

## Body Wash Fragrance Camellia Fragrance Oil For Shampoo and Shower Gel & Scented Soap Production/ Making- IFRA

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL20534
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41\*28\*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

### Product Specification

- Highlight: **Camellia fragrance body wash oil, Shampoo fragrance oil for soap making, IFRA certified scented soap oil**

## Product Overview

The Camellia fragrance oil is a serene and opulent floral essence specifically refined to bring a sense of Zen-like luxury and Eastern elegance to high-end personal care productions. As a premier choice for shampoos, shower gels, and artisanal soaps, it is celebrated for its ability to transform daily cleansing rituals into restorative, spa-like experiences.

The scent profile is characterized by a delicate, powdery sweetness seamlessly blended with a distinctive green tea undertone, offering a sophisticated alternative to traditional, heavy florals. It typically opens with soft, aqueous notes and hints of white plum before unfolding into a lush heart of camellia petals, white jasmine, and pink peony. This "transparent" floralcy is grounded by a base of light sandalwood and soft musk, ensuring a clean, expensive "skin-scent" finish that lingers gently after use.

Engineered for high performance in wash-off products, the oil remains remarkably stable during saponification in soap making and maintains its nuanced, tea-like clarity in hair care formulations, making it a timelessly elegant staple for makers of luxury bath and body collections.

## Fragrance Profile & Characteristics

The Camellia fragrance oil is defined by its "Zen" elegance—a harmonious blend of soft floralcy and botanical freshness. Unlike the intense sweetness of a rose, Camellia possesses a clean, tea-like characteristic that feels both sophisticated and restorative. It is prized in personal care for its "transparent" profile, which provides a high-end, spa-like aura without being overwhelming.

<b>Top Notes</b>	The scent opens with a delicate, watery accord featuring white plum, bergamot, and green tea leaves. This provides a crisp, slightly tart introduction that mimics the dew-covered petals of a winter blossom.
<b>Middle Notes</b>	At its heart lies the signature Camellia Japonica, supported by white jasmine and pink peony. These notes offer a velvety, powdery floral texture that is romantic yet airy and clean.
<b>Base Notes</b>	The fragrance settles into a calming foundation of blondewoods, light sandalwood, and white musk. This ensures a lingering, "clean-skin" finish that feels exceptionally smooth and luxurious.

## Technical Specifications

Product Name	Camellia Fragrance Oil
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.905 to 0.945 g/cm <sup>3</sup> @ 25°C
Flash Point	>90°C
Refractive Index (RI)	1.453 to 1.488 (at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards
Solubility	Soluble in surfactant-based systems

## Recommended Usage Rates

Application	Usage Rate
Shower Gel & Body Wash	1.5% - 5.0%

Shampoo & Conditioner	1.0% - 3%
Liquid Hand Soap	0.5% - 2%
Cold Process Soap	3% - 6%
Body Lotion/Cream	0.2% - 1%

## Functions and Applications

### Professional Functions

The primary function of Camellia fragrance oil is to provide a calming, luxury-tier sensory experience that enhances the perceived quality of personal care products. In cosmetic science, it serves a dual role: it functions as an olfactory masking agent, neutralizing the medicinal or chemical base odors of raw surfactants and soap bases, while simultaneously acting as a mood-stabilizer.

The "Zen" profile of camellia, with its tea-like nuances, is psychologically linked to relaxation and renewal, making it a functional tool for "spa-at-home" branding. Technically, the oil is engineered for aqueous stability and high-performance scent retention in wash-off systems. It is formulated to be "non-accelerating" in soap making, meaning it doesn't cause the soap batter to seize prematurely. Furthermore, it functions as a lingering skin-scent, using sophisticated fixatives to ensure that a delicate, clean floral trail remains on the skin and hair long after the steam of the shower has dissipated.

### Applications

Camellia fragrance oil is specifically optimized for liquid and solid surfactant-based applications, making it a staple in the production of high-end bath and body care. Its most prominent application is in shampoos and hair conditioners, where its botanical clarity leaves hair smelling fresh without being cloying. In shower gels and body washes, it is used to create a silky, aromatic lather that appeals to consumers seeking a "clean and green" aesthetic.

For artisanal soap making, it is highly compatible with both cold-process and melt-and-pour methods, as it resists discoloration and maintains its nuanced floral heart through the saponification process. Beyond the shower, it is an excellent choice for moisturizing body lotions and hand creams, providing a sophisticated "designer" finish to leave-on products. Additionally, it is often applied in luxury bath salts and foaming milk baths, where its powdery sweetness disperses beautifully in warm water, creating a serene, immersive environment for relaxation and skincare rituals.

## Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Production begins immediately after payment (3-5 days for trial orders, 5-10 days for bulk orders). We provide photos or samples for confirmation before shipping via ship, air, truck, or express according to customer requirements.
