

High Concentration Vanilla ice Cream Flavoring Oil For Perfume Making/Production With Free Sample

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL10536
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

High Concentration Vanilla ice Cream Flavoring Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL10536

This premium-grade Concentration Vanilla Ice Cream Flavoring Oil is meticulously engineered for high-end perfume compounding and fine fragrance production. Characterized by its sophisticated gourmand olfactive profile, the oil opens with indulgent, lactic top notes that seamlessly transition into a rich, balsamic heart of pure vanilla bean, culminating in a warm, buttery, and sugary dry-down.

Architected for exceptional performance, this raw material boasts a high concentration level, ensuring profound sillage (projection) and outstanding longevity on the skin even at minimal olfactive dosages. This potency offers superb cost-efficiency for scaled manufacturing. Furthermore, the oil exhibits excellent chemical stability and solubility across various mediums, blending effortlessly into alcohol-based (Eau de Parfum), oil-based, and solid perfume carriers without compromising clarity or causing acceleration. It serves as an excellent fixative or modifier, harmonizing beautifully with amber, woody, and spicy accords. Manufactured under rigorous quality control, it complies with global cosmetic safety standards, ensuring a skin-safe, non-discoloring, and market-ready formulation.

PLAN LDZ-PL10413 Coconut & Vanilla Fragrance

Production Date: April 25, 2026	Application: Daily Fragrance
Production Batch No.: 200428539	Usage: Add in appropriate amounts as needed in production
Shelf Life: 2 years	Shake well before use, and use as soon as possible after opening
Specifications: Single drum	Storage conditions: Store in a cool, dry, and well-ventilated place, sealed
Product Standard No.: GM/T22731 Daily Fragrance	
Net Weight: 5kg	

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Shanghai Plan International Fragrance Co., Ltd.
Address: No. 1111, Xuyi Road, Songjiang District, Shanghai 201600, China

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with immediate, indulgent lactonic and creamy accords, evocative of freshly churned milk and chilled heavy cream. A subtle hint of frosted sweetness provides an instant, inviting brightness.
Middle Notes (Heart)	As the initial creaminess settles, the heart reveals a rich, authentic balsamic vanilla bean core. This stage is dominated by warm, sweet, and slightly woody facets of natural vanilla pod, creating a comforting and deeply volumetric center.

Base Notes (Foundation)	The dry-down anchors the fragrance with an enduring warmth of caramelized sugar, rich melted butter, and a soft, powdery white musk. This heavy base acts as an exceptional fixative, ensuring the decadent, sweet trail persists beautifully on the skin.

Technical Specifications

Parameter	Specification
Fragrance Notes	Vanilla ice Cream Flavoring Oil
Appearance	Transparent to amber liquid
Relative Density	1.035–1.065 g/cm ³ @ 25°C
Refractive Index	1.495–1.525
Flash Point	>93.3°C (200°F)
Dosage	Fine Perfume / EDP:15% – 30%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

This high-concentration Vanilla Ice Cream Flavoring Oil serves as a highly versatile raw material across multiple fine fragrance formats. In alcohol-based perfumery, it is a foundational component for creating sophisticated Eau de Parfum (EdP) and Eau de Toilette (EdT) formulations, adding depth and a modern gourmand twist to traditional profiles. Its excellent solubility also makes it ideal for oil-based perfumes (such as rollerballs and luxury body oils), where it dissolves seamlessly without causing turbidity or separation.

Furthermore, the oil's high thermal stability allows it to perform beautifully in solid perfumes and wax-based applications, maintaining its true aromatic integrity during the heated pouring process. Beyond personal fine fragrance, its robust compounding nature makes it an excellent choice for premium ambient scenting, including luxury scented candles, reed diffusers, and room mists, where a consistent, high-impact room filling effect (cold and hot throw) is required.

From a functional compounding perspective, this flavoring oil behaves primarily as a powerful fixative and modifier within a fragrance pyramid. Due to the high molecular weight of its core sweet and balsamic components, it slows down the evaporation rate of volatile top notes, significantly extending the overall longevity and performance of the perfume on the skin.

It functions exceptionally well as a harmonizing agent, bridging the gap between sharp citrus or heavy spice top notes and deep woody or musky base notes, smoothing out rough transitions in the dry-down. Additionally, its inherent lactonic and creamy facets function to add volumetric texture and "body" to a blend, turning thin or flat accords into rich, multi-dimensional olfactive experiences. Finally, its high concentration ensures exceptional sillage and projection, allowing perfumers to achieve a commanding, memorable scent trail even at highly cost-effective, low-percentage inclusion levels.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

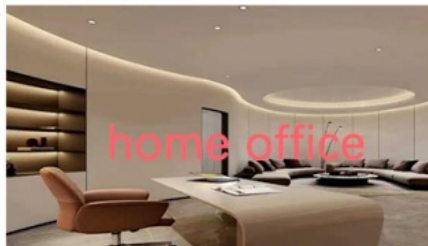

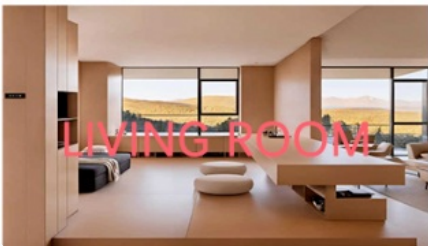

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
