

Body Wash Fragrance Ginger Flavoring Fragrance Oil For Shampoo and Shower Gel & Scented Soap Production/ Making- IFRA

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL20485
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Body Wash Fragrance Ginger Flavoring Fragrance Oil For Shampoo and Shower Gel & Scented Soap Production/ Making- IFRA

Product Code: LDZ-PL20485

Product Overview

Premium fragrance essence for shampoo, shower gel, and scented soap manufacturing with IFRA compliance.

This professional-grade Ginger Flavoring Fragrance Oil is a high-performance aromatic concentrate specifically engineered for the rigorous demands of "wash-off" cosmetic production, including shampoos, shower gels, and artisanal soaps. Characterized by a sharp, zesty top note of fresh ginger root and balanced by crisp citrus undertones, this oil is designed to deliver a therapeutic and hyper-fresh olfactory experience that aligns with modern wellness and apothecary market trends. As the fragrance interacts with warm water, it expands to reveal a warm, spicy heart with earthy nuances, creating an invigorating "steam effect" that enhances the user's sensory ritual. Technically, the essence is formulated for enhanced surfactant stability, ensuring it does not compromise the viscosity, clarity, or texture of liquid soap and shampoo bases. For the manufacturer, this ginger profile offers excellent substantivity, leaving a clean, revitalizing trail on the skin and hair without being overpowering. Its chemical resilience makes it particularly valuable for high-pH applications like cold-process soap making, where it resists scent degradation. Whether used as a standalone hero scent or a versatile blending base for eucalyptus and honey accords, this fragrance oil provides a robust, high-impact solution for creating premium, energizing personal care lines.

Fragrance Profile & Characteristics

Top Notes

The Top Notes provide an immediate, bracing wake-up call, characterized by the sharp, zesty "snap" of Fresh Ginger Peel. This is often accented by a bright citrus flash of Lemon or Lemongrass, which heightens the perception of cleanliness and sanitization—essential for premium wash-off products.

Middle Notes	Moving into the Middle Notes, the fragrance transitions from sharp citrus to a more grounded, Spicy Ginger Root heart. This stage provides a warm, herbaceous depth that mimics the natural earthiness of the plant, often accompanied by soft floral or green tea undertones to smooth out the initial pungency.
Base Notes	Finally, the Base Notes anchor the scent with a subtle, Earthy Musk and Soft Wood finish. This foundation ensures that once the water is rinsed away, a clean, energizing, and sophisticated spicy trail remains lingering on the skin.

Technical Specifications

Product Name	Ginger Flavoring Fragrance Oil
--------------	--------------------------------

Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.890 to 0.920 g/cm ³ @ 25°C
Flash Point	>75°C(167°F)
Refractive Index (RI)	1.475 to 1.495 (at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards
Solubility	Soluble in surfactant-based systems

Recommended Usage Rates

Application	Usage Rate
Shower Gel & Body Wash	1.5% - 5.0%
Shampoo & Conditioner	1.0% - 3%
Liquid Hand Soap	0.5% - 2%
Cold Process Soap	3% - 6%
Body Lotion/Cream	0.2% - 1%

Functions and Applications

Professional Functions

The primary function of this Ginger Flavoring Fragrance Oil is to serve as a high-impact sensory stimulant within personal care formulations. Unlike subtle floral scents, ginger is chemically engineered to provide an "olfactive bloom" when exposed to heat and moisture, a process critical for the "steam effect" in shower environments. Beyond its aromatic role, it functions as a technical stabilizer in surfactant-based products. It is formulated to be non-depolymerizing, meaning it will not break down the salt-thickened chains in shampoos or liquid soaps, thereby preserving the product's intended viscosity and "pour." Additionally, it acts as a tonal neutralizer, effectively masking the medicinal or soapy base odors of raw surfactants and active botanical extracts. Its antioxidant-stable properties ensure the scent does not "sour" or shift over time when exposed to the high-moisture conditions of a bathroom. For the manufacturer, its high concentration allows for a low inclusion rate, providing a cost-effective way to impart a premium, "natural-apothecary" identity to mass-market or artisanal product lines.

Applications

This fragrance oil is specifically optimized for Wash-Off Cosmetic Applications, where scent "impact" during use is more important than long-term skin retention. In Shower Gel and Body Wash Production, it is the preferred choice for "Invigorating" or "Detox" ranges, where its zesty profile enhances the perception of cleanliness. In Hair Care, it is frequently used in clarifying shampoos and scalp treatments, as the ginger scent is psychologically associated with circulation and revitalized health. The oil's high chemical resilience makes it exceptionally popular for Scented Soap Production, particularly in Cold Process (CP) and Melt & Pour (MP) methods; it resists the "flash-off" during the saponification process and maintains its sharp, spicy clarity without discoloring the soap base. Furthermore, it finds extensive use in Grooming and Men's Care, appearing in beard washes and foaming shave gels due to its gender-neutral, earthy appeal. Finally, it serves as a robust base for Spa-Grade Foot Soaks and hand washes, where its refreshing properties provide an immediate, therapeutic sensory experience for the end user.

Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Production begins immediately after payment (3-5 days for trial orders, 5-10 days for bulk orders). We provide photos or samples for confirmation before shipping via ship, air, truck, or express according to customer requirements.
