Product Description

Premium Fragrance Essence Long-Lasting Green Tea–White Orchid Fragrance For Cold Scented candles,diffuser, with Natural Herbal Extract and Free Sample

Product Code: LDZ-PL30435

Premium fragrance essence for reed sticks, scented candles, and home spray productions

Product Overview

The Green Tea–White Orchid Fragrance Oil is an exquisite, spa-inspired aromatic blend designed to evoke a sense of serene tranquility and natural elegance. This oil serves as a refreshing departure from heavy, traditional scents, focusing instead on a crisp, botanical profile that balances the herbaceous clarity of steamed green tea leaves with the delicate, powdery softness of blooming white orchids. Upon first impression, it delivers a clean, revitalizing energy that mimics the atmosphere of a high-end wellness retreat or a sun-drenched botanical garden.

Technically optimized for versatility, this fragrance oil is highly effective for cold-process scented candles, where its molecular structure allows for a vibrant "cold throw" that perfumes a room even when the wick remains unlit. In diffuser applications, it excels by maintaining its light, airy integrity without becoming cloying, making it ideal for workspaces, bathrooms, or meditation areas. The formulation is typically concentrated and long-lasting, ensuring that the sophisticated floral-green notes linger gracefully in the air. Whether used by artisanal makers or for personal home ambiance, this scent provides a sophisticated, modern olfactory experience that feels both cleansing to the spirit and aesthetically polished.

Fragrance Profile & Characteristics

Fragrance Notes	Description
Top Notes	The scent opens with a bright, invigorating splash of Citrus Zest—typically lemon or bergamot—paired with the crisp, herbaceous snap of Steamed Green Tea leaves. This initial impression is airy and ozonic, immediately cleansing the olfactory palette.
Middle Notes	At its heart lies the star of the composition: White Orchid. This is often supported by delicate layers of Jasmine Petals and Lily of the Valley. These "mid-tones" provide a soft, watery florality that feels elegant and feminine without being overly sweet.

Base Notes	The fragrance is anchored by a clean, grounding finish of White Musk and Light Precious Woods. A hint of Amber may be present to provide warmth, ensuring the delicate tea and floral notes have the structural integrity to last through hours of diffusion or candle burning.

Technical Specifications

Parameter	Specification
Product Name	Green Tea–White Orchid Fragrance Oil
Fragrance Profile	Sharp Citrus, Zesty Peel, Effervescent
Appearance	Colorless to light yellow transparent liquid
Relative Density	0.970–0.995 g/cm ³ @ 25°C
Refractive Index	1.460–1.485 @ 20°C
Flash Point	90°C-104°C (194°F-220°F)
Ingredients	Natural & Synthetic Aromatic Compounds
Recommended Dosage	Cold Scented Candles: 8% – 10% (Best added to wax at approx. 70°C). Reed Diffusers: 20% – 25% (Blended with a high-quality solvent base). Ultrasonic Diffusers: 5 – 8 drops per 150ml of water. Room & Linen Sprays: 3% – 5% (Ensure a solubilizer is used if mixing with water).
Volatilization Rate	Maintains continuous fragrance for 20-30 days, covering 15-25 square meters
Solubility	Easily soluble in ethanol and propylene glycol
Compatibility	Compatible with most anionic, nonionic, and zwitterionic surfactants
Shelf Life	12-24 months when stored in cool, dark place in sealed container
Standard Compliance	IFRA compliant with passed skin irritation testing

Functions & Applications

The primary function of Green Tea–White Orchid fragrance oil is to facilitate olfactory wellness and spatial purification. Unlike heavier gourmand or spicy scents, this oil acts as a "clarifying" agent for the air, utilizing the crispness of green tea to provide a sense of mental alertness while the white orchid promotes relaxation. Its molecular design is specifically balanced for high-volatility dispersion, meaning the scent particles travel easily through large spaces without settling too quickly.

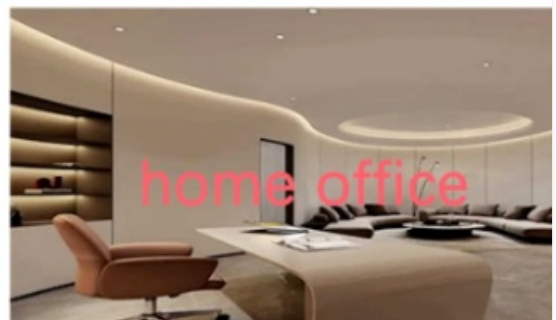

In technical applications, the oil serves as a stable aromatic compound that resists discoloration. In candle making, its function is to provide a superior "cold throw," allowing the product to act as a passive air freshener even when unlit. It also functions as a harmonizer; because it is Phthalate-free and often vanillin-free, it maintains the chemical integrity of the base medium—be it wax or alcohol—ensuring the final product remains visually pristine and chemically safe for long-term inhalation in enclosed environments.

Primary Applications

The applications for this botanical blend lean heavily toward luxury spa and wellness environments. In the professional sector, it is the premier choice for HVAC cold-scenting in yoga studios, medical spas, and boutique hotel lobbies where a "clean" and "zen" identity is required. Because of its light, non-intrusive nature, it is widely applied in office aromatherapy, helping to reduce stress and improve focus among employees without causing the "scent fatigue" associated with heavier perfumes.

For the artisan and retail market, this oil is a top performer in cold-process candle collections and luxury wax melts, where customers prioritize a natural, garden-fresh aesthetic. It is also an ideal candidate for reed diffusers placed in high-moisture areas like bathrooms or kitchens, as the green tea notes naturally complement those environments. Additionally, it can be used in linen and room sprays to refresh textiles, or as a sophisticated scent additive for hand-poured soaps and lotions, providing a high-end, "unisex" appeal that attracts a wide demographic of consumers.

applications

Our Advantages

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

Support and Services

Our R&D team includes PhDs and senior engineers, with established laboratories in partnership with universities. We integrate global technology to maintain product advantage through continuous innovation.

Comprehensive Support Services

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation

Packaging and Shipping

Product Packaging Options

Pack Type	Quantity	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm 5kg*4 bottle per carton	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Shipping Information

Production time: 3-5 days for trial orders, 5-10 days for bulk orders. We provide photos or samples for confirmation before shipping. Shipping options include ship, air, truck, and express delivery.
