

## High Concentration Ebony Satin Mood (Vanshico) Fragrance Oil For Perfume Making/Production With Free Sample

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL10414
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41\*28\*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

### Product Specification

## High Concentration Ebony Satin Mood (Vanshico) Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL10414

This high-concentration fragrance oil is a sophisticated, woody-sensual base designed for professional perfume making. The "Ebony Satin" profile delivers a luxurious blend of dark, dry ebony wood accented with creamy sandalwood, powdery musks, and a whisper of amber or vanilla, creating a smooth, "satin-like" finish rather than a sharp timber scent. As a high-concentration product, it offers exceptional longevity (8+ hours on a strip) and moderate to heavy sillage, making it highly efficient for crafting EDPs, oil-based perfumes, and solid scents. The scent unfolds with subtle spicy or saffron top notes, a velvety floral heart, and a deep, resinous woody base. Ideal for blending with rose, jasmine, or pink pepper, this oil provides a warm, elegant, and unisex foundation. Always dilute properly before skin application due to its potency.

### Fragrance Profile:

The overall profile is unisex, elegant, and sensual—ideal for evening wear or as a base note fixative in custom perfumes. Due to its potency, proper dilution is required before skin application.

Fragrance Notes	Description
Top Notes (Opening)	The top notes open with a subtle yet intriguing spark of saffron and pink pepper, adding a gentle, spicy brightness without overwhelming the composition.

Middle Notes (Heart)	As the scent develops, the middle (heart) notes emerge as a smooth, velvety blend of violet leaf and cashmeran, providing a soft, satin-like texture that bridges the spice and the wood.
Base Notes (Foundation)	The base notes form the rich, long-lasting foundation: dry ebony wood takes center stage, supported by creamy sandalwood, powdery white musk, and a touch of warm amber and resinous vanilla. This high-concentration oil offers exceptional longevity and moderate to heavy sillage.

## Technical Specifications

Parameter	Specification
Fragrance Notes	Ebony Satin Mood (Vanshico) Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.950–1.100 g/cm <sup>3</sup> @ 25°C
Refractive Index	1.480–1.520
Flash Point	>60°C (130°F)
Dosage	Perfume: 15-25%; Body Oil: 5-10%; Soap/Candle: 3-6%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

## Applications & Functions

High Concentration Ebony Satin Mood (Vanshico) Fragrance Oil is designed primarily for high-end fragrance production. Its core function is to serve as a base note fixative, which slows the evaporation of lighter top and middle notes, significantly extending the scent's longevity on skin or materials. The "high concentration" formulation also provides a robust scent throw, allowing the deep, woody, and musky profile to project well even when diluted, making it suitable for complex layering without losing integrity.

Additionally, due to its dense, resinous composition, it functions as an excellent odor neutralizer for base materials (e.g., unscented carriers or wax) and can mask harsh chemical smells. It is often used to add a "velvet" texture to otherwise sharp or synthetic blends, providing a smooth, sensual finish to finished perfumes, colognes, or oil-based body sprays.

In terms of applications, this oil is versatile but best suited for anhydrous (water-free) products. Its primary use is in fine perfumery, including Eau de Parfum (EDP), oil-based roll-ons, and solid perfumes. It is also widely used in body care products like massage oils, body lotions, and body butters to add a lingering, sophisticated scent.

Beyond skin, it can be used in home fragrance applications such as reed diffusers, candle making (specifically soy or coconut wax), and wax melts, where it provides a warm, cozy atmosphere. However, due to its high viscosity and concentration, it typically requires dilution with a carrier solvent (like DPG or isopropyl myristate) for compatibility with alcohol-based sprays or cold processes like soap making.

## Industrial Applications

Primary applications include:

**Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils

**Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

**Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production

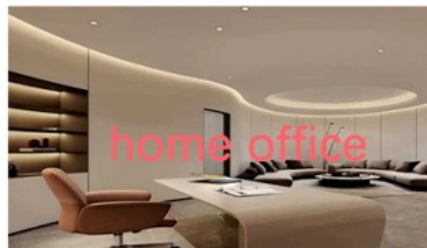

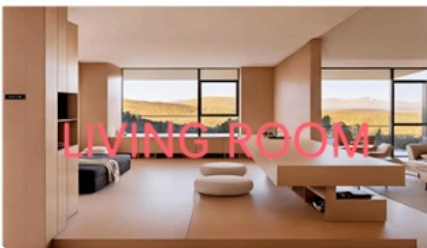

**Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques

**Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

## Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
