## Product Description

### Fragrance Perfume Wholesale Sage & Sea Salt Fragrance Oil For Daily Using Perfume Making

**Product Code: LDZ-PL11233**

Sage & Sea Salt is a masterclass in understated elegance, capturing the raw essence of a windswept shoreline. Unlike heavy, traditional perfumes, this fragrance profile is celebrated for its aromatic, mineral, and woody characteristics, making it a premier choice for a versatile daily signature scent.

This fragrance is prized for being unobtrusive and gender-neutral. It lacks the cloying sweetness of gourmands, making it ideal for the office or casual outings. It creates an "aura" of cleanliness and calm rather than a heavy trail.

PZAN

**Fragrance Profile:**

<b>Top Notes</b>	Usually opens with a bright, tart burst of Ambrette seeds or red algae, providing a unique, slightly nutty texture that mimics the crispness of sea air.
<b>Middle Notes</b>	The soul of the fragrance is Sea Salt. It provides a mineral quality that feels "crunchy" and fresh, avoiding the synthetic "blue" smell of cheaper aquatic scents.
<b>Base Notes</b>	Woody Sage anchors the fragrance. It offers an earthy, aromatic warmth that prevents the scent from being too cold, reminiscent of driftwood and wild herbs growing along a cliffside.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Concentrated Sage & Sea Salt Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.8920–0.9320 g/cm³ @ 25°C
Refractive Index	1.4510–1.4650
Flash Point	>93°C (201°F)
Dosage	Eau de Toilette (EDT):10%-12% Eau de Parfum (EDP): Mix at 15-18%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards

Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation rate ensures smoother fragrance evolution with richer layers

### Applications & Functions:

The primary function of Sage & Sea Salt fragrance oil is to serve as an aromatic anchor that bridges the gap between fresh aquatic notes and earthy wood tones. In a perfume composition, it functions as a "mineral" scent, providing a unique texture that feels crisp and airy rather than heavy or cloying. Its chemical stability ensures it acts as a fixative for lighter citrus top notes, helping to extend their life on the skin. Furthermore, its non-discoloring properties (due to the absence of vanillin) allow it to maintain the visual clarity of the final product. Functionally, it is designed to be non-fatiguing, meaning it doesn't overwhelm the olfactory system, making it perfect for "invisible" scents. It also functions effectively as a unisex balancer, stripping away traditional gender markers like intense florals or heavy musks to create a scent profile that feels clean, natural, and universally appealing.

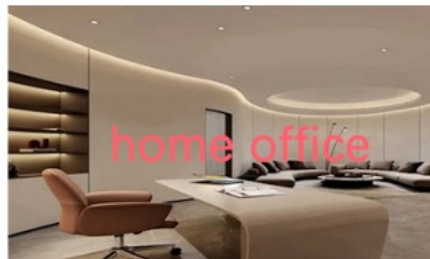

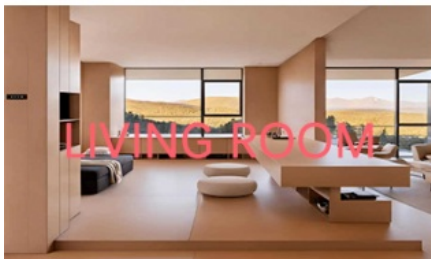

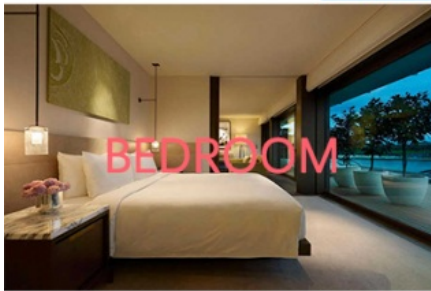

### Versatile Applications:

Beyond high-end perfumery, this fragrance oil is incredibly versatile across various personal care and home applications. In fine fragrance, it is the gold standard for creating "skin-scent" Eau de Toilettes or convenient travel roll-ons. Its high flash point and skin-safe profile make it ideal for body care products, such as luxury body lotions, shower gels, and dry body oils, where it provides a refreshing, spa-like experience. In home fragancing, it is a popular choice for reed diffusers and soy wax candles because the mineral salt notes throw exceptionally well in both cold and hot states, creating a "coastal retreat" atmosphere. Additionally, it is frequently used in hair mists and linen sprays due to its light, unobtrusive nature, offering a breath of fresh air

to fabrics without being stifling. Its compatibility with other essential oils also makes it a favorite base for custom-blended aromatherapy products and artisanal soaps.

## applications

Our Advantages:

## 100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

## Support & Services

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

### Fragrance Oil for Perfume Making

We Support OEM for Your Own Scent or Other Classical Flavors

### Comprehensive Technical Support

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
