Product Description

High Concentration Chance Eau Vive Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL10346

It is a vibrant, sparkling, and youthful masterpiece celebrated for its radiant energy and sophisticated vivacity. Designed to capture a sense of optimism and spontaneous movement, this fragrance presents a brilliant blend of zesty citrus, delicate florals, and elegant woods that makes it an exceptional profile for premium perfume manufacturing. The scent launches with a brilliant, explosive burst of blood orange and grapefruit, delivering a uniquely bittersweet, sharp, and intensely refreshing opening that instantly awakens the senses. As the fragrance develops, it transitions seamlessly into a feminine, radiant heart dominated by delicate jasmine and a clean musky accord, which adds a soft, sophisticated texture to the initial citrus zest. Finally, the composition settles into an elegant, grounding foundation of vetiver, cedar, and iris, leaving behind a fresh, woody-floral trail that feels classically refined yet thoroughly modern. When utilized as a concentrated fragrance oil for perfume production, this profile offers fantastic commercial viability and formulation versatility. It delivers a lively, uplifting daytime aura with a remarkably clean, elegant dry-down, making it perfect for crafting high-quality perfumes that project youthful luxury, effortless chic, and long-lasting freshness.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance commands attention with an explosive, invigorating burst of blood orange and grapefruit. This citrus opening is uniquely bittersweet, sharp, and intensely refreshing, providing an immediate surge of vibrant, youthful energy that instantly awakens the senses.
Middle Notes (Heart)	As the initial zest softens, the scent transitions into a luminous, elegant heart. A delicate accord of jasmine takes center stage, beautifully intertwined with a clean, soft musk. This combination tames the citrus brightness, adding a smooth, feminine, and sophisticated floral texture.

Base Notes (Foundation)	The dry-down settles into a classically refined, grounding foundation. Elegant vetiver and crisp cedarwood blend seamlessly with a gentle touch of iris, leaving a fresh, woody-floral trail that lends long-lasting depth, balance, and signature Chanel sophistication to the skin.

Technical Specifications

Parameter	Specification
Fragrance Notes	Chance Eau Vive Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.982–0.992 g/cm ³ @ 25°C
Refractive Index	1.458–1.468
Flash Point	78°C to 88°C (172°F to 190°F)
Dosage	Fine Perfume / EDP: 15-25%; Body Lotions & Creams: 1-3%; Hair Mists / Sprays: 1-4% Soaps & Rinse-off Products: 2-5%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions

In the realm of perfume production and manufacturing, the concentrated Chance Eau Vive type fragrance oil is a highly adaptable raw material. Its primary application lies in fine perfumery, where its premium formulation is perfectly optimized for crafting Eau de Parfums, Eau de Toilettes, and luxury hair mists that demand a bright, sophisticated citrus-floral projection. Beyond traditional perfumes, its excellent stability makes it ideal for premium personal care lines, seamlessly blending into moisturizing body lotions, shimmering body oils, and refreshing shower gels to offer consumers a cohesive layering routine. Additionally, due to its youthful and universally appealing olfactory profile, it is increasingly applied in boutique home scenting. It performs beautifully in high-end reed diffusers, room sprays, and luxury wax formulations, transforming interior spaces into elegant, energetic environments that mirror the chic, uplifting atmosphere of a high-fashion boutique.

The core function of this fragrance oil concentrate is to deliver a long-lasting, sophisticated, and evolving olfactory experience across various mediums. Chemically, it functions as a homogenous aromatic compound, designed to dissolve perfectly in cosmetic-grade alcohol or carrier oils without clouding or separating. From a sensory perspective, its vibrant blood orange and grapefruit top notes function as an immediate mood elevator, triggering feelings of optimism, vitality, and freshness upon initial spray. In product manufacturing, it acts as a masking agent, neutralizing the chemical undertones of raw cosmetic bases while significantly elevating the product's perceived market value. Furthermore, its expertly balanced fixation—driven by the base notes of vetiver and cedarwood—functions to slow down the evaporation rate of the volatile citrus notes. This crucial chemical retention ensures that the fragrance maintains its structural integrity and stays tenacious on the skin for hours.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

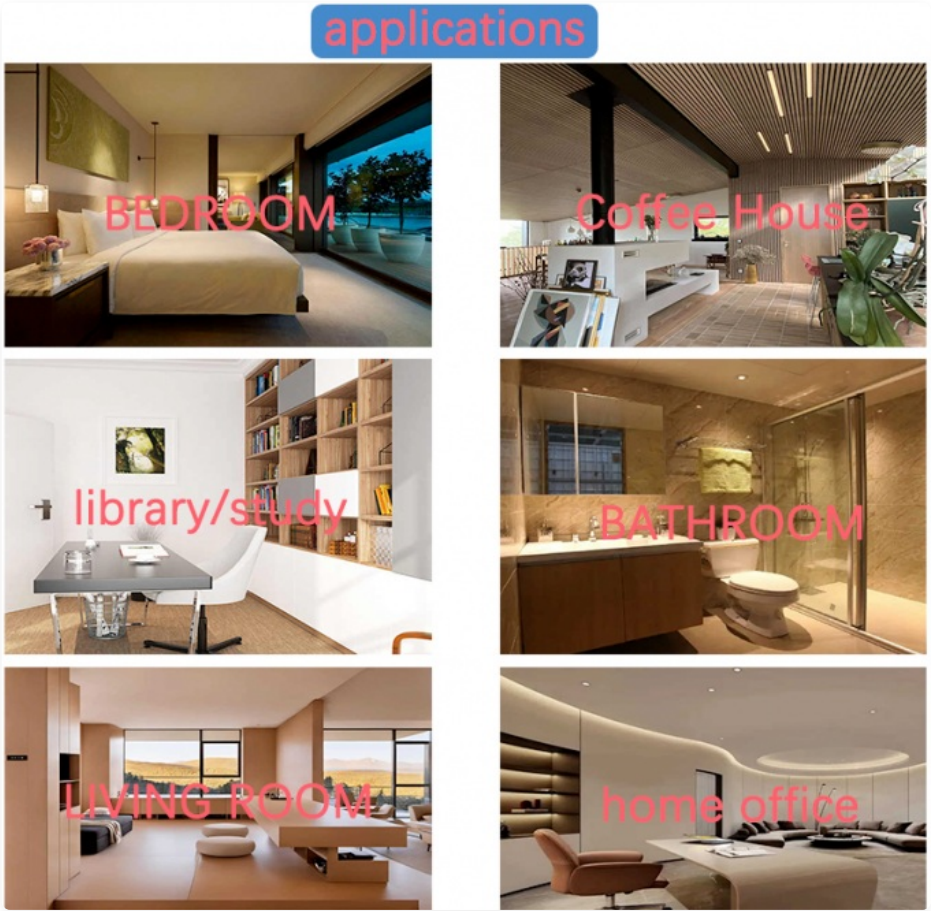

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

applications

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC
