

Fragrance Oil Chief Fragrance Essence Oil For Perfume Making with Long-lasting High Concentration and Popular Scent

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL10438
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Specification

- Highlight: **long-lasting fragrance oil for perfume making, high concentration perfume essence oil, popular scent fragrance oil with warranty**

Product Description

Fragrance Oil Chief Fragrance Essence Oil For Perfume Making with Long-lasting High Concentration and Popular Scent

Product Code: LDZ-PL10438

In the world of professional perfumery, the quality of a creation is only as profound as the raw materials from which it is built. Chief Fragrance Essence Oil stands as a testament to this principle, offering an elite olfactory foundation for designers and manufacturers alike. This oil is not merely a scent; it is a meticulously engineered aromatic concentrate designed to withstand the complexities of chemical synthesis and dilution. By balancing high-intensity top notes with deep, resonant fixatives, it provides a "chief" or primary character that remains stable and vibrant, whether it is suspended in high-proof alcohol or blended into luxurious cosmetic bases.

The true hallmark of this essence lies in its structural sophistication. In production environments where consistency is paramount, this oil delivers a reliable scent trajectory that evolves beautifully on the skin. Its formulation minimizes the "chemical" harshness often found in lower-grade synthetics, instead offering a smooth, rounded profile that mimics the depth of natural botanicals while providing the projection required of modern Eaux de Parfum. For the artisan producer, it represents the bridge between a simple fragrance and a signature masterpiece, ensuring that every bottle produced carries the weight of premium craftsmanship and enduring elegance.

Fragrance Profile

Fragrance Notes	Description
Top Notes (Opening)	Top Notes (The First Impression):The fragrance opens with a vibrant, high-impact "burst." You will typically encounter bright citrus (such as Bergamot or Lemon) or crisp herbal elements (like Peppermint or Basil). These volatile notes provide immediate "lift" and energy, designed to captivate the senses for the first 15–30 minutes of wear.
Middle Notes (Heart)	Middle Notes (The Heart):As the top notes evaporate, the "heart" emerges to define the perfume's true character. This layer is usually composed of lush florals (Lavender, Geranium, or Rose) and warm spices (Cardamom or Clove). These notes provide the body and "roundness" of the fragrance, lasting for several hours.
Base Notes (Foundation)	Base Notes (The Foundation):The dry-down is anchored by deep, heavy molecules that act as fixatives. Expect a rich, grounding finish of precious woods (Sandalwood, Cedar), earthy resins (Frankincense, Amber), or musk. These notes provide the incredible longevity and "soul" that linger on the skin for 12+ hours.

Technical Specifications

Parameter	Specification
Fragrance Notes	Chief Fragrance Essence Oil
Appearance	Transparent to amber liquid
Relative Density	0.920–0.980 g/cm ³ @ 25°C
Refractive Index	1.480–1.520
Flash Point	>100°C (200°F)
Dosage	Parfum (Extrait):20% -- 30% Eau de Parfum (EDP):15% -- 20% Eau de Toilette (EDT):5% -- 12% Eau de Cologne:2% -- 5% Reed Diffusers / Room Sprays:15% -- 25%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions

The primary function of Chief Fragrance Essence Oil is to serve as the "olfactory blueprint" for a product, providing both the aesthetic character

and the structural integrity required for a high-quality scent. Beyond simply smelling pleasant, this essence acts as a chemical stabilizer; it is formulated with high-quality fixatives that anchor more volatile aroma molecules, slowing their evaporation rate. This functional design ensures that the fragrance evolves linearly rather than dissipating all at once.

Furthermore, it functions as a masking agent, effectively neutralizing the harsh, medicinal odors often associated with alcohol bases or raw cosmetic ingredients. In emulsions and wax-based products, it provides homogenization support, meaning it integrates into the molecular structure of the carrier without causing separation or "sweating." By delivering a high concentration of aromatic compounds, it allows manufacturers to achieve a potent "throw"—the ability of a scent to fill a space—while using a smaller volume of raw material, making it both a functional and economical choice for large-scale production.

Industrial Applications

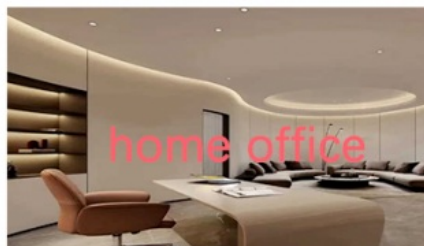

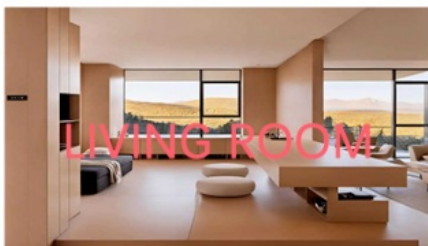

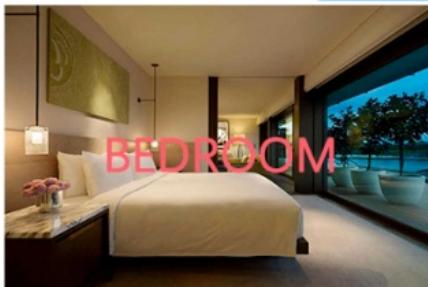

The applications for Chief Fragrance Essence Oil span across multiple luxury and industrial sectors, making it an incredibly versatile asset for manufacturers. Its most prominent use is in Fine Fragrance Production, where it is diluted with perfumer's alcohol to create Eaux de Parfum and Extrait. Because of its professional-grade purity, it maintains clarity and brilliance even at high concentrations, avoiding the cloudiness that often plagues lesser oils.

Beyond traditional bottling, it is a staple in Home Ambient Scenting. It is highly effective in reed diffusers, electric nebulizers, and luxury soy-wax candles, where its high flash point ensures a safe and consistent "hot throw." In the Cosmetic and Personal Care industry, it is integrated into premium lotions, body butters, and hair serums. Its formulation is designed to be skin-safe when diluted, allowing brands to extend a signature scent across an entire lifestyle range. From high-end hotel lobby scenting systems to artisanal boutique soaps, this essence provides the consistent performance required for a professional brand identity.

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

applications

applications

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

Support & Services

- OEM support for custom scents and classical flavors
- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation

Packaging & Shipping

Pack Type	Quantity	Specification	Volume
Plastic Bottle	5 kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038 cbm
Metal Barrel	25 kgs	D30*H45cm	0.032 cbm
Jerry Can	20-25 kgs	L29.5*D29.5*H41cm	0.33 cbm

Production Time: 3-5 days for trial orders, 5-10 days for bulk orders. We provide photo confirmation before shipping and offer multiple shipping options including sea, air, truck, and express delivery.

Where there are fragrance, there are Plant flavor.
