Product Description

Free Sample High Concentration Rose Essential Oil Fragrance For Perfume Making/Production

Product Code: LDZ-PL10402

In the world of high-end perfumery, high-concentration rose essential oil stands as an unrivaled masterpiece of nature, a liquid tapestry woven from thousands of hand-picked petals. To encounter it in its pure form is to experience the flower's entire life cycle captured in a single drop. It begins with a bright, crisp verdancy—the scent of a thorned stem crushed between fingers—before unfurling into a deep, velvety heart that radiates warmth. This is not the sheer, powdered rose of a vanity table; it is an opulent, honeyed elixir with surprising undertones of spice, wine, and damp earth.

For the artisan, this concentrate is the ultimate structural tool. Its immense chemical complexity allows it to act as a bridge, harmonizing sharp citrus top notes with the heavy, resinous depths of amber or musk. In production, its potency is its greatest asset; a mere fraction of a percent can anchor a fragrance, providing a "bloom" that fills a room and a tenacity that lingers on the skin for hours. It lends a three-dimensional realism and a sense of "prestige" to a blend, offering a sophisticated soul that synthetic molecules strive for but rarely achieve. It is, quite simply, the breath of the garden distilled into gold.

LDZ-PL31573

Seasalt

Production Date: April 16,2026

Production Batch No.: 260416568

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Supplier: Guangzhou Plant Fragrance Co., LTD

Address: No. 1, Keyuan Road, Baiyun District, Guangzhou, Guangdong, 510540, China

Tel: 86-18824190039

Email: plan@662n.com

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The initial impression is remarkably bright and ethereal. It features a crisp, green verdancy—reminiscent of crushed leaves and morning dew—intermingled with a faint, lemony tartness that provides an immediate sense of "lift" and natural realism.

Middle Notes (Heart)	The heart is the essence of the "True Rose." It is velvety, opulent, and intensely floral. Here, the oil reveals sophisticated nuances of spicy clove, rich wine, and a soft, tea-like dryness that gives the fragrance its signature body.
Base Notes (Foundation)	As the oil settles, it anchors the blend with a persistent, honeyed sweetness. This dry-down is earthy and warm, leaning into a balsamic richness that ensures the fragrance remains intimate and sophisticated hours after application.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Rose Essential Oil Fragrance
Appearance	Transparent to amber liquid
Relative Density	0.848–0.875 g/cm ³ @ 25°C
Refractive Index	1.453–1.464
Flash Point	>54°C (129°F)
Dosage	0.1% – 5.0% (In final perfume compound)

Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions

The primary function of high-concentration rose essential oil in perfumery is that of a harmonizer and olfactive anchor. Due to its complex chemical makeup—consisting of hundreds of individual molecules—it possesses a unique ability to bridge disparate notes. It acts as a "modifier," softening the sharp, synthetic edges of cheaper materials and providing a natural, three-dimensional depth that is impossible to replicate with isolates alone. Beyond its scent, it functions as a potent middle-note fixative, increasing the "tenacity" of the perfume by slowing the evaporation of more volatile top notes. In aromatherapy-focused formulations, it serves a psychological function, often utilized for its reputed uplifting and "heart-opening" properties. Its presence in a formula also serves a marketing function; as one of the world's most expensive raw materials, it immediately elevates a product's prestige, allowing for "luxury" or "niche" positioning within the competitive global fragrance market.

The applications for rose concentrate span across luxury sectors, primarily dominating fine fragrance production. Here, it is the backbone of "Floral," "Chypre," and "Oriental" perfume families, used to create everything from soliflores to complex, spicy ouds. Beyond alcoholic perfumes, it is a key ingredient in prestige skincare and cosmetics. Due to its antioxidant properties and intoxicating aroma, it is often incorporated into high-end facial oils, rejuvenating serums, and luxury creams where "active" benefits meet sensory indulgence. In the cosmeceutical world, it is applied in premium body treatments and spa-grade massage oils to provide a holistic wellness experience. Furthermore, it finds niche applications in high-end ambient scenting, such as reed diffusers or candles for luxury hotels, where a consistent and sophisticated atmosphere is required. Finally, in some regions, food-grade rose otto is applied in gourmet flavor chemistry, adding a floral signature to artisanal chocolates, liqueurs, and fine confections.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

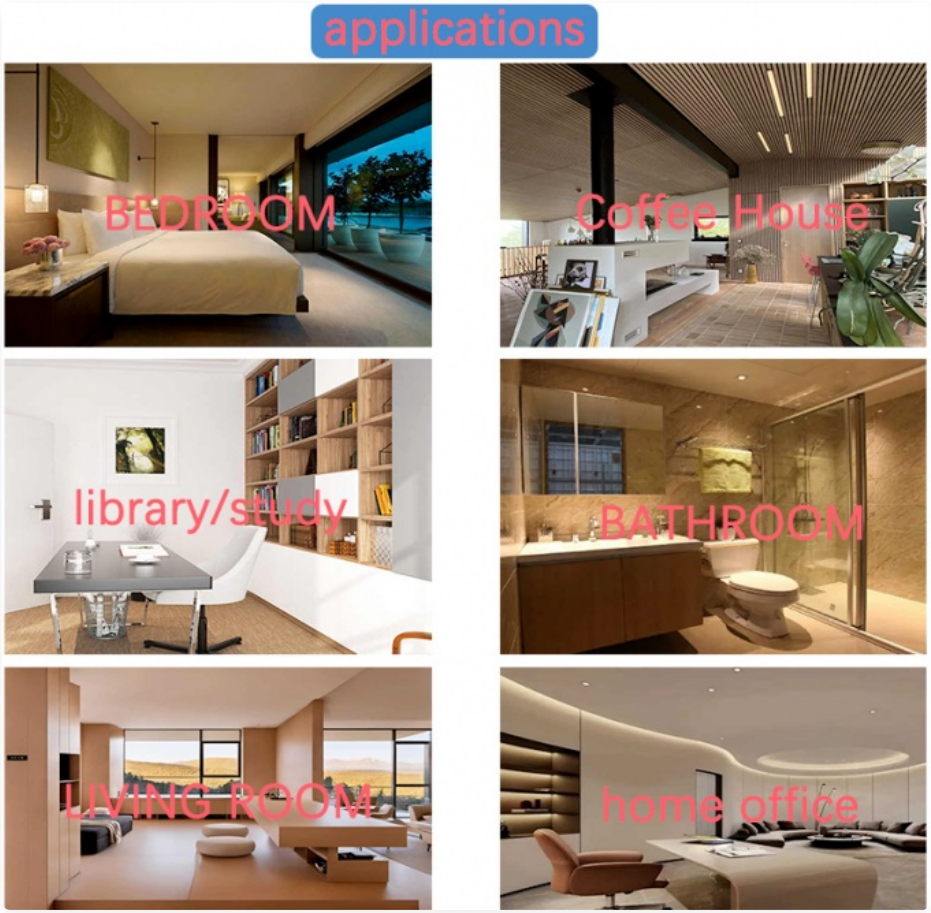

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

applications

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC
