#### Product Specification

- Scent Type: Fruity, Floral, Woody, Spicy, Fresh
- Type: Scented Candle
- Wick: Lead-free Cotton Wick
- Application: Candle/diffuser
- Delivery: 3-5 Working Days
- Fragrance Notes: Top, Middle, Base Notes
- Solubility: Both Oil-Soluble And Water-Soluble
- Packing Way: Plastic Or Iron
- Weight: 1000g / 5000g / 25kg
- Sustainable: Yes
- Color: Varies By Fragrance
- Fragrance Intensity: Medium
- Wick Material: Cotton / Wood
- Appearance: Fragrance Oil
- Highlight: Gourmand fragrance oil for candles.

### Product Description

#### Sea Salt Caramel Pudding Essence Fragrance Oil

Premium fragrance oil for scented candle production with free sample included. Product Code: LDZ-PL40213

The Sea Salt Caramel Pudding Essence is a sophisticated gourmand masterpiece engineered for high-performance scented candle production. This fragrance transcends simple sweetness, offering a complex, multi-sensory experience that balances decadent creaminess with sharp, mineral accents. It is designed to evoke the comforting warmth of a luxury dessert while maintaining a refined profile suitable for premium home branding.

This essence is defined by its indulgent, cozy, and high-tenacity nature. It is an ideal choice for "Autumn/Winter Collections," "Kitchen Comforts," or "Luxury Bakery" themes. Its robust chemical structure ensures excellent stability in high-fragrance-load wax formulations, delivering a consistent, "room-filling" aroma.

## Fragrance Profile

<b>Top Notes</b>	The scent opens with a compelling contrast of fleur de sel (sea salt) and a hint of burnt sugar. This mineral edge provides immediate "nose-feel" and prevents the composition from becoming overly saccharine, creating an instant, sophisticated intrigue.
<b>Middle Notes (Heart)</b>	At its core lies a rich, buttery caramel and warm custard accord. These notes provide the "body" of the fragrance, mimicking the velvety texture of a fresh pudding. Subtle nuances of toasted nuts add a dry, savory complexity that enhances the realism of the gourmand profile.
<b>Base Notes</b>	The foundation is built on Madagascar vanilla bean, dark molasses, and a touch of sweet cream. These heavy molecular-weight notes ensure a powerful, long-lasting hot throw and a comforting, balsamic lingering scent.

## Technical Specifications

In the professional production of gourmand-themed candles, the Sea Salt Caramel Pudding Essence is classified as a high-density, aromatic compound. Its technical profile is defined by a significant vanillin content and a heavy molecular base, which requires specific handling during the "stir-in" phase to ensure a stable emulsion within the wax matrix.

Due to its high Flash Point (typically above 93°C), this oil is exceptionally safe for high-heat paraffin and soy blends, allowing for a thorough "hot throw" development without the risk of aromatic degradation. Its Relative Density is slightly higher than citrus or floral oils, meaning it provides a substantial "body" but requires vigorous stirring at approximately 75°C to prevent settling.

<b>Appearance</b>	Clear to pale yellow liquid
<b>Relative Density</b>	1.020 to 1.080 g/cm³ @ 25°C
<b>Refractive Index</b>	1.490 - 1.525 @ 20°C
<b>Flash Point</b>	>200°F (>93.3°C)
<b>Ingredients</b>	Natural & Synthetic Aromatic Compounds
<b>VOC Content</b>	< 1% - Environmentally friendly formula that meets regulatory standards such as the California Air Resources Board (CARB)

<b>Recommended Dosage</b>	Soy/Natural Waxes: 8% - 10% for optimal "Hot Throw." Paraffin Wax: 6% - 10% (approx. 1.0 - 1.3 oz per lb of wax)
<b>Thermal Diffusion</b>	Excellent. It can fill a space of 20-30 square meters in 3-5 minutes after lighting
<b>Cold Throw</b>	Excellent - Has a noticeable aroma even when unburned
<b>Hot Throw</b>	Excellent - The aroma spread is strong and steady while burning
<b>Wax Compatibility</b>	Excellent - Blends seamlessly with a variety of common waxes, including soy wax, beeswax, coconut wax, paraffin wax, and blends, without affecting the wax structure or combustion performance
<b>Solubility</b>	Easily soluble in ethanol and propylene glycol to ensure uniform dispersion in the formula
<b>Compatibility</b>	Compatible with most anionic, nonionic, and zwitterionic surfactants
<b>Shelf Life</b>	Store in a cool, dark place, shelf life 24 months
<b>IFRA Compliance</b>	It complies with the International Fragrance and Fragrance Association (IFRA) standards and has passed skin irritation testing to ensure its safety in home environments

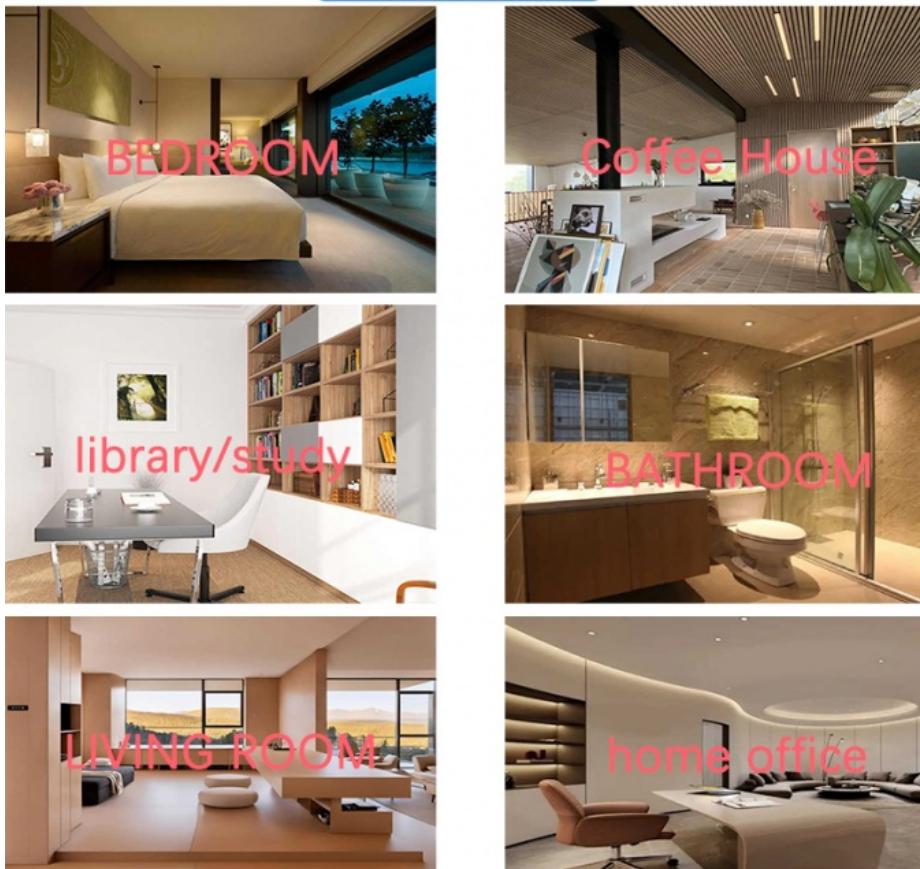

## Functions & Applications

The Sea Salt Caramel Pudding Essence functions as a high-performance olfactory stimulant designed to create a "cocooning" atmosphere through complex gourmand chemistry. Its primary technical utility is its thermostability; the oil is engineered to prevent the "sugar notes" from caramelizing or scorching during the combustion process, maintaining a true-to-life aroma. It acts as a fixative agent within the wax, utilizing heavy molecular base notes like vanilla and molasses to slow the evaporation of lighter aromatic compounds. This results in an exceptionally sustained release profile, ensuring the candle maintains its scent integrity from the first ignition to the final burn.

This essence oil is a cornerstone for the gourmand and seasonal home fragrance markets. Its primary application is in the manufacture of luxury container candles and heavy-duty wax melts, where a robust and indulgent "room-filling" scent is the key selling point. Due to its comforting and nostalgic profile, it is an ideal candidate for limited-edition holiday collections or "bakery-style" artisanal ranges. Beyond traditional candles, its rich profile is highly effective in electric oil warmers and scented ceramic discs, where consistent heat facilitates the release of its dense aromatic layers.

### Our Advantages

## 100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA  
MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

## Support and Services

We definitely have the fragrance essence oils you need! The Plant Flavours & Fragrance company has a R&D team consisting of several PH.Ds and senior engineers, and has established associated laboratory with many universities and college. Meanwhile the company integrates global technology, information and resource to keep advantage of our products and services by continuous innovation on natural ingredients.

The company has always been closed to assist customers to improve the aroma of products and structure of the quality and reduce production costs, tailored to customers, to meet the aroma needs of different daily necessities, we are one of the best enterprises of cost and services in the industry.

Fragrance Oil for perfume making, We Support OEM Your Own Scent Or Other Classical flavor. Contact Us For Inquiry NOW.

Where there are fragrance, there are plant flavor. The reason why our enterprise develops so rapidly is that we gradually meet the demands of our customer by improving the quality of their products and shortening their good deliver time. In case of urgent demands of customers, we adopt our contingency measures to help our customers solve the problem in time.

Meantime, we offer Training and Education on fragrance formulation and usage for the customized who interested in our fragrance. Our Fragrance Oil product comes with comprehensive technical support and services to ensure that our customers have a seamless experience.
