Product Description

Concentrated Raw Material Balenci aga Fragrance Perfume Oil With Free Sample For Luxurious Fragrance Making

LDZ-PL11570

Unlike alcohol-based Eau de Parfums (EDP), which contain up to 20% fragrance oil, these concentrated oils often feature a higher percentage of pure fragrance compound, sometimes up to 65% or more, resulting in exceptional longevity and a stronger, truer scent throw. They are typically oil-based, which prevents rapid evaporation and allows the fragrance to develop slowly and bond naturally with the skin, creating a long-lasting, personalized scent. This base is also gentler on sensitive skin. These oils are ideal for crafting luxurious fragrance products beyond traditional perfume.

PLAN

Fragrance Profile:

This oil is 100% alcohol-free, uncut, and designed for superior longevity and projection in luxurious fragrance-making applications like roll-on perfumes, body products, and high-end candles.

Top Notes	Sparkling Aldehydes, Bergamot, Lemon, Coriander.
Middle Notes (Heart)	Orris Root (powdery violet), Lilac, Rose, Ylang-Ylang.
Base Notes (Dry Down)	Civet, Sandalwood, Musk, Vanilla, Vetiver, Benzoin.

Here are the typical note structures for the most popular Balenci aga scents often offered as concentrated oils:

Scent Impression	Top Notes (The First Impression)	Middle Notes (The Heart)	Base Notes (The Lasting Foundation)
Balenci aga Paris	Violet Leaf, Green Accords	Violet, Carnation	Patchouli, Cedarwood, Musk
Florabotanica	Mint, Carnation	Unique Rose Accord,	Vetiver, Amber

Technical Specifications

Product Name	Balenci aga Fragrance Perfume Oil
Fragrance Profile	Floral-woody-Fruity Aromatic
Flash Point	>71°C (>160°F)
Specific Gravity	0.900 to 1.1000
Refractive Index	1.450 to 1.550
Appearance	Clear to slightly amber liquid
Middle Note Duration	2-4 hours
Base Note Longevity	6-8 hours or longer
Recommended Usage	Fine Fragrance Max Usage: ≈5.7% to 15% Soap Max Usage: ≈3.74% to 5.10%
Solubility	This concentrated oil is designed to disperse fully in oil-based carriers (like fixed oils or ethanol for perfume) and is not water-soluble.
Shelf Life	12-24 months when stored properly
IFRA Compliance	Conforms to international safety standards

Applications:

The concentrated nature and alcohol-free formula of Balenci aga "type" fragrance oils make them highly versatile for creating a range of luxurious, professional-grade scented products, allowing artisans to capture a high-end designer scent in various formats.

Fine Personal Fragrances (High-End Wearables)	Perfume Oil Roll-Ons (Attars): Mixed with a carrier oil (like Jojoba or Fractionated Coconut Oil) at a high concentration, typically 10% to 30%. This creates a long-lasting, intimate scent that stays close to the skin and is ideal for sensitive skin due to the lack of alcohol.
	Eau de Parfum (EDP): Diluted with perfumer's alcohol (around 15% to 20% oil concentration) to create a classic sprayable scent with excellent sillage (scent trail) and longevity.
	Layering Base: Used as a concentrated base layer on pulse points before applying a lighter EDP or body mist to enhance the overall depth and staying power of the fragrance.
Luxury Home & Space Fragrance	Premium Candles: Incorporated into soy, coconut, or paraffin wax at typical "fragrance load" rates of 6% to 10% of the wax weight. The high concentration ensures both excellent cold throw (scent before lighting) and hot throw (scent while burning).
	Reed Diffusers: Blended with a carrier base oil, often at a concentration of 15% to 25%, to provide a continuous, sophisticated scent in large living spaces or boutiques.

High-Quality Body Care	Soaps and Lotions: Used to scent cold process, hot process, or melt-and-pour soaps and body lotions at recommended, skin-safe levels, usually 1% to 3% for lotions and 3% to 6% of the oil weight for cold process soap.
