

Concentrated Flower bomb (Viktor & Rolf) Fragrance Essence Oil for Perfume Making with IFRA Compliance

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL10378
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Specification

- Relative Density: 0.985–1.060 G/cm³ @ 25°C
- Highlight: **Viktor & Rolf fragrance essence oil, IFRA compliant perfume oil, concentrated flower bomb perfume**

Product Description

Concentrated Flower bomb (Viktor & Rolf) Fragrance Essence Oil for Perfume Making with IFRA Compliance

Product Code:LDZ-PL10378

This concentrated fragrance essence, inspired by the iconic Flowerbomb by Viktor & Rolf, represents a high-performance aromatic compound meticulously engineered for the rigorous demands of professional perfumery and luxury product manufacturing. Defined by its opulent oriental floral gourmand character, the oil is designed to deliver an explosive olfactory experience that strikes a sophisticated balance between dense florality and addictive, sugary warmth. The scent architecture opens with a bright, sophisticated burst of tea, bergamot, and osmanthus, which transitions seamlessly into a lush, expansive heart of Sambac jasmine, Cattleya orchid, freesia, and Centifolia rose. This multi-faceted bouquet is anchored by a potent, earthy base of patchouli and musk, subtly sweetened with gourmand accords to ensure a warm, creamy dry-down with exceptional sillage. For the professional producer, this essence offers significant manufacturing advantages, including a high fixative value and chemical stability that allows it to maintain its structural integrity at high concentrations. Whether utilized for Eau de Parfum production, prestige body care, or ambient scenting, it provides a "crowd-pleasing" prestige profile that effectively masks base odors while delivering the long-lasting, high-impact sensory signature associated with international luxury brands.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The Top Notes deliver an immediate, sophisticated freshness, utilizing a crisp blend of Green Tea and Bergamot, accented by the soft, apricot-like nuances of Osmanthus. This combination ensures a bright, airy opening that effectively balances the intensity of the floral heart to follow.
Middle Notes (Heart)	As the fragrance matures, the Middle Notes explode into a lush, "ultra-feminine" bouquet. This heart is dominated by the richness of Sambac Jasmine and Centifolia Rose, supported by the exotic, creamy tones of Cattleya Orchid and Freesia. This floral explosion provides the signature "bomb" effect, creating a dense and expansive core.
Base Notes (Foundation)	Finally, the Base Notes anchor the composition with a deep, seductive foundation of Patchouli and Musk. These earthy elements are subtly intertwined with a gourmand warmth, ensuring a long-lasting, creamy sillage that remains memorable for hours.

Technical Specifications

Parameter	Specification
Fragrance Notes	Flower bomb (Viktor & Rolf) Fragrance Essence Oil
Appearance	Transparent to amber liquid
Relative Density	1.020–1.055 g/cm ³ @ 25°C
Refractive Index	1.490–1.525
Flash Point	>98°C(208°F)
Dosage	Fine Fragrance (EDP/Parfum): 15% – 25% Body Care/Lotions: 1% – 3% Home Fragrance/Candles: 8% – 12% Soap & Bath Products: 2% – 5% (Check IFRA certificate for skin safety) Scented Candles: 6% – 10% (Depending on wax type)
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions

The primary function of the Flowerbomb-inspired fragrance essence is to act as a high-performance olfactive anchor, providing an "explosive" sensory impact that defines a brand's luxury identity. From a technical standpoint, this oil functions as a complex gourmand-floral accord with high molecular weight, which translates to superior fixative properties. This means it effectively slows the evaporation of more volatile ingredients, significantly increasing the longevity of the finished perfume. Furthermore, it serves a critical neutralizing function in manufacturing; its potent patchouli and jasmine heart can successfully mask the chemical "off-notes" found in many cosmetic bases, such as alcohols or surfactant blends. Its chemical stability is specifically engineered to prevent oxidation, ensuring that the scent remains vibrant and true to its profile even when stored in varying environmental conditions. By providing a high aromatic payload, the essence allows for lower inclusion rates while achieving a "prestige" sillage, making it both a sensory centerpiece and a cost-effective solution for high-end production.

Industrial Applications

The versatility of this essence makes it a staple in Fine Fragrance Production, where it is most commonly utilized to create Eau de Parfum (EDP) and Parfum extracts. Its dense, sweet profile is perfectly suited for Luxury Body Care, including shimmering body oils, whipped body butters, and high-end shower gels, where the scent needs to "cling" to the skin long after application. In the realm of Hair Care, it is frequently used in scented hair mists and serums because its oil-soluble nature integrates seamlessly without compromising product texture. Beyond personal care, this essence is highly effective for Premium Ambient Scenting. Its heat resistance allows it to perform exceptionally well in Soy and Paraffin Wax Candles, providing a "cold throw"

that is as powerful as the "hot throw." It is also an ideal choice for Reed Diffusers and Room Sprays, where its diffusive jasmine and musk notes can fill large spaces quickly, creating an atmosphere of opulent, floral warmth consistent with the world's leading fragrance houses.

Our Advantages

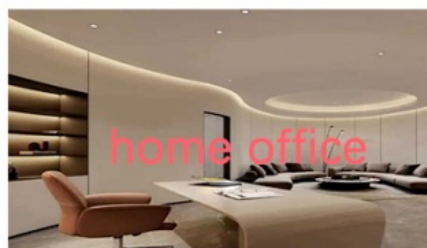

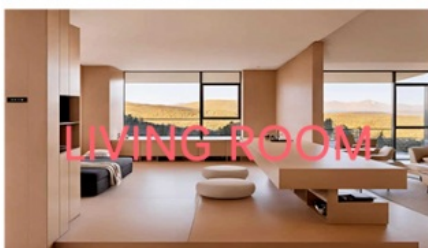

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

Support & Services

- OEM support for custom scents and classical flavors
- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation

Our Advantages:

applications

applications

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

Packaging & Shipping

Pack Type	Quantity	Specification	Volume
Plastic Bottle	5 kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038 cbm
Metal Barrel	25 kgs	D30*H45cm	0.032 cbm
Jerry Can	20-25 kgs	L29.5*D29.5*H41cm	0.33 cbm

Production Time: 3-5 days for trial orders, 5-10 days for bulk orders. We provide photo confirmation before shipping and offer multiple shipping options including sea, air, truck, and express delivery.
