long-lasting without being overpowering.

#### Product Features

Formulated for stability in both hot and cold processes, Grape Essence Fragrance Oil performs exceptionally well in a variety of soap bases, including glycerin, shea butter, and goat's milk. It maintains its integrity and full scent profile even after saponification. For shampoos and other liquid washes, it imparts a vibrant and lasting aroma that makes for a delightful shower experience.

This fragrance oil is phthalate-free and skin-safe, adhering to the highest industry standards for cosmetic use. Its versatility makes it suitable for a wide range of applications beyond soap and shampoo, including bath bombs, lotions, and candles. Its delightful and universally appealing scent profile ensures a final product that is both high-quality and commercially viable.

Top notes	The top notes provide the initial impression, a lively and effervescing burst of sweet and tangy accords. This opening is dominated by the bright and juicy scent of freshly crushed Concord grapes, often with a hint of crisp green notes that mimic the skin of the fruit, creating a clean and invigorating first impression.
Middle notes	As the fragrance evolves, the middle notes emerge to form the heart of the scent. This is where the true character of the grape shines through, presenting a rich, full-bodied sweetness reminiscent of classic grape jelly or a sugary grape soda. These notes are deep and syrupy, providing the comforting and nostalgic core that makes this fragrance so appealing.
Base notes	The base notes anchor the fragrance, ensuring its longevity and providing a smooth, balanced finish. These notes are subtle but essential, offering a soft, powdery sweetness with a touch of vanilla or musk that supports the more prominent fruit notes, preventing them from becoming cloying. This delicate foundation allows the grape aroma to linger pleasantly on the skin after use.

Technical Parameters

Product Name	Freesia Fragrance Essence Oil
Fragrance Profile	Floral Profile
Appearance	Clear, colorless to pale yellow liquid
Relative Density	Approx. 0.95 - 1.05 g/cm³ @ 25°C
Refractive Index	1.450 - 1.480
Flash Point	115°F - 210°F (46°C - 99°C)
Ingredients	Natural & Synthetic Aromatic Compounds
Suggested Dilution Ratio	1:15 Oil:Solvent for EDT
Solubility	Soluble in oils, ethanol; Insoluble in water
Phthalate-Free	Yes

Usage Rate	1-6% of total product weight
IFRA Compliance	Conforms to IFRA safety standards
Discoloration	Varies (Light Yellow to Tan)
Shelf Life	36 Months (Store away from light)
Cold Process Performance	Varies (No acceleration to mild acceleration)
Application	Fine Perfumery, Aromatherapy, Personal Care
Evaporation Rate	Slow evaporation rate for richer fragrance layers

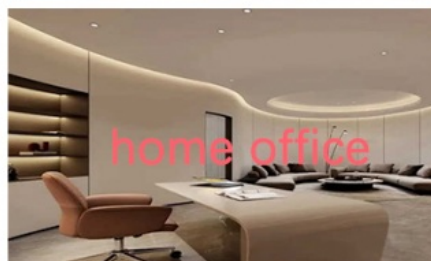

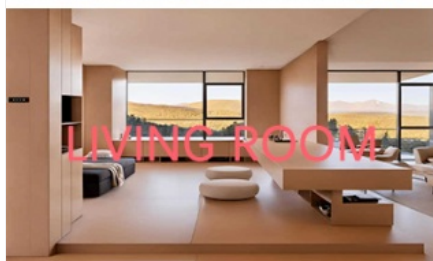

## Functions & Applications

Grape Essence Fragrance Oil serves a singular but critical function in soap making: to impart a captivating and lasting scent. Its primary application is in various soap-making processes, where it ensures a consistent and appealing aroma. The fragrance oil is carefully formulated to be stable in both Cold Process Soap and Melt & Pour Soap bases. In Cold Process, it is added to the soap batter at trace, where it must not accelerate or "seize" the mixture. Its good performance in this regard allows for intricate swirling and layering designs. In the much simpler Melt & Pour method, it is added once the soap base has been melted, requiring just a few drops to evenly scent the entire batch. The resulting products, such as Handmade Bar Soap, Luxury Soap Bars, and novelty soaps, become more than just a cleansing tool; they become a sensory experience that is particularly popular for children's bath products due to the nostalgic and fun scent.

In shampoo formulation, Grape Essence Fragrance Oil functions as the key sensory element, transforming a functional cleansing product into an enjoyable and marketable personal care item. Its application is straightforward: it is blended into the liquid shampoo base at the final stage of production, after the surfactants and other ingredients are fully mixed. The oil's professional-grade stability ensures it remains homogeneously dispersed within the shampoo without separating or clouding the final product. This results in a consistently scented product. Common applications include Liquid Shampoo, Conditioning Shampoo, and Kids' Shampoo. The sweet and fruity aroma is not only pleasing during use but also leaves a subtle, clean scent on the hair after rinsing. The oil's phthalate-free, skin-safe composition is paramount for a product that is used directly on the scalp and hair.
