### Product Description

#### Yara Lattafa (Yellow) Fragrance Oil

Product Code: LDZ-PL11680

The YARA TOUS (Lattafa Yellow Type) fragrance oil is a sophisticated tropical-gourmand concentrate designed for high-end perfume production. This professional-grade oil features a sun-drenched, "vacation-in-a-bottle" aesthetic, making it ideal for daily-wear signature scents that balance exotic fruitiness with creamy warmth.

For perfume production, this oil serves as a highly stable aromatic core with excellent solubility in SDA 40-B perfumer's alcohol and carrier oils. Its dense molecular structure provides superior fixation, ensuring bright fruit notes are anchored by a creamy base for 6-8 hours of wear. Perfect for creating Eau de Parfum concentrations (15-20%) that project a cheerful, vibrant aura.

### Fragrance Profile

<b>Top Notes</b>	A vibrant, succulent opening of Ripe Mango, Creamy Coconut, and Passionfruit. This tropical trio provides an immediate burst of juicy energy.
<b>Middle Notes</b>	The heart transitions into a sophisticated floral bouquet of Heliotrope, Jasmine, and Orange Blossom, adding a velvety, powdery elegance.
<b>Base Notes</b>	A long-lasting, addictive finish of Vanilla, Musk, and Cashmeran ensures a smooth, skin-hugging dry-down with impressive tenacity.

## Applications & Functions

In perfume manufacturing, this fragrance oil serves as a multidimensional olfactory engine providing a stable tropical-gourmand profile that remains consistent across batches. Technically, it acts as a structural anchor; formulated with heavy-molecule lactones (for coconut accord) and vanillin, which function as natural fixatives. These molecules slow down evaporation of volatile mango and passionfruit esters, ensuring linear scent release rather than rapid dissipation.

The oil functions as a solubilizing agent, designed to integrate perfectly with 95%-99% perfumer's alcohol without causing cloudiness. It possesses oxidative stability, protecting the bright fruit notes against degradation when exposed to air during bottling, preserving fragrance integrity for longer shelf life.

## Versatile Applications

The Yara Yellow profile enables diverse applications across Fine Fragrance and Personal Care sectors:

**Fine Perfumery:** Ideal for Eau de Parfum (EdP) formulations at 15-20% concentration, creating high-projection "vacation-style" signature scents

**Body Oils & Dry Oil Sprays:** Premier choice for 5-10% dosage applications where oil base enhances tropical mango notes

**Cosmetic Manufacturing:** Applied to luxury body butters, shimmering lotions, and after-sun creams (1-3% dosage) for comforting exotic aroma

**Hair Mists:** Excellent candidate where gourmand-floral notes mask hair treatment chemicals while providing long-lasting, breezy trail
