

ISO Grade Fig-Blackcurrant Candle Fragrance Oil with Up to 60 Hours Burn Time and 24 Months Shelf Life

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL40042
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Specification

- Grade: ISO Grade
- Safety Features: Lead-free Wick, Non-toxic Ingredients
- Burn Time: Up To 60 Hours
- Colour: Light Yellow
- Color: Natural White Or Colored
- Solubility: Oil/ Water Soluble
- Type: Synthetic Flavour & Fragrance
- Sample: Freely Provide
- Other Names: Black Rose Fragrance Essence Oil
- Application: Candle
- Scent Type: Fruity, Floral, Woody, Spicy, Fresh
- Highlight: **ISO Grade Candle Fragrance Oil, Up to 60 Hours Burn Time Fragrance Essence Oil, 24 Months Shelf Life Scented Candle Oil**

Product Description

Free Sample Fig-Blackcurrant Essence Candle Fragrance Oil High Quality

LDZ-PL40042

Product Description

This complex and captivating fragrance oil belongs to the Fruity/Woody family, offering a sophisticated balance of lush sweetness, tartness, and grounding earthiness. The overall impression is a rich, modern, and unisex aroma, evoking a Mediterranean orchard at sunset. It offers excellent performance in candle applications, providing both a strong cold and hot scent throw.

Product Features

Top Note	The scent architecture typically unfolds with bright, refreshing Top Notes of vibrant blackcurrant (or cassis), often accentuated by the green, slightly milky aroma of fig leaf and a touch of citrus or galbanum for lift.
Middle Note	The Heart Notes reveal the main body, centering on the creamy, sun-warmed fruitiness of ripe fig. This is where the dark, juicy, and subtly sharp blackcurrant berry note comes forward, frequently blended with soft floral or gourmand elements like coconut, orris, or dried fruits, lending depth and a luxurious sweetness.
Base Note	A sophisticated anchor is provided by the Base Notes, which are typically woody and warm. Common components include cedarwood, creamy sandalwood, deep amber, or tonka bean. These elements provide longevity and an elegant, comforting foundation that prevents the fruit notes from becoming overly simple or fleeting.

Technical Parameters

Fragrance Profile	Orange Blossom Essence notes
Appearance	Clear to pale yellow liquid
Relative density	≈0.920 to 1.050 g/cm³ @ 25°C
Refractive index	1.4500 - 1.5100 @ 20°C
Flash point	>80°C to (>176°F)
Ingredients	Natural & Synthetic Aromatic Compounds
Volatile organic compound (VOCs) content	< 1% - Environmentally friendly formula that meets regulatory standards such as the California Air Resources Board (CARB).
Recommended Dosage	6% to 10% by weight, depending on the specific wax type
Thermal diffusion performance	Excellent. It can fill a space of 20-30 square meters in 3-5 minutes after lighting.
Cold Throw	Excellent - Has a noticeable aroma even when unburned.
Hot Throw	Excellent - The aroma spread is strong and steady while burning.
Wax Compatibility	Excellent - Blends seamlessly with a variety of common waxes, including soy wax, beeswax, coconut wax, paraffin wax, and blends, without affecting the wax structure or combustion performance.
Solubility	Easily soluble in ethanol and propylene glycol to ensure uniform dispersion in the formula
Compatibility	Compatible with most anionic, nonionic, and zwitterionic surfactants
Shelf Life	Store in a cool, dark place, shelf life 24 months
Standard (IFRA Compliance)	It complies with the International Fragrance and Fragrance Association (IFRA) standards and has passed skin irritation testing to ensure its safety in home environments.

Functions & Applications

It acts as a luxurious, modern-unisex fragrance that balances the creamy, milky sweetness of fig with the crisp, tart vibrance of

blackcurrant, grounding both with warm, earthy woods (like cedar or amber). This combination prevents the scent from becoming overly sweet or simple. This sophisticated fragrance profile offers high versatility, driven by its complex balance of fruity, green, and woody notes, making it suitable for both ambient scenting and personal care product lines.

Primary Function: Ambient Scenting (Home Fragrance)

Poured Candles & Wax Melts: Optimized for use in soy, paraffin, and coconut wax blends, where it delivers a consistent, room-filling aroma.

Reed Diffusers & Room Sprays: The oil's blend of high, middle, and low volatility components ensures long-lasting diffusion in carrier oils and a powerful initial burst in alcohol-based sprays.

Oil Burners/Ultrasonic Diffusers: Used as a concentrated essence for immediate aromatic impact, ideal for creating a refined, welcoming atmosphere in living spaces, high-end retail environments, or boutique hotels.

Aesthetic Positioning: It appeals to a luxury consumer base, evoking feelings of Mediterranean travel, sophistication, and year-round comfort.

Secondary Function: Personal Care & Cosmetic Applications

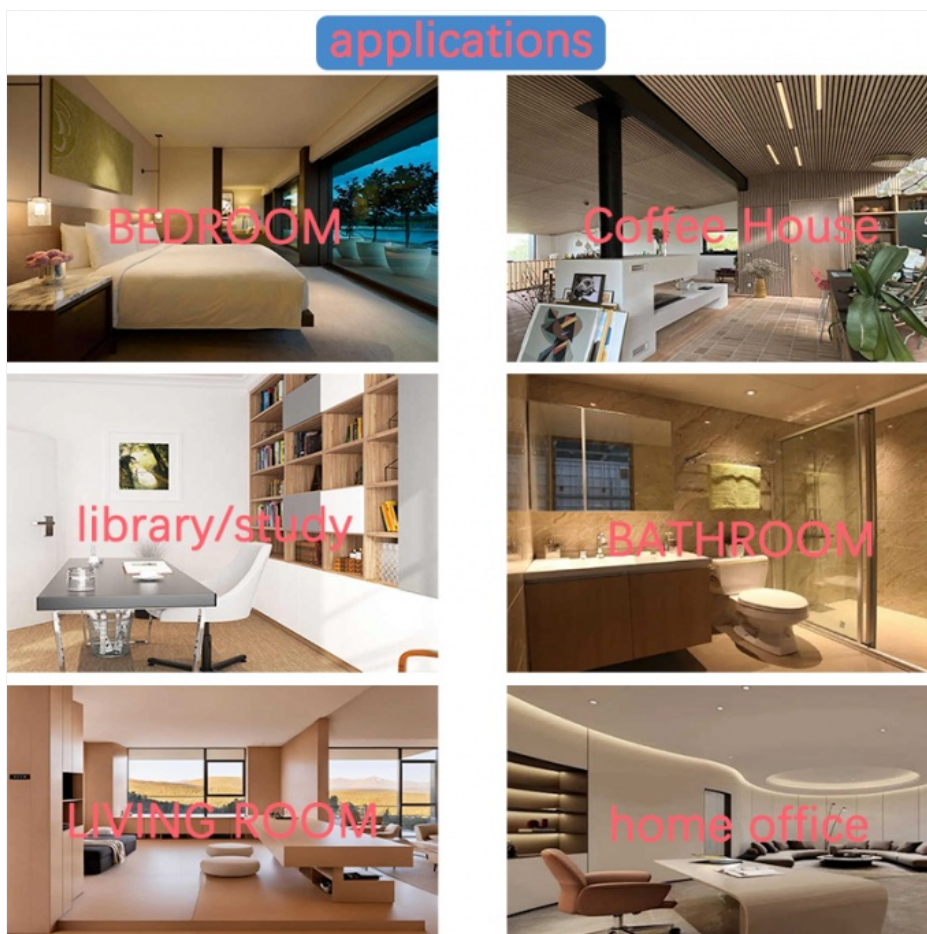

The complexity and unisex appeal of the Fig-Blackcurrant profile allow it to serve effectively as a signature aroma component in skin, hair, and bath products, adhering to strict IFRA guidelines for skin contact. The fragrance provides a memorable and often gender-neutral scent that is perceived as both refreshing (blackcurrant) and comforting (fig/wood). In this application, the woody base notes become crucial for longevity on the skin.

Cold Process (CP) Soap and Melt & Pour (M&P) Soap: Used to impart scent in solid bar soaps. Most versions are formulated to resist acceleration or ricing in CP soap, though potential discoloration (browning/tanning) due to trace vanillin content must be monitored.

Lotions, Body Butters, and Body Oils: Incorporated at low, safe usage rates to provide a subtle, long-lasting scent. It is frequently paired with skin-nourishing carriers (like jojoba or shea butter) to create 'radiance' or 'massage' oils.

Perfume and Eau de Toilette: Used as a central aromatic concentrate in alcoholic perfume bases, where its layered structure is fully appreciated as it evolves on the skin over time.

Shampoos and Shower Gels: Provides a high-end aromatic experience in foaming wash products.
