Product Description

Free Sample Mango Fragrance For Shower Gel & Shampoo Making

LDZ-PL20227

The Concentrated Mango Fragrance Oil is a vibrant, intensely fruity aroma designed to capture the sweet, tropical, and slightly tangy essence of a ripe mango. This type of oil is extremely popular for shower gels and shampoos as it delivers a strong, cheerful scent associated with summer, energy, and exotic freshness.

Fragrance Profile

The Concentrated Mango Fragrance Oil is a classic Fruity Tropical Gourmand scent designed to be a realistic, juicy, and uplifting aroma that performs well in wash-off products. It's built to capture the full spectrum of the ripe fruit experience.

The result is an intensely cheerful and authentic tropical aroma. When used in shampoo or shower gel, this profile is known for being strong in the bottle and carrying well in the shower's steam, creating an immersive, vacation-like experience.

Top Notes	Bright, Zesty, and Sweet Tropical Opener, Highly concentrated Ripe Mango Nectar, bright Pineapple, juicy Orange Zest, and hints of Grapefruit or Peach for immediate vibrancy.
Middle Notes	Fleshy, Green, and Floral Core, The true Mango Flesh note is dominant here, often blended with soft, supporting notes like a delicate Floral Apple, green Plumeria or Jasmine, and sometimes a hint of Green Leaf to prevent it from smelling overly synthetic.
Base Notes	Creamy, Sugary, and Lasting Finish, Soft, smooth undertones of Coconut Milk or Creamy Coconut, Sweet Sugar Cane or Vanilla, and a clean, light Musk to help the scent linger gently on the skin after rinsing.

Technical Specifications

Applications

The Concentrated Mango Fragrance Oil is valued in cosmetic crafting for its intense, cheerful tropical scent, making it an excellent choice for a wide variety of personal care and home products, especially those involving water.

Primary Application: Wash-Off Products

This category leverages the oil's stability in high-surfactant and watery bases:

Shower Gels & Body Washes	The strong, sweet mango scent holds up well against the aggressive cleaning agents (surfactants), providing an uplifting aromatic experience that lasts through the rinse. (Typical usage: 1.0% to 3.0%).
Shampoos & Conditioners	It imparts a refreshing, fruity aroma to hair care products. It is crucial to check the oil's suitability for different hair types, ensuring it doesn't leave a residue.
Soap Making (Melt & Pour/Cold Process)	The scent is highly stable in both hot and cold soap-making processes, producing a bar soap with an authentic, juicy mango aroma.

Secondary Application: Leave-On & Other Products

Body Lotions & Creams	The fruity scent offers a light, appealing summer note to moisturizing products. Note: Usage rates must be significantly lower here than in wash-off products to comply with IFRA skin safety guidelines.
Bath Bombs & Salts	Creates a tropical bath experience as the scent is released when dissolved in warm water.
Room & Linen Sprays	Diluted with a water and emulsifier base, the mango scent makes for a vibrant, energy-boosting room freshener.
