Applications & Functions

This high-tenacity olfactory anchor is engineered for daily-wear personal fragrances with sophisticated molecular structure. The formulation utilizes specialized fixative musks and mineral ambers to slow evaporation rate, maintaining structural integrity on skin for 8-12 hours.

Optimized for solubility and clarity in ethanol-based systems, it acts as a stabilizer within perfume's hydro-alcoholic matrix, preventing compound precipitation during temperature fluctuations.

Industrial Applications

Primarily used in premium personal care and fine fragrance industries for prestige market segments. Ideal for Eau de Parfum (EDP), Eau de Toilette (EDT), luxury perfume oils, roll-on concentrates, aftershave balms, solid perfumes, scented body lotions, and prestige hair mists.

Application	Description
Niche Fine Fragrances	Premier choice for manufacturing Extrait de Parfum and "Intense" editions for luxury unisex market
Premium Personal Grooming	Popular in artisan beard oils, solid perfumes, and aftershave balms for sophisticated differentiation
Atmospheric Home Scenting	Widely used in luxury soy candles and reed diffusers for mood-setting ambiance in premium spaces
Bespoke Cosmetic Lines	Integrated into body creams and body washes for lingering, skin-hugging musk effects
