Product Description

Free Sample Sudan Fragrance Essential Oil

Product Code: LDZ-PL11607

Pure Sudan fragrance oils represent a pinnacle of artisanal perfumery, blending ancient East African traditions with modern olfactory standards. Primarily utilized in the production of high-end body perfumes, these oils are characterized by their exceptional longevity and viscous, alcohol-free compositions.

Sudanese fragrance oils, deeply rooted in the ancient heritage of Khumra, represent a sophisticated niche in professional perfumery. Unlike Western alcohol-based scents, these oils are prized for their viscous, resinous texture and exceptional concentration, making them an ideal base for luxury body perfumes.

Fragrance Profile

The profile is defined by a warm, "smoky-sweet" foundation. It typically utilizes *Santalum album* (Sandalwood), Musk, and *Onycha* (Dufra), which is often smoke-cured to provide a unique leathery undertone.

Due to their alcohol-free nature, these oils act as high-performance fixatives. They possess low volatility, allowing the fragrance to linger on the skin for over 24 hours, evolving into a personal "skin-scent" that reacts to body heat.

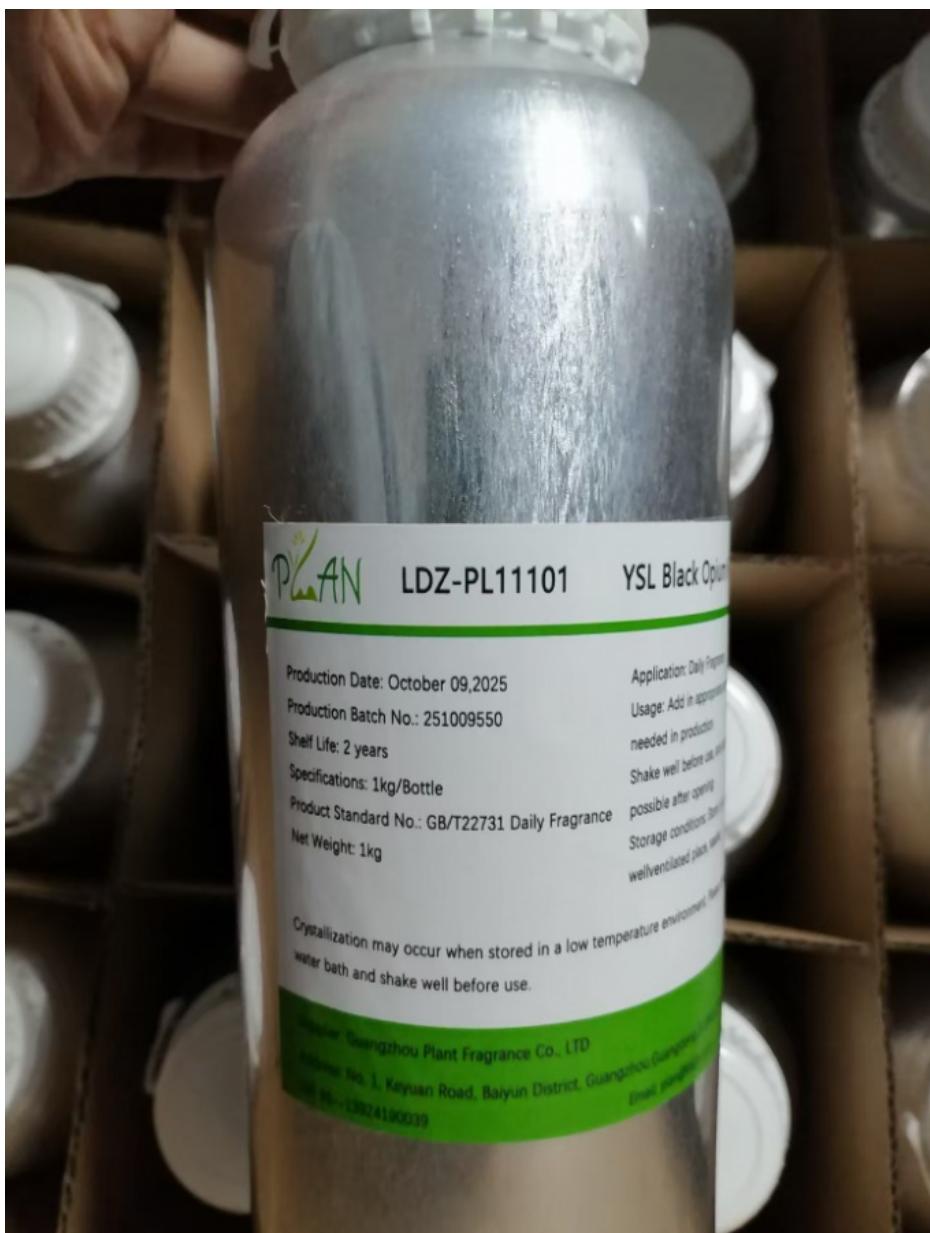

Base Notes	Heart Notes	Top Notes
Sandalwood, Musk, and Amber, often matured for months to achieve a "macerated" depth.	Spices like Clove, Cinnamon, and Mahlab seeds, which impart a characteristic warmth.	Traditional Sudanese variants may include subtle infusions of Jasmine or Frankincense.

Technical Specifications

Pure Sudan fragrance oils are high-performance ingredients designed for premium perfumery. These oils are typically characterized by their high concentration of natural resins and traditional Sudanese fixatives like Dufra and Mahlab, providing a dense, complex aromatic base.

Parameter	Specification
Fragrance Notes	Sudan Fragrance Essential oil
Appearance	Transparent to amber liquid
Relative Density	0.965–1.070 g/cm ³ @ 25°C
Refractive Index	1.490–1.515
Flash Point	>93°C (200°F)
Dosage	Fine Fragrance: 5.0% - 20.0% For Body Oils, a dosage of 5%-15% is recommended For Extrait de Parfum, use up to 30%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	≥24 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation rate ensures smoother fragrance evolution with richer layers

Applications & Functions

Primary Applications	Description
Fine Fragrance Production	This oil is engineered to serve as the "juice" for Eau de Parfum (15-20% concentration) or Eau de Toilette (5-15%). When diluted in perfumer's alcohol, it provides the classic spray experience with excellent sillage.
Anhydrous Perfume Oils	For a more intimate, long-lasting scent, blend the concentrate at 20-25% into carrier oils like Jojoba or Fractionated Coconut Oil. This is ideal for luxury rollerballs or skin-scent dabs.
Scented Body Care	The oil's clean patchouli and rose profile integrates seamlessly into body butters, lotions, and dry body oils. Recommended dosage for leave-on body products is typically 1-3%, providing a sophisticated layering base that enhances the longevity of a matching spray perfume.
Solid Perfumes	Its heat stability allows it to be stirred into molten beeswax and shea butter bases to create portable, travel-friendly solid balms.

Our Advantages

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA
MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

Support & Services

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

Fragrance Oil for Perfume Making

We Support OEM for Your Own Scent or Other Classical Flavors

We offer comprehensive technical support and services including:

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation

Packaging & Shipping

Product Packaging

Pack Type	Quantity	Specification	Volume
Plastic Bottle	5 kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038 cbm
Metal Barrel	25 kgs	D30*H45cm	0.032 cbm
Jerry Can	20-25 kgs	L29.5*D29.5*H41cm	0.33 cbm

Shipping Information

Production typically takes 3-5 days for trial orders and 5-10 days for bulk orders. We provide photo confirmation before shipping and offer multiple shipping options including sea, air, truck, and express delivery.
