Product Description

5kgs Volume Concentrated Estée Lauder Fragrance Oil For Floral-Aromatic Perfume

Product Code: LDZ-PL11522

These oils are typically a blend of natural and synthetic aromatic chemicals mixed with a solvent like Dipropylene Glycol (DPG) to ensure stability and usability. They are not the same as pure essential oils. They are highly concentrated aromatic compounds, usually containing no alcohol, which is common in commercial sprays. This high concentration is what makes them suitable for dilution in perfume making. The scent will aim to reproduce the full top, middle (heart), and base notes of the original Estée Lauder perfume it is named after. For example, a "Pleasures Type" oil would feature notes like white lily, lilac, rose, and violet.

Fragrance Profile:

Top Notes	Fresh, Green, & Peppery White Lily, Violet Leaves, Green Accents, Freesia, Pink Pepper
Heart Notes	Delicate Floral Bouquet Black Lilac, White Peony, Pink Rose, Jasmine, Lily-of-the-Valley
Base Notes	Soft, Woody Finish Sandalwood, Patchouli, Musk

Applications:

Primary Application: Body Perfume Making

The main use is crafting personalized, skin-safe perfumes:	
Oil-Based Roll-On Perfumes	This is the most popular DIY use. The concentrated oil is diluted with a neutral Carrier Oil (like Jojoba, Fractionated Coconut, or Sweet Almond) and poured into a small rollerball bottle. The typical concentration is 15-20% fragrance oil for a strong, intimate, and long-lasting scent that is gentler on the skin than alcohol sprays.
Alcohol-Based Spray Perfumes (Eau de Parfum/EDP)	The oil is mixed with high-proof, specially denatured Perfumer's Alcohol (Ethanol). The alcohol acts as a volatile carrier that helps atomize the scent. Concentrations range from 10-30% for a spray that projects widely.
Solid Perfumes/Balms	The oil can be blended into a melted base of natural waxes (like beeswax) and carrier oil, creating a portable, pocket-sized solid fragrance.

Secondary Applications: Scenting Products

With proper testing (check the supplier's safety data sheets for maximum usage rates), the oil can also be used for:	
Body Care	Adding scent to unscented lotions, body washes, bath bombs, or scrubs.

Home Fragrance	Creating DIY reed diffusers (using a suitable diffuser base), scented sachets, or adding a few drops to an ultrasonic diffuser for ambient room scenting.
Important Note	Dilution is crucial for all applications to ensure skin safety and to allow the fragrance notes to develop properly.
