Product Description

Essence Oil Perfume Nile Garden Fragrance Essence Oil For Daily Using Perfume Making With Free Sample

Product Code: LDZ-PL10313

The Nile Garden fragrance essence is a refreshing and evocative aromatic oil, often inspired by the "Un Jardin sur le Nil" olfactory concept. It is designed to capture the vibrant, life-giving essence of a riverside oasis, making it a favorite for both personal DIY perfumery and professional cosmetic production.

This essence is defined by its unusual and invigorating "green" fruity-floral profile. It avoids traditional sweetness in favor of a crisp, aquatic, and botanical realism. It is highly sought after for its ability to convey a sense of serenity and natural luxury, making it ideal for high-end unisex fragrance lines.

Fragrance Profile

The Nile Garden Fragrance Essence is a masterful "green-fruity-floral" composition, designed to evoke the shimmering, life-giving atmosphere of a riverside oasis. Its profile is celebrated for its refreshing botanical realism and unique tartness, moving away from traditional sugary scents toward a sophisticated, airy elegance.

Top Notes	The fragrance opens with a vibrant, unconventional burst of Green Mango and Grapefruit, accented by the vegetal crispness of Tomato Leaf and Carrot. This creates an immediate sensation of sun-drenched, tart freshness.
Middle Notes	The heart transitions into a serene aquatic florality. It prominently features the delicate, misty scent of Lotus and Orange Flower, intertwined with the earthy, reed-like aroma of Bulrush and Peony, mimicking a garden in full bloom by the water.
Base Notes	The dry-down is grounding and sophisticated, utilizing Sycamore Wood, Incense, and Iris. These notes provide a clean, slightly powdery, and woody finish that ensures lasting sillage and a "quiet luxury" trail.

Technical Specifications

Parameter	Specification
Fragrance Notes	Concentrated Nile Garden Fragrance Essence Oil
Appearance	Transparent to amber liquid
Relative Density	0.925–1.045 g/cm ³ @ 25°C
Refractive Index	1.460–1.520
Flash Point	~98°C (208°F)
Dosage	Eau de Parfum (EDP): 15% – 20% Eau de Toilette (EDT): 10% – 12% Personal Care (Lotions/Soaps): 1% – 3% Reed Diffusers: 20% – 25%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation rate ensures smoother fragrance evolution with richer layers

Applications & Functions

The primary function of this essence is sensory revitalization and psychological uplifting. Its specific molecular structure, rich in tart citrus and vegetal aldehydes, acts as a "brightener" for the wearer, effectively cutting through mental fog and promoting a state of calm alertness. From a technical standpoint, it functions as a high-clarity aromatic base, designed to remain "transparent" even in dense formulations like oil-based roll-ons or thick creams. Unlike heavier oriental or gourmand scents, its chemical composition is engineered to prevent olfactory fatigue, making it a "polite" fragrance that is easily tolerated in shared environments. Additionally, it contains fixative elements that help anchor volatile top notes like green mango, ensuring the scent evolves gracefully on the skin rather than evaporating instantly.

Industrial Applications

In professional production, this essence is remarkably versatile. Its most prominent application is in Fine Fragrance crafting, where it serves as the foundation for Eau de Toilette and unisex body mists that require a "naturalist" or "niche" appeal. In the Home Ambiance sector, it is the gold standard for high-end reed diffusers and ultrasonic atomizer oils, as its watery, lotus-heavy heart notes create an expansive, airy feel in indoor spaces. Furthermore, it is widely utilized in Premium Personal Care, specifically for "spa-grade" hair and body dry oils, where its fast-absorbing profile complements the non-greasy nature of the carrier. It is also an excellent choice for luxury guest amenities, such as soaps and shampoos, providing a sophisticated, "expensive-hotel" scent profile that appeals to a wide demographic of daily users.

Research & Development

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

Support & Services

- OEM support for custom scents and classical flavors
- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services

Assistance with regulatory compliance
