

Flowery Perfume Fragrances HELLO DARLING Victoria Secret Fragrance Oil For Daily Using Perfume Making

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL10263
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Specification

- Gender: Unisex
- Application: Rose Perfume Making
- Style: Unisex
- Longevity: 8-10 Hours
- Bottle Size: 1kg,5kg,25kg
- Service: OEM ODM Accept
- Age Group: Adults
- Topnotes: Bergamot, Lemon, Pear
- Industrial Use: Perfume
- Middle Notes: Jasmine, Rose, Lily Of The Valley
- From: Liquid Concentrate Oil
- Concentration: 65-95%

Product Description

Flowery Perfume Fragrances HELLO DARLING(Victoria Secret) Fragrance Oil For Daily Using Perfume Making

Product Code: LDZ-PL10263

The HELLO DARLING (Victoria's Secret Type) fragrance oil is a vibrant, flirtatious, and sophisticated aromatic blend designed for the modern woman. Classified as a Floral-Fruity fragrance, it captures a playful yet elegant essence, making it an exceptional choice for daily-wear perfume formulations.

It's a highly concentrated fragrance oil, offering excellent cold and hot throw in various bases, and it's skin-safe, formulated for topical use in Eau de Parfums, body mist and lotions. Besides, it's a long-lasting fragrance oil, engineered with fixatives that preserve the delicate nectarine notes throughout the day.

The scent architecture opens with a refreshing burst of white nectarine, providing a crisp, succulent top note that immediately energizes the senses. This transitions seamlessly into a lush heart of peony and sea spray, adding a soft, romantic florality balanced by a hint of aquatic brightness. The base is anchored by subtle woody undertones and skin-musk, ensuring a smooth, clean finish that lingers beautifully on the skin.

Fragrance Profile:

The HELLO DARLING (Victoria's Secret Type) fragrance oil is a masterful interpretation of the classic floral-fruity-gourmand profile. Crafted specifically for daily perfume making, this professional-grade oil is celebrated for its flirtatious, airy, and "bright" character. It offers a balanced olfactive journey that transitions from succulent fruits to a soft, romantic heart.

Top Notes:	The fragrance makes an immediate, sparkling impression with the zesty brightness of White Nectarine. This top layer provides a crisp, honeyed fruitiness that feels both refreshing and sun-drenched, designed to energize the senses upon application.
Middle Notes:	As the initial sparkle mellows, the heart reveals a lush bouquet of Fresh Peony. This middle note adds a delicate, feminine florality that mimics the scent of a blooming garden, grounding the sweetness with an elegant, "flowery" grace.
Base Notes:	The dry-down is anchored by a warm, skin-hugging base of Soft Musk and subtle Vanilla. These fixatives ensure the fragrance maintains its longevity, providing a creamy, clean finish that lingers beautifully throughout the day.

Technical Specifications:

To formulate professional-grade perfumes using the HELLO DARLING (Victoria's Secret Type) fragrance oil, it is essential to adhere to standard industry technical parameters. This oil is a concentrated aromatic compound designed for high solubility in perfumer's alcohol and carrier oils.

Parameter	Specification
Fragrance Notes	Concentrated HELLO DARLING(Victoria Secret) Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.940–1.050 g/cm³ @ 25°C
Refractive Index	1.450–1.510
Flash Point	>93°C (200°F)
Dosage	Fine Fragrance: 15% - 20% For Body Oils, a dosage of 3%-5% is recommended
Diffusion Ability	Excellent aroma

Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation rate ensures smoother fragrance evolution with richer layers

Applications & Functions:

In the chemistry of perfumery, this fragrance oil is not just a scent; it is a performance-engineered compound.

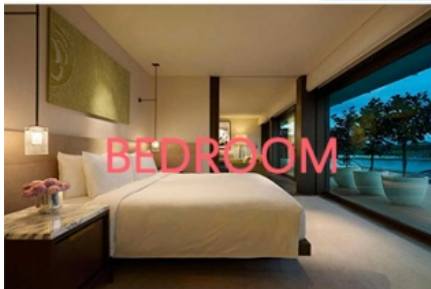

Olfactory Core & Evolution:	Its primary function is to serve as the "heart" of a product. It is engineered with specific molecular weights to ensure a smooth transition from the volatile top notes (Nectarine) to the heavier base musks. This prevents the "scent gap" common in amateur blends where the fruit disappears before the floral heart develops.
Tenacity & Fixation:	The oil contains synthetic fixatives that slow down the evaporation of lighter molecules. In daily-wear perfumes, this ensures the "freshly applied" fruity impression lasts significantly longer than natural fruit extracts would.
Solubilization Agent:	It functions as a highly stable solute. Whether mixed with SDA 40-B (Alcohol) or carrier oils like Jojoba, it is designed to remain in a homogenous state, preventing cloudiness, separation, or "beading" in the bottle.
Masking Capability:	Technically, it serves to neutralize the sharp, medicinal odor of high-proof alcohol or the fatty-acid scents of lotion bases, replacing them with a high-end "prestige" aroma profile.

Because of its stability and skin-safe profile, this oil is a "multi-purpose" concentrate used across various cosmetic categories.

Fine Fragrance (Eau de Parfum):	The most common application. Used at a 15–25% concentration, it creates a high-projection perfume. It is ideal for "Daily Signature" lines because the Nectarine/Peony profile is mass-appealing and non-offensive in office or public settings.
Body Care & Layering Products:	It is used at 3–5% in body lotions and shower gels. Because the oil is resistant to hydrolysis (it doesn't break down in water-based formulas), the scent remains true even in soaps and shampoos.
Aromatherapy-Inspired Mists:	In "Hair Mists" or "Linen Sprays" (2–3% dosage), it provides a refreshing atmosphere. The aquatic "sea spray" notes in the oil make it particularly effective for products marketed as "fresh" or "revitalizing."
Solid & Oil-Based Perfumes:	In anhydrous (water-free) formulas like beeswax solids or rollerball oils, it provides an "intimate" scent experience. The warmth of the skin activates the musk and peony base, making it a favorite for travel-sized "on-the-go" applications.

Our Advantages

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, HACCP, IFRA, SPEC

Support & Services

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

Fragrance Oil for Perfume Making

We Support OEM for Your Own Scent or Other Classical Flavors

We offer comprehensive technical support and services including:

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation

Packaging & Shipping

Product Packaging

Pack Type	Quantity	Specification	Volume
Plastic Bottle	5 kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038 cbm
Metal Barrel	25 kgs	D30*H45cm	0.032 cbm
Jerry Can	20-25 kgs	L29.5*D29.5*H41cm	0.33 cbm

Shipping Information

Production typically takes 3-5 days for trial orders and 5-10 days for bulk orders. We provide photo confirmation before shipping and offer multiple shipping options including sea, air, truck, and express delivery.
