

Fragrances For Soap OMO Elegant Cherry Blossom Fragrance Oil For Fabric Softener & Laundry Detergent Productions

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL50124
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilograms/Kilograms Per Day

Product Specification

**cherry blossom fragrance oil for laundry detergent
, OMO elegant fragrance oil for fabric softener, soap fragrance oil with cherry blossom scent**

Product Description

Fragrances For Soap OMO Elegant Cherry Blossom Fragrance Oil For Fabric Softener & Laundry Detergent Productions

Professional-grade aromatic compound engineered for fabric softener and laundry detergent production.

Product Code: LDZ-PL50124

Product Overview:

The High Concentrated OMO Elegant Cherry Blossom Fragrance Oil is a premier industrial-grade aromatic compound engineered specifically for the premium fabric care market. Designed to meet the rigorous stability requirements of high-efficiency (HE) laundry detergents and concentrated fabric softeners, this essence delivers a sophisticated, multi-sensory experience that defines modern cleanliness. It is professionally formulated to withstand the oxidative stress of wash cycles while maintaining a delicate, upscale floral identity that appeals to a global consumer base.

The fragrance opens with an ethereal, sparkling accord of spring cherry blossoms and white peach, creating an immediate "fresh-bloom" impact. This evolves into a romantic heart of pink peony and magnolia, providing a lush, velvety texture to the scent profile. The base is reinforced with crystalline musk and soft amber, ensuring the fragrance adheres to textile fibers with exceptional tenacity.

Fragrance Profile

The fragrance profile of the High Concentrated OMO Elegant Cherry Blossom Fragrance Oil is a sophisticated olfactive journey designed to bring the ephemeral beauty of a spring garden into the laundry cycle. This professional-grade essence is engineered with a complex three-tier structure that ensures a refreshing "scent bloom" in the water and long-lasting substantive properties on dried fabrics.

Olfactive Hierarchy

Top Notes:	The experience opens with a vibrant, sparkling burst of Japanese cherry blossoms and crisp Asian pear. Infused with hints of fresh citrus zest and green apple, these volatile notes provide an immediate sensation of airy cleanliness and revitalizing energy as soon as the detergent is dispensed.
------------	--

Middle Notes:	The heart unfolds into a lush, romantic bouquet of pink peony, mimosa petals, and Star Jasmine. This floral core provides a velvety depth that softens the overall profile, creating a luxurious "mid-wash" aroma that defines the OMO elegant character.
Base Notes:	The foundation is anchored by a warm, enduring blend of crystalline musk, creamy sandalwood, and sheer vanilla. These heavy fixative molecules are specifically chosen for their high fiber affinity, ensuring a lingering, "freshly laundered" scent that remains on garments for days after drying.

Technical Specifications:

This high-concentration formula is optimized for advanced scent-encapsulation technologies, allowing for "burst-on-touch" freshness that lasts for weeks in storage. Non-discoloring and chemically inert, it ensures the visual and structural integrity of the detergent remains uncompromised, making it the definitive choice for manufacturers seeking to combine artisanal elegance with industrial performance.

Parameter	Specification

Odor Profile	OMO Elegant Cherry Blossom Fragrance Oil
Appearance	Pale yellow transparent liquid
Fragrance Concentration	>65%
Relative Density	1.015 - 1.060 (g/cm³ @ 20°C)
Refractive Index	1.5250 - 1.5350 (20°C)
Flash Point	> 100°C (212°F)
Odor Intensity	High intensity, rich and long-lasting
Usage Rate	Detergent: 0.5% - 1.2% Fabric Softener: 1.0% - 2.5% Fabric Booster: 3% - 5%
Solubility	Soluble in DPG/IPM; Dispersible in Water
IFRA Compliance	Compliant with latest IFRA standards, no banned substances
Stability	Stable over pH range 4.0 - 8.0, suitable for mainstream laundry formulations
Longevity	≥ 24 hours
Storage Conditions	Store tightly closed in cool, dry place (15-25°C) away from light

Applications & Functions

Functions:

The primary function of this essence oil is to deliver a high-impact olfactory signature that serves as a hallmark of premium care. It functions as a powerful masking agent, neutralizing the pungent chemical odors of raw surfactants and active cleaning enzymes found in heavy-duty detergents. Beyond basic scenting, it utilizes substantivity technology—its molecular structure is engineered to anchor firmly to textile fibers, resisting being washed away during the rinse cycle. This ensures a controlled release of fragrance over time, providing a "freshness bloom" triggered by movement or friction. Its high concentration also allows for lower dosage rates, functioning as a cost-effective solution for large-scale industrial manufacturing.

Industrial Applications:

This fragrance oil is specifically optimized for diverse formats within the fabric care industry. In Liquid and Powder Detergents, it is used to provide an immediate burst of spring freshness during the wash cycle, ensuring the product remains stable in high-pH environments. For Concentrated Fabric Softeners, the oil is blended with cationic surfactants to impart a velvety, long-lasting scent that lingers for weeks on linens and apparel. It is also an essential component in In-Wash Scent Boosters (beads or crystals), where its high concentration is leveraged to provide an intensified, localized aroma. Beyond household use, it finds extensive application in Commercial & Hospitality Laundry Services, where it maintains its integrity under the mechanical stress of industrial machinery and high-heat drying. Finally, it is increasingly used in Fabric Refreshing Sprays, where it acts as a quick-dry deodorizer for upholstery and delicate garments that require a "hotel-grade" finish without a full wash.

Additional Applications:

Scent Boosters - Creating high-intensity fragrance crystals or beads

Ironing Sprays - Providing smooth glide with fresh steam release

Industrial Textile Finishers - Commercial laundering for hotels and healthcare sanitation

applications

BEDROOM

Coffee House

library/study

BATHROOM

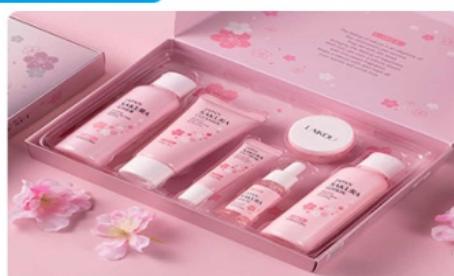

LIVING ROOM

home office

applications

Quality & Manufacturing

Our advanced production facilities and rigorous quality control processes ensure consistent, high-performance fragrance oils for industrial applications.

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA
MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

Technical Support & Services

Our R&D team, including PhDs and senior engineers, collaborates with university laboratories to integrate global technology and continuous innovation in natural ingredients.

We assist customers in improving product aroma and quality while reducing production costs, with tailored solutions for different daily necessities.

OEM Services Available

We support custom scent development and classical flavor replication. Contact us for personalized fragrance solutions.

Comprehensive Support Includes:

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for issues and concerns
- Product customization services
- Assistance with regulatory compliance

Packaging & Shipping

Product Packaging

Pack Type	Quantity	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Shipping Information

Production begins immediately after payment confirmation. Standard lead times: 3-5 days for trial orders, 5-10 days for bulk orders. We provide photos or samples for confirmation before shipping. Multiple shipping options available including sea, air, truck, or express delivery based on client requirements.
